Dear shareholders and partners,

The first year of listing on the Bucharest Stock Exchange coincided with the best year in the company’s history, in terms of profitability. The landmark year 2022 comes in the context of a continuous development during the last 30 years, in which we have become the market leader in the integrated distribution of fast-moving consumer goods in Romania. We are a company that has reached the Top 100 companies in Romania, and we have assumed a mission to grow the business for the next 5 years.

After the largest initial public offer carried out by an entrepreneurial company on the local capital market, of RON 367 million, in November 2021, we followed a year of adaptation to the status of listed company, but also to a challenging geopolitical and economic context. This new status provides the premises for a new stage of growth in partnership with new shareholders for the development of the company.

From an operational perspective, we followed the organic growth strategy, with a focus on the distribution segment, by expanding the product portfolio, including our own brands, and we continued the steps towards an acquisition transaction (M&A), with probable finalization in 2023. AQUILA's portfolio consists of approximately 10,000 products, of which 1,000 were launched in 2022. In terms of developing our own brands, we have increased the presence and the market share in the frozen fruits & veg market by developing our own brand – Gradena and in the ready - meals market through the development of our own brand La Masa.

The company maintains its goal of doubling EBITDA by 2026 and its commitment to grow through both M&A and organic with a focus on distribution and brands.

In 2022 we obtained a net profit of RON 85 million, up by 20% compared to the result recorded in the previous year, the highest since the company's establishment. The result obtained comes in the context of the company's increase in revenues by 15%, up to RON 2,210 million, supported by the distribution segment, especially by the sales through the HoReCa channel and the proximity one (gas stations and proximity stores), as well as by our own brands. In the revenue structure, all three business segments increased: distribution, 15%; logistics, 7%; and transportation, 15%. The revenues related to our own brands, Gradena and La Masa, had an advance of 43% in 2022, up to RON 67.5 million.

The company's gross margin was improved by 1.6 percentage points to 21.3%, influenced by the mix of products sold and the focus on the best performing channels.

All this happened in a context with multiple external influences on the business, both in terms of the conflict in Ukraine, inflation, and rising financing costs. Although we have noticed trends in reducing volumes and the consumer basket, given that prices have increased, we have managed to achieve a balance between cost increases and increasing their selling prices. We also have the advantage that we sell both food and non-food products, which cover the basic needs of consumers in over 67,000 selling points through all retail channels, which cover over 90% of the market.

For AQUILA, environmental, social and governance (ESG) principles are a priority, with targets we would assume within the Sustainability Strategy published in 2022, after a first year of non-financial reporting.

The end of 2022 found us to be part of the main index of the Bucharest Stock Exchange - BET and of the international index - FTSE Global Micro Cap, the company's shares benefiting from the Market Making services offered by BRK Financial Group. We have communicated openly and proactively with stakeholders in the capital market, and we have obtained since the first year VEKTOR 10 - an indicator calculated by the Romanian Investor Relations Association for investor communication.

The capital market is based on trust, and we are here to build a long-term partnership with our investors.

We would like to thank the shareholders who have joined AQUILA and we invite you to continue reading the detailed report of the financial results for 2022.

Sincerely,

President

Alin Adrian Dociu

Vice President, Executive Director

Cătălin Vasile

THE CONSOLIDATED AND SEPARATE REPORT OF THE ADMINISTRATORS FOR THE YEAR 2022

- Vlad Alexandru Deliu – President;
- Daniela Mândru – Petrovici – Member.

The members of the Nomination and Remuneration Committee are:

- Daniela Mândru – Petrovici – President;
- Vlad Alexandru Deliu – Member;

EXECUTIVE MANAGEMENT

The Board of Directors delegates the management of the Company to managers who fulfil their functions based on mandate contracts.

At the date of this report, Mr. Constantin-Cătălin Vasile is the General Director and Mr. Alin-Adrian Dociu is the Deputy General Manager appointed by the Board of Directors based on a mandate contract.

Also, Mr. Daniel Băluș performs the position of Commercial Director, Mr. Sorin Bașcău performs the position of Financial Director, Mr. Petre Bogdan - the position of Operational Director and Mr. George Dragomir - the position of Transport Director, and here one of these persons does not have delegated management attributions (i.e. are not directors within the meaning of the Companies Law).

The place of activity carried out by the General Director, the Deputy General Manager, and by the other directors is at the Headquarters of the Company.

Name	**Date of designation**	**Mandate/contract period work**	**Function**
Constantin-Cătălin Vasile	18 August 2021	7 April 2023	General Manager, mandate contract
Alin-Adrian Dociu	22 March 2022	7 April 2023	Deputy General Manager, mandate contract
Daniel Băluș	2019	Indefinite	Commercial Director, employment contract
Sorin Aureliu Băşcău	2020	Indefinite	Financial Director, employment contract
Petre Bogdan	2015	Indefinite	Operational Director, employment contract

George Dragomir	2015	Indefinite	Transport Director, employment contract
Iosif Ienei	2001	Indefinite	General Manager Trigor AVD, employment contract

The Company's management persons, without powers delegated by the Board of Directors, who carry out their activity under employment contracts for an indefinite period are:

Daniel Băluș

Daniel Băluș is the Commercial Director of the Company since 2019, after joining the AQUILA team in 1998. Until now, he has held various management positions in the commercial department of AQUILA. Mr. Băluș has extensive experience in managing the portfolio of suppliers and customers, in various food and non-food markets and has covered all distribution channels.

Sorin Aureliu Băşcău

Sorin Aureliu Bășcău joined the Company in 2001, initially as a financial analyst and later became manager of the controlling department. Starting with 2020, Mr. Bășcău holds the position of Financial Director of the EAGLE. Over the years, Mr. Bășcău has been involved in improving financial and operational analysis and reporting systems, in the development and implementation of processes and procedures, as well as in supporting the completion of financing and M&A transactions. Mr. Bășcău is a graduate of the Academy of Economic Studies.

Petre Bogdan

Petre Bogdan is the Company's Operations Director since 2015. He joined the team in 1998 and has spent most of his career in operational activities trying to achieve best operational practices in systems, processes and technology, continuous improvement, supply chain, automation and delivery. These tasks include leadership skills used in the development of long-term operational strategies, working closely with senior management to meet the Company's objectives. Mr. Bogdan graduated from the Faculty of Engineering and Management of the Bio Terra University of Bucharest.

George Dragomir

George Dragomir has been the Transport and Heritage Director of AQUILA since 2019 and joined the team in 2003. He has a vast experience in fleet management and transport activity, adding value to the activities of the International, Domestic and Logistics Transport Group. Mr. Dragomir is also developing the team for the heritage department, a non-focus in the evolution of the Group's long-term vision. Mr. Dragomir is a mechanical engineer and graduated from the University of Transport in Bucharest in 1998. Between 2007 and 2008, Mr. Dragomir obtained the professional certificate in management issued by the Open University Business School UK.

Iosif Ienei

Iosif Ienei holds the position of General Director of Trigor AVD, which operates in the Republic of Moldova. Mr. Ienei started his career at AQUILA in 1997 having several positions in the commercial department and from 2001 until now he has developed Trigor AVD, being a basic pillar in the construction and development of the Group in the Republic of Moldova. Mr. Ienei graduated from the Technical University of Petroșani in 1994, and between 2003-2006 he obtained the professional certificate in management and the diploma in management issued by the Open University Business School UK.

PRESENTATION OF THE ACTIVITY

AQUILA is one of the main distributors of fast-moving consumer goods in Romania and Republic of Moldova, with more than 28 years of experience in this area, having a distribution network that covers 67,000 sales points, out of which 58,000 sales points in the Traditional Retail channel, more than 4,500 sales points in the Organized Retail channel and 5,000 sales point in the HORECA channel. The distribution activity performed by AQUILA covers approximately 90% of the Traditional Retail and Organized Retail market, the company having the capacity to distribute products of all temperature classes.

The company is present in the Republic of Moldova through Trigor AVD, a company whose main activity is the distribution, storage, and national and international transport of consumer goods. The company's main suppliers are Unilever, Kimberly Clark, Tchibo and Ferrero. On December 31, 2022, Trigor AVD had a portfolio of over 3,000 clients.

The company's activity is carried out on three lines of business: distribution, logistics and transport.

DISTRIBUTION ACTIVITY

The strategic partnerships of over two decades with Ferrero, Mars and Unilever ensure AQUILA's presence on all three channels: traditional retail, modern retail and HoReCa channels.

The Traditional Retail channel includes the following types of customers: En-Gross, Sub-distributors, Local Trade Channels, Pharmacies and Pharmacy Channels. The main clients on this channel are: Pet Prodexim SRL, Unicarm SRL, Zozo Cafe Distribution SRL, Top Royal Brands SRL, Annabella SRL, Paco Prod Serv SRL.

The distribution system for this channel is dual, both in the van sell system (i.e. the sales agents have in their own management the stock of goods and can issue on the spot the fiscal documents necessary for the delivery to the customer), oriented towards the numerical distribution of impulse products, as well as in the pre-selling system (i.e. the sales agents take only the customers' orders with the help of the automated mobile systems, and the orders are subsequently delivered by the logistics department), for the other categories of products.

The Modern Channel comprises over 4,500 customers, the main customers being the hypermarket chains, supermakets, discounters, as well as over 1,400 gas stations.

HoReCa Channel, with Gastro portfolio, addresses customers in this industry, covering all sales channels, among which are: Profi Rom Food SRL, Unicarm SRL, Narida SRL, Eurest Rom SRL, Phoenicia Express SRL, General Agro Com Service SRL. As of December 31, 2022, AQUILA had a portfolio of over 5,000 customers and products of approximately 1, 500 storage units (SKUs).

The HoReCa division was created in 2016. The consolidation of the division was achieved in 2019, through the acquisition and then the merger with Agrirom, the Group becoming an importer and distributor of ambient, chilled, and frozen food products, having in its portfolio of products even several own brands, including: Gradena, Frisco, LaMasă and Yachtis.

Gradena is a brand of frozen and canned vegetables, Frisco is a specialized brand of frozen meat, LaMasa is a specialized brand of semi-prepared products also from palm oil and other vegetable fats, and Yachtis is a brand specialized in fish products, frozen and canned.

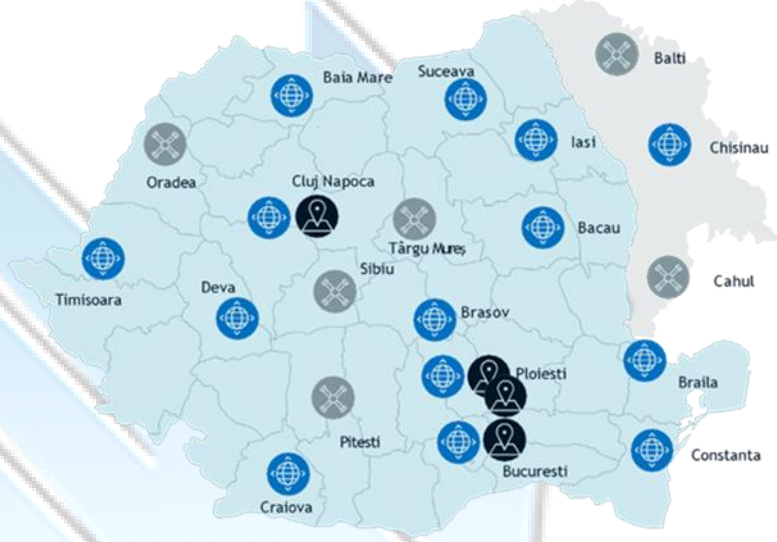
The Travel Retail channel includes presence in the airport and customs, Lagardere locations, respectively Tabac Express, with a number of 2,500 point of sales.

LOGISTICS ACTIVITY

Complementary to the distribution of consumer goods, the Group provides logistics services, through storage, (re)packing and internal transport operations in different temperature segments: ambient, refrigerated and frozen.

Logistics services performed by AQUILA specialists lead to time and cost savings by increasing efficiency and safety. AQUILA provides complete logistics services, consisting of: national transport, warehousing, handling, collection, secondary transport, reverse logistics, inventory, pallet management, labelling, packaging and co-packing.

Over the years, the Company has developed an extensive logistics network of 4 logistics centers, 13 distribution centers (one located in the Republic of Moldova) and 6 cross-docking points (two located in the Republic of Moldova). AQUILA has a storage capacity of over 120,000 pallets, of which 94,000 are in the ambient environment, approximately 9,000 in the refrigerated environment and approximately 20,000 in the frozen environment.



AQUILA uses a sustainable logistics model developed in collaboration with CHEP, for the reuse by rental of pallets, thus saving 117 m3 of wood, saving more than 110,000 trees from cutting, reducing CO2 emissions by more than 135 tons and waste generated by more than 10 tons . We use warehouse management systems to reduce waste from storage services, we develop projects for more efficient use of packaging from the perspective of recycling options and environmental protection measures. We apply systems to make warehouses' electricity consumption more efficient, using renewable energy and LED electrical installations.

AQUILA uses several inventory management systems, which allow their continuous evaluation and updating, including through environmental initiatives such as:

• Electrical cargo handling equipment with Li-Ion batteries;

• Goods preparation systems (picking): pick by light;

• Warehouse management software: WMS – LV Mantis. This software manages warehouse activity through Radio Frequency terminals and provides complete traceability (from the partners' factory to the end customer);

• Mobile shelving systems to optimize storage capacity in the frozen product warehouse;

• Optimization of storage spaces, by using VNA (very narrow aisle) systems that increase the storage capacity per square meter;

• Automation of the repackaging process and the use of semi-automatic pallet wrappers;

- The interfacing of internal systems - WMS (warehouse management system) - TMS (transport management system) - ERP (resource planning system), ensures an optimal flow of data.

As part of the logistics activity, AQUILA offers national transport services through a fleet of vehicles capable of transporting goods in different temperature conditions, among which:

• 112 heavy trucks (40 tons);

• 796 cars for the sales force;

• 625 vehicles for distribution and internal transport (with a capacity of less than 40 tons).

AQUILA uses the ORTEC system to optimize transport and streamline logistics operations. The ORTEC solution plans delivery routes and ensures the best use of fleet and personnel. In addition to these, the solution also provides an interface to the client, to track the status of deliveries and download documents related to the respective route (proof of delivery = POD). Another strong point of this system is the management portal of the loading and unloading slots related to each warehouse, so that the warehouse activity can be carried out in an optimal regime.

Transport activity is organized through a TMS (Transport Management System) and the team is qualified to use both its own TMS systems and partners' digital platforms.

The heavy-duty trucks are equipped with state-of-the-art telemetry systems, which allow constant monitoring of the equipment both on the move and while stationary. In addition, each vehicle benefits from a customized online operation tracking system, GPS tracking systems, and for high-risk transportation projects, AQUILA has installed monitoring and security systems on semi-trailers, including a panic push button, at the request of customers.

INTERNATIONAL TRANSPORT

AQUILA offers international transport services in more than 20 countries with a fleet of 112 heavy trucks capable of transporting goods in different temperature conditions.

In recent years, in its international transport activity, AQUILA has focused on secure transport, investing in complex road train monitoring solutions and systems, according to the requirements of important customers in this field, being authorized according to TAPA TSR standards (TAPA Requirements regarding the security of the transport of goods by truck), as well as according to the V1 security standard, a standard developed to ensure the protection of transported goods and to improve the safety of drivers and vehicles. This activity involves more than 40 trucks, a number that is aimed to be increased as this niche will require a higher volume of transport. Also, the international transport of goods that require controlled temperature is an important segment of activity that the management wants to develop in the coming years through long-term strategic partnerships.

The route planning and optimization activity is coordinated using a transport management system (TMS) and the monitoring activity is carried out using a telemetry system at the highest standards in terms of monitoring and reporting. The optimization of routes, the organization of the drivers' activity, as well as the record of driving times and truck numbers are managed by the team of dispatchers and driver activity coordinators through the communication platforms of the telemetry system. A dedicated department monitors fuel consumption using telemetry systems, planning platforms, fuel supplier platforms, internal procedures, etc. The fleet maintenance activity is ensured through contracts with external and internal partners, as well as through its own car repair workshop authorized by the Romanian Auto Registry to perform this type of service.

In 2022 the company paid particular attention to the environmental impact and aims to bring the fleet to the Euro 6 standard by 2026. At the end of 2022, 70% of the AQUILA fleet was equipped with Euro 6 engines.

CONSOLIDATED FINANCIAL RESULTS

The Group's consolidated financial statements have been entered in accordance with the International Financial Reporting Standards adopted by the European Union ('IFRS-EU'), in accordance with the requirements of the Order of the Ministry of Public Finance no. 2844/2016, with subsequent amendments for the approval of accounting regulations in accordance with standards International Financial Reporting adopted by the EU.

For the purpose of drawing up these consolidated financial statements, the functional currency of the Company is considered to be the Romanian leu (lei).

Loans to related parties and long-term claims from related parties

The Group has loans granted to related parties and long-term commercial claims from related parties which are classified as financial assets acquired or issued considering the impaired credit risk ('POCI').

Loans to related parties

(RON)	31-Dec-22	31-Dec-21
Novadex	12,645,536	15,121,550
AQUILA Agricola	6,660,195	7,157,250
Best Coffee Solutions	2,937,655	3,503,183
Nordexim	14,981,816	32,774,621
AQUILA Trade Solutions	-	239,481
Total	**37,225,202**	**58,796,085**
Short-term portion	3,591,648	6,672,011
Long-term portion	33,633,554	52,124,074

If a financial asset is acquired or issued impaired as a result of credit risk, at the reporting date, only cumulative changes in lifetime expected credit losses since initial recognition are recognized as loss adjustments. Future expected credit losses are valued using the effective interest rate.

In 2022, AQUILA recognized a loss of RON 14,808,372 from the additional depreciation for the loan granted to Nordexim.

Stocks and commercial debts

Inventories increased by 19% y/y to RON 158,430,373 from RON 133,654,414 due to the development of distribution activity and price increases and to partially counteract future inflationary effects.

Trade receivables increased by 25% year/year to RON 247,816,687 RON, mainly reflecting the increase in prices and commercial activity, in general, and, in particular, the increase in exposure on the HORECA and proximity channels (petrol stations and convenience stores) with relatively longer payment terms.

Net debt (cash)

On 31 December 2022 AQUILA reported a net cash position of RON 106,268,758. Due to long-term leasing increased by 175% compared to the previous year.

Net debt (RON)	**31-Dec-2022**	**31-Dec-2021**

** Expected credit losses in the amount of RON 19,782,564 include the impairment of trade receivables in the amount of RON 4,974,192 and the related impairment of loans to related parties in the amount of RON 14,808,372. From the total value of receivables depreciation, of RON 4,974,192, recognized during the financial year, the sum of RON 4,016,174 refers to the depreciation of Nordexim receivables.*

Net turnover

The company's revenues increased by 15%, up to RON 2,210 million, supported by the distribution segment, especially by the sales through the HoReCa channel and the proximity one (gas stations and proximity stores), as well as by its own brands. The company acquired in 2021, Trigor AVD, one of the first players on the fast – moving consumer goods distribution market in the Republic of Moldova, also achieved increasing results.

Gross profit

The company's gross margin improved by 1.6 percentage points to 21.3%, influenced by the mix of products sold and the focus on the best performing channels.

Fuel cost related to transport services

The cost of fuel related to transport services increased by 33% per year, considering the increase in the average price of diesel fuel in Romania. At the same time, the distances made have increased due to the expansion of the distribution activity.

Romania: Price of diesel (lei/liter) *

Intangible assets

Following the acquisition of AGRIROM S.R.L. by AQUILA PART PROD COM S.A., the Company recognized goodwill worth RON 5,011,706 and brands worth RON 2,698,926 (AGRIROM brands for food products: Gradena, Yachtis, LaMasa and Frisco).

On December 31, 2022 and December 31, 2021, the Company performed an impairment analysis of the goodwill, which was allocated to that cash-generating unit consisting of the distribution and trade of food, beverages and tobacco carried out by AGRIROM S.R.L.

Based on internal analysis, goodwill is not impaired at December 31, 2022 and December 31, 2021.

The recoverable amount of goodwill is determined based on the value in use determined according to budgeted cash flow projections covering a period of three years, a weighted average cost of capital (WACC) of 12.6% per annum and a rate of 2.5% increase.

Intangible assets

(RON)	Goodwill	Brands	Other intangible assets	Total

Investment property

Real estate investments include land and buildings of AQUILA PART PROD COM S.A. which are rented to third parties.
The Company performs internal evaluations to determine whether the fair value of investment properties differs significantly from the basket less accumulated impairment and any impairment losses whenever conditions could imply a significant change in values. The company performed an internal assessment and determined that the value did not change significantly in 2022 and 2021 and did not differ significantly compared to the book value.

KEY FACTORS THAT MAY AFFECT THE GROUP'S RESULTS

The results of the Group's operations have been and are expected to continue to be affected by several key factors.

Geopolitical conflict. The war in Ukraine continues to create increased geopolitical risks and we expect new challenges for global supply chains, which will have an impact on the economic situation. In the upcoming months, we anticipate the difficult conditions at the global level will persist, but at this stage, the leadership is not expecting that a possible future economic development will have a significant negative impact on the Group's operations and on the recoverable value of the Group's long-term assets.

The entity does not have a significant direct exposure to Ukraine, Russia, or Belarus.

The general economic situation in the markets. The Group's results may be directly affected by economic conditions, in particular the level of employment, inflation, disposable income, consumption levels, consumer confidence, applicable taxes, and the willingness of consumers to spend money in the markets and geographical areas in which the Group operates. In an unfavorable economic environment, with a decrease in disposable income, the Group's customers can reduce the frequency with which they purchase consumer goods or choose cheaper options. This risk remains high as inflationary pressure has continued (in the context of supply shocks) and the build-up of geopolitical tensions in Eastern Europe (the situation in Ukraine). A decrease in disposable income can affect customer traffic, the frequency, average value of the goods, as well as the Group's ability to pass on the increase in costs to its customers. The Group was not negatively impacted by the market evolution in 2022.

The industry in which the Group operates is characterized by increased competition. AQUILA operates in a competitive market and, according to estimates, competition will intensify in the coming years also due to the current market fragmentation. If it fails to compete successfully with other distributors, the Group could lose market share, so financial and operational results could be negatively impacted. Some of the Group's direct competitors may have more aggressive or efficient expansion plans, superior financial strength, or access to a wider range of products and services than those of the Group. The Group's ability to compete effectively in the markets in which it operates will largely depend on its ability to adapt to new market and industry trends. New players may also appear in the market for distribution and complementary logistics services for consumer goods, and it is possible that the new business models proposed by such entities will be preferred by customers, which would lead to a decrease in the Group's market share. In addition, the high level of competition increases the pressure on margins negotiated with the Group's partners, and the negative impact can be reflected in the Group's operating and financial results. The Group continuously analyzes the activity and operational margins, taking measures to improve them.

Consumers can change their consumption habits in an accelerated way. Changes in consumption habits can lead to a decrease in the Group's sales, which must identify quick solutions to replace the products in the portfolio in order to cover the new consumer requirements. Also, in addition to their consumption habits in terms of the types of products purchased, consumers could change their preference in terms of purchasing channels, for example, by preferring online channels to traditional ones. At the same time, consumers have become more attentive to the sustainability of the supply chain of the products purchased, with a particular focus on the measures taken by the entities in the chain to protect the environment. Some manufacturers provide consumers with detailed traceability information for products, including the amount of carbon dioxide and other substances harmful to the environment and public health generated from the manufacture and marketing of their products. Manufacturers could turn to distribution and logistics companies with a smaller carbon footprint to meet this consumer need. For example, the producers or suppliers with which the Group currently collaborates could turn to distributors who use rail transport, to the detriment of road transport, in the distribution activity. Thus, any change in consumer consumption habits or any consumer pressure on the sustainability of the supply chain could have a negative impact on the Group's operations and profit margins. The Group continuously analyzes the evolution of consumers' consumption habits, although no negative impact was recorded following the latest changes.

The Group's operations could be affected by adverse events specific to the distribution and marketing industry. The Group distributes and markets, among other things, third-party food products. On the production, supply and/or distribution chain, incidents may occur which are outside the Group's control which may lead to contamination or alteration of the products distributed or sold by the Group. Although the Group imposes through the contractual condition’s minimum quality requirements for the products received for distribution and/or sale, the risk of various incidents occurring in the chain cannot be excluded. Another type of incident that may occur on the supply chain is the failure to deliver the products on time or the delivery of the products in smaller quantities by the Group's suppliers, which may lead to non-compliance with orders from the Group's customers and the Group's exposure to contractual liability in relation to customers. Customer confidence in the quality and safety of the products sold by the Group is essential for the Group's activity and the implementation of the growth strategy. Although the Group maintains high standards of product quality and devotes substantial resources to ensuring that these standards are met, the occurrence of incidents such as those described above or other incidents (such as food spoilages as a result of interruptions in the supply of electricity to warehouses operated by the Group or during transport) could affect the health and safety of consumers of such products, if such incidents are not identified in time, the Group's reputation as a distributor/manufacturer of such products and could generate significant costs to remedy these problems.

The Group's operations depend to a large extent on the quality of the road infrastructure in Romania. The development of the road infrastructure in Romania is on the list of priority investments. However, due to problems arising mainly at the level of public administration, such as inefficiency, excessive formalism and, to some extent, corruption, Romania has difficulties in accessing the European funds available for the development of the road infrastructure or attracting other external investments in this sector. Through the National Recovery and Resilience Plan ("NRRP"), which is based on European funds to mitigate the effects of the COVID-19 pandemic on member states' economies, significant resources (about EUR 4.5 billion) are intended to be allocated to road infrastructure and motorways. Such large infrastructure projects have been planned over time, but have not been completed, generating excessive costs and, in some cases, degrading existing networks. The timely and safe transport of the products and goods distributed / marketed by the Group depends on the quality and extension of the road networks, and any impossibility or difficulty in their use, caused by maintenance works, poor quality of works or unsafe conditions, may have a significant negative impact on the implementation of the Group's strategy as well as on its day-to-day operations.

Changing the contractual terms with the current freight suppliers could generate profitability losses for the Group. The contracts signed with the suppliers of products impose strict requirements for the storage, handling and distribution of goods, such as: specific internal policies, control of the storage environment, protection of materials, the condition of the buildings where the storage is made, temperature and humidity levels, special requirements for the means of transport etc. Also, some types of goods (for example, food) should be stored separately from other categories (e.g. chemicals) both as legal requirements and as contractual obligations. Suppliers shall have the right to audit at least annually the compliance with the conditions laid down in the contracts and, if they detect irregularities, they may terminate the contracts, in some cases, with immediate effect, by written notification. Also, the contracts provide for the suppliers' termination rights with a notice period of between 30 days and 4 months, and the Group's obligation to notify the suppliers of the intention to terminate the contracts is associated with an average term of 6 months before the termination of the contracts. Given the specificities of the Group's activity, if the main suppliers terminate their contracts, AQUILA may not be able to identify similar services or products at reasonable costs during the notice period. Thus, the Issuer must find quick solutions to replace the products in the portfolio in order to retain its customers. For ongoing contracts, the Group may not be able to renegotiate the terms of the contract, such as the purchase price for products and/or the rent for the deposits operated, during certain periods when the Group's activity is significantly affected by events beyond the control of the Group (such as movement restrictions imposed during certain periods of the COVID-19 pandemic). In addition, where suppliers do not comply with the contractual conditions as regards the quantities contracted for, it may lead to unmanageable situations where stocks are insufficient, which will implicitly lead to delays in deliveries to final customers. Any change in the Group's relations with suppliers may result in losses for the Group, which would put pressure on the Group's profitability margins. The Entity had no impact in 2022 and no onerous ongoing contracts were identified and it was not necessary to record provisions in this regard.

The contracts signed with the suppliers of products and with the customers provide onerous obligations and limitations for the Group. Some contracts with product suppliers contain onerous obligations for the Group. such as: (a) the obligation to bear the costs related to the products planned and communicated to the supplier, but not purchased from the supplier (e.g. packaging costs, raw material, costs of destruction by the supplier); (b) the obligation to track and manage the packaging circuit in real time, as well as reporting, even if the management of the packaging is outsourced to third parties; (c) limitation of suppliers' liability for damage caused by the products distributed; (d) interference of suppliers in the organizational structure of the Group (superstructure controlled by the supplier with the role of coordinating, conducting and carrying out the product sales process, checking the suitability of the sales team, etc.); (e) a prohibition on producing, distributing, promoting, marketing products that could compete with or interfere with the products of contracted suppliers. On the other hand, suppliers have extensive contractual rights, such as: (a) interrupting the sale of some products or changing the recipe / manufacturing process of products. (b) the freedom to enter into similar or even better agreements with the Group's competitors. (c) unilateral changes in prices and quantities already contracted. (d) refusal to return the products distributed by the Group. (e) the request that the Group increase sales targets or expand the coverage area or increase the number of customers to whom the products are delivered. All this could generate significant additional costs for the Group. At the same time, suppliers can put pressure on costs, so the Group's operating margins could decrease. In addition, the Group has assumed in its contracts with some customers and suppliers' onerous obligations of compensation in case of non-compliance with certain obligations. such as infringements of competition law (such as participation in price-fixing cartels or unpermitted exchanges of commercial information). Thus, in addition to the potential sanctions that the regulatory and supervisory authorities may apply in the event of a breach, the Group could be obliged to pay customers, as compensation, up to 5% of the turnover generated by the marketing of the affected goods, in the case, for example, of infringements of the rules of competition law. The Group's fulfilment of obligations in the event of certain contract incidents or the discretionary exercise of rights by suppliers or customers could significantly increase the Costs of the Group, which would have a significant impact on the profit margin. The Entity had no impact in 2022 and no onerous ongoing contracts were identified and it was not necessary to record provisions in this regard.

Some suppliers may terminate distribution contracts early due to causes beyond the control of the Group. Some contracts concluded with major suppliers provide for termination clauses, the application of which results into immediate termination of the contract, without the intervention of a court and without other formalities, in cases such as (without being limited to) the (direct or indirect) entry into the Group's shareholding of a competitor of the respective suppliers or of the suppliers' affiliates or in case the Group enters into partnerships with such competitors or if there is any change in control over the Group. In cases of early termination for breach of obligations, including those listed above, the Group is under the obligation to pay damages. Considering the listing of AQUILA on the Bucharest Stock Exchange, the Group has no control over the transfer of shares on the secondary market and, therefore, it is not able to track if the condition mentioned above regarding shareholding structure is observed. Thus, there is the risk that the respective suppliers may terminate the distribution contracts with immediate effect in case competitors become shareholders of the Group, which may have an adverse impact on the Group's operations and may generate significant additional costs and in 2022 we had no impact in this type of event.

Identifying new utility and service providers or changing the contractual terms with current providers could generate additional costs for the Group. Service contracts with the main service providers are concluded either for long periods of up to 7 years (e.g.. contracts for the rental of premises), or for periods of one year (e.g. contracts on the transfer of responsibilities for waste). Some contracts concluded for long periods may be terminated by any party by written notice, with a period of notice of 90 days. In the event of termination of contracts for the purpose of renting premises, even if the Group manages to identify new locations with reasonable rents, they may require additional investment in order to comply with the conditions necessary to obtain all the permits and authorizations necessary to carry out the operations in those locations and/or the special conditions imposed by the suppliers for the storage of the products in those locations. There is no guarantee that the Group members will be able to obtain all the authorizations and approvals necessary to carry out the activity in the new locations or that these locations will comply with the requirements imposed by the suppliers, without significant investment from the Group. Also, for ongoing contracts, the Group may fail to renegotiate contractual terms, such as rent. for certain periods in which the Group's activity is significantly affected by events beyond the Group's control (such as movement restrictions imposed during certain periods of the COVID-19 pandemic). In addition, any change, in the sense of increasing the costs of the distribution and logistics activity, will have a negative impact on the operational and financial results of the Group. For example, an increase in the cost of electricity will have a significant impact on margins obtained from the logistics of frozen products. On the other hand, the Group's logistics activity may be significantly affected by a potential increase in transport costs in the event of an increase in the price of fuel, thus leading to a decrease in margins on this segment of activity. Therefore, certain changes in the relationship with the main providers of utilities and services could generate a significant negative impact on costs and therefore on the Group's profit margins. The group monitors the situation and the subsequent evolution.

There is a risk that AQUILA will not be able to attract or retain sufficient qualified personnel.
The Group's ability to hire, prepare and retain the necessary staff, capable of providing satisfactory service is an important part of the success of AQUILA's operations. The group may face problems related to attracting new staff due to the shortage of personnel on the local labor market. In addition, wage costs could increase because of the increase in minimum and average wages at national level or potential fiscal changes, as well as a result of salary changes in the budgetary system, which would put pressure on wage growth in the private system. Even if the Group had the capacity to recruit new staff, there is a possibility that the retention rate of staff will be low, even if they will be invested in their training and qualification. Management expects the demand and, as a result, skilled labor costs to continue to rise, reflecting significant demand from other industries and public infrastructure projects. It is possible that such cost increases cannot be passed on to customers by increasing the prices of the products distributed by the Group. Also, if there is no manpower available to cover the Group's needs, AQUILA may have to allocate a significantly higher budget for investments in machinery to automate the activity. Any obstacles to attracting and retaining staff at an optimal cost level could lead to inefficient operation of the activity, which could affect the Profitability of the Group. The Group is continuously concerned with improving work processes and automations to counter the workforce impact.

The chain stores where the Group sells the products could continue the pressure to keep prices low. The competitive market of the large chain stores in which the products from the Group's portfolio are distributed can put additional pressure on the prices charged. Thus, retailers can try to get better prices for products sold at the expense of the Group, affecting its margins. In addition, the period of notice for the termination of the contracts between the Group and the clients is relatively short, respectively 30-60 days. If some major customers terminate their existing contracts with the Group, AQUILA may not be able to identify, during the notice period, customers who need a similar quantity of products at the prices negotiated with customers whose contracts have been terminated, which would lead to a decrease in sales and automatically to a decrease in the Group's margins. Also, as the Organized Retail distribution channel gains weight over the Traditional Retail channel, store chains will have more bargaining power and will continue to put pressure on the Group's margins. The Group's management considers that this aspect does not generate a significant impact on the financial performance of the Group and on the continuity of the activity.

The Group is dependent on the IT systems and platforms necessary for carrying out the activity. The group depends on IT systems and platforms which are critical to the conduct of operations, in particular for the planning and monitoring of operations, programming, quality control, recording of orders and for the keeping of accounts. Any interruption in the Group's computer systems may lead to difficulties in carrying out the work daily. In addition, in recent years, the Group has gone through a series of acquisitions and mergers with companies using different its systems and platforms. The integration of IT systems requires an in-depth analysis of all flows of operations and information to coordinate and identify solution providers who understand those flows and can implement them in a new integrated system. Currently, the Group is analyzing the possibility of making an investment in a new, performant ERP (Enterprise Resource Planning) resource planning system, adapted to the current needs of the Group and flexible enough to allow the integration of new functions and solutions, as the Group's development strategies are put into practice. The implementation of a new ERP system at the Group level will generate significant costs and it is possible that the testing and adoption of this new system, after configuration, will be long-lasting or generate errors that will affect the Group's operations. Also, the new ERP system will have to be flexible and modular enough to allow the integration of other information systems of the companies that the Group will acquire in the future. Thus, in addition to the impact on costs, the evolution of the IT systems and platforms used by the Group could also have an positive impact on the Group's growth and development strategy.

The Group's IT systems and infrastructure may be subject to security breaches and other cybersecurity incidents. The Group may face attempts from third parties to access the Group's IT systems without authorisation, steal relevant information and improperly use it. Another possible outcome of a breach would be temporary interruption of the Group's operation, if such systems are corrupted. Most information stored in such systems are confidential data regarding partners, suppliers, clients, employees, the Group's financial positions and legal standing. As cyber-attacks continue to evolve and become more and more sophisticated, the Group may have to invest in additional resources to improve its protection measures against such attacks, to ensure integrity of the information regarding clients, suppliers and employees and to pre-empt the risk of a negative impact on the Group's reputation. In case it does not succeed to protect the integrity and security of the information regarding partners, suppliers, clients and employees, the Group may be exposed to the risk of litigation, of early of material contracts, which may lead to a decrease in revenues and generate additional significant costs for the Group. In 2022, the Group invested in changing IT policies and security infrastructure, by using cloud storage solutions.

The Group may have in its portfolio a series of slow-moving inventories The Group's product portfolio also includes own brands for which it is exposed to the risk that one or more of these products is no longer of interest for clients, thus making it necessary to decide to decrease the price in the attempt to sell such slow-moving inventories. Also, some of the Group's clients have contractual rights to return the products delivered by the Group at the latter's cost. Return of goods under these provisions may lead to increase in the inventories, whereas the contracts with suppliers do not provide for similar rights for the Group to return products that are not sold. Such incidents involving inventories may impact the Group's costs, which may lead to lower margins, and in certain cases such products may be sold at a loss, which may have an adverse impact on the Group's financial results. The returns recorded in 2022 were not significant for the Group.

The dismissal of the claim filed against the tax authority in Hungary may lead to significant fines being imposed AQUILA is plaintiff in a litigation case taken over following the merger by absorption with Agrirom against the Hungarian tax authority (National Tax and Customs Authority, Re-examination Directorate). Starting 2012, Agrirom was registered for VAT purposes in Hungary and, following an inspection performed by the competent tax authority, the right to deduct VAT in the amount of HUF 286,211,000 was rejected. The litigation is mainly related to VAT recovery, and, in case the Hungarian court dismisses the claim, AQUILA will have to pay a fine of HUF 156,004,000 (approximately EUR 434,000), the amount being fully provisioned.

Public authorities may requalify the per diems granted to drivers. According to Law no. 16/2017 on the posting of employees providing transnational services, transposing in national legislation the European directives 96/71/EC and 2014/67/EC, labour inspection excludes truck drivers on international routes from the applicability of the provisions of art. 43 of Labour Code on the temporary exercise by the employee, on the employer's direction, of works or tasks corresponding to professional duties outside the place of business. Public authorities with control powers in this area, namely the Labour Inspectorate and the National Agency for Tax Administration, may requalify the per diems granted to drivers performing international transports. The National Agency for Tax Administration may re-calculate, for a period of five years in advance (tax limitation period), in respect of those amounts, all duties and taxes and the related penalties. The taxation decision that the National Agency for Tax Administration is entitled to issue is an enforceable title and may be suspended by courts only within extraordinary proceedings accessible if material errors made by tax authority in the administrative-tax documents are proven. The consequence of restating the amounts paid as per diem may have an adverse impact on the Group's operating results and financial condition.

The Group considers that it has complied with the fiscal legislation in force and that it is not necessary to register a provision for fiscal risks in connection with this aspect. In terms of fuel cost inflation, the Group has taken the following measures to mitigate this impact by:

- triggering indexation clauses related to the cost of fuel in contracts with customers;
- renegotiation of contracts where possible;
- triggering the indexation of list prices related to the cost of distributed products;
- route optimization and consolidation of commands using TMS software.

Audit expenditure

The contractual costs for audit services with the financial auditor for the financial year ended On December 31, 2022, are in the amount of EUR 133,000.

All fees paid refer to audit services on separate and consolidated financial statements prepared in accordance with the International Financial Reporting Standards adopted by the European Union.

The estimated audit reports for the audit services for the financial year 2023 are in the amount of EUR 145,000.

RISK MANAGEMENT OF FINANCIAL INSTRUMENTS

The Group's principal financial liabilities comprise loans and borrowings, finance leases and trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations. The Group's financial assets are represented by loans, trade and other receivables, and cash and short-term deposits that derive directly from its operations.

The Group is exposed to interest rate risk, foreign exchange rate risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Group's senior management ensures the Group's financial risk activities are performed under appropriate procedures and that financial risks are identified, measured, and managed in accordance with Group's risk appetite.

Interest rate risk

The Group is exposed to interest rate risk mainly in relation to loans and borrowings bearing variable interest rate. The Group's income and operating cash flows are substantially independent of changes in market interest rates. Trade and other receivables and payables are non-interest-bearing financial assets and liabilities. The Group does not account for any fixed-rate financial assets or financial liabilities at FVTPL, and the Group does not use derivatives. Therefore, a change in interest rates at the reporting date would not affect profit or loss. The Group does not hedge its interest rate risk which is low. Management policy is to resort mainly to variable rate financing. However, at the time of rising new loans or borrowings management uses its judgment to decide whether it believes that fixed or variable rate would be more favorable to the Group over the expected period until maturity.

Currency risk

The Group is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated and the functional currency of the Group companies. The functional currency of all Group entities is the Romanian Leu (RON). The currency in which these transactions are primarily denominated is the functional currency. Certain liabilities are denominated in foreign currency (EUR). The Group also has deposits and bank accounts denominated in foreign currency (EUR and USD). The Group's policy is to use the local currency in its transactions as far as practically possible. The Group does not use derivative or hedging instruments.

Credit risk

The Group is subject to commercial credit risk, which may deepen in case the clients' financial condition deteriorates. The Group is subject to commercial credit risk, which may deepen in case the clients' financial condition deteriorates. The Group has a large portfolio of clients, and it is likely that one or more clients does/do not succeed to pay their invoices in time or at all, hence the Group is exposed to a risk of failure to collect or of late collection of receivables. The group measures the loss allowance for trade receivables regarding exposure from third parties at an amount equal to lifetime expected credit loss, thus applying the simplified approach method under IFRS 9. The expected credit losses on trade receivables are estimated using a provisions matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. During economic recessions, it is much more likely that some of the Group's clients may face financial distress, including inability to obtain financing through loans or by issuing equity securities, which may reduce the purchasing power for the products distributed by the Group or may cause delays in collecting the Group trade receivables. In case of financial distress or bankruptcy of a major client, the Group may register significant losses in relation to the trade receivables associated with that client.

The solvency of the Group's affiliates and transfer prices practices may impact on their capacity to repay the loans granted by the Group. The Group's exposure to the risk of non-repayment of loans granted to affiliates is mainly influenced by the particular nature of each affiliate. Nevertheless, the management also considers the factors that may influence the general risk of defaulting on the loans. According to the relevant tax legislation in Romania, the tax treatment of a transaction with affiliates is based on the concept of market price of the respective transaction. Based on this concept, transfer prices should be adjusted to reflect the market prices that would be set between parties that are not affiliates and that act independently based on the "full competition" principle. It is likely that tax audits to check transfer prices may be carried out in the future by tax authorities to decide if these prices observe the "full competition" principle and if the tax basis of the taxpayer is not distorted. Tax authorities may adjust the amounts received, interest income and expenses of companies that conclude intra-group commercial and financing transactions, if they consider that the Group cannot justify in all cases the prices charged between affiliates, which would trigger the appropriate adjustments for the Group companies and, eventually, may lead to payment of interest and late penalties.

Liquidity risk

The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group aims to maintain the level of its cash and cash equivalents at an amount in excess of expected cash outflows on financial liabilities. The Group also monitors the level of expected cash inflows on trade receivables together with expected cash outflows on trade and other payables. In addition, the Group maintains credit facilities for financing of the operating expenses.

Capital management

Capital of the Group includes the equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

Capital of the Company's includes the equity attributable to the Company's shareholders. The Group may monitor capital using a gearing ratio, which is net debt divided by total capital. The Group does not have a target gearing ratio, as the overall gearing is low (negative).

INTERNAL CONTROL

AQUILA has implemented an internal control system, which includes activities implemented in order to prevent or detect undesirable events and risks such as fraud, errors, damages, noncompliance, unauthorized transactions, and misstatements in financial reporting. The existence of a control environment forms the basis for an effective internal control system. It consists of the definition and adherence to group-wide values and principles (e.g., business ethics) and of organizational measures (e.g., clear assignment of responsibility and authority, commitment to competence, signature rules and segregation of duties). AQUILA's internal control system covers all areas of the Group's operations with the following main goals:

- Compliance with the applicable laws and internal regulations;
- Reliability of financial reporting (accuracy, completeness and correctness of the information);
- Prevention and detection of fraud and error;

- Protection of the Group's resources against losses due to waste;
- Effective and efficient business operations.

In order to achieve these goals, the management of the Group follows, inter alia, the below principles and approaches:

- Ensures a commitment to integrity and ethical values by demonstrating through the Board of Directors' and management's directives, actions and behaviour the importance of integrity and ethical values to support the functioning of the system of internal control;
- The Board of Directors demonstrates independence from management and exercises oversight for the development and performance of internal control;
- Establishes, with Board of Directors oversight, structures, reporting lines, and appropriate authorities and responsibilities in the pursuit of the objectives by maintaining job descriptions, defining roles and reporting lines, defining the role of internal audit;
- Ensures and demonstrates a commitment to attract, develop and retain competent individuals in alignment with the objectives of the Group by establishing required knowledge, skills and expertise, selecting appropriate outsourced service providers when needed, evaluating competence and behaviour, evaluating the capacity of finance personnel;
- Holds individuals accountable for their responsibilities in the pursuit of the objectives of the Group by developing balanced performance measures, incentives and rewards and linking compensation and other rewards to performance;
- Specifies objectives with clarity to enable the identification and assessment of risks related to objectives by identifying financial statement accounts, disclosures and assertions, reviewing and updating understanding of applicable standards, considering the range of Group's activities;
- Identifies risks to the achievement of the Group's objectives and analyses risks as a basis for determining how the risks should be managed;
- Considers the potential for fraud in assessing risks to the achievement of objectives by considering fraud risk in the internal audit plan;
- Identifies and assesses changes that could significantly impact the system of internal control by assessing change in the external environment, CEO and senior executive changes;
- Selects and develops control activities that contribute to the mitigation of risks to the achievement of objectives at acceptable levels by considering processes, risks and controls in the internal audit plan, identifying incompatible functions, considering alternative control activities to the segregation of duties;
- Selects and develops general control activities over technology to support the achievement of objectives by the means of recently implemented ERP, administering security and access, configuring IT to support the complete, accurate and valid processing of transactions and data;

- Develops control activities through policies and procedures that establish what is expected by developing and documenting policies and procedures;
- Obtains and uses relevant, quality information to support the functioning of internal control.

Policies and practices that represent the Group's competence standards for financial reporting positions are used as a basis for human resources and employee compliance activities, which include:

- Selecting and interviewing candidates;
- Performing background/reference checks;
- Setting certification expectations.

Senior management evaluates the capacity of personnel who are involved in recording and reporting financial information, and in designing and developing financial reporting systems including underlying IT systems. Senior management assesses the department's ability to identify issues and stay abreast of technical financial reporting developments. Considerations when assessing the adequacy of staffing levels and competence of financial reporting personnel include the extent of technical skills and nature required and the number of personnel dedicated to financial reporting.

The Board of Directors including the Audit Committee (the "Board") oversees management's performance of internal control and retain objectivity in relation to management. The board monitors the functioning of internal controls by performing periodical analysis on the profit and loss accounts, execution of the budget, internal and external audit reports. The Board demonstrates an appropriate level of doubt of management's assertions and judgments that affect financial reporting. In particular, the Audit Committee seeks clarification and justification of the Group's process for:

- Selecting and implementing accounting policies;
- Determining critical accounting estimates;
- Making key assumptions used in the application of technical accounting and reporting matters;
- Evaluating other risks facing the Group, with the potential impact on financial reporting.

Deficiencies in the implementation or functioning of internal controls are noted in the internal audit reports and are presented to the management, with the purpose of issuing the corrective actions. The internal audit assessments include the evaluation of the internal control systems, and evaluation whether:

- Risks relating to the achievement of the Group's strategic objectives and also the risks related to day-to-day operations are appropriately identified and managed;
- The actions of the Group's directors, employees, and contractors are in compliance with the Group's policies, procedures, and applicable laws, regulations, and governance standards;
- The results of operations are consistent with established goals;

- Operations are being carried out efficiently;
- Established processes and systems enable compliance with the policies, procedures, laws, and regulations that could significantly impact the Group;
- Resources and assets are acquired economically, used efficiently, and protected adequately.

Internal control process is carried out by personnel at all levels.

SUSTAINABILITY AND SOCIAL RESPONSIBILITY

For AQUILA, environmental, social and governance (ESG) principles are a priority, translated into the Sustainability Strategy and reporting commitment in accordance with international reporting standards, as well as good capital market practices.

The Sustainability Strategy 2022-2026, with reference year 2021, was approved and published at the beginning of 2022. We have started the implementation of the strategy in the following directions:

- Environment and climate change
- Human capital and communities
- Ethics and governance

In terms of **the environment**, AQUILA has set itself the target of a 10% reduction in greenhouse gas emissions over the next 5 years, having as a reference the year 2021 / by 2026, by renewing the fleet, optimizing transport routes, streamlining logistics operations, defensive driving courses for drivers, as well as using alternative energy sources.

70% of the AQUILA fleet is already equipped with Euro 6 engines and the company has proposed to bring the fleet to Euro 6 standard by 2026. At the same time, AQUILA uses a sustainable logistics model made in collaboration with CHEP, for the reuse by renting pallets, thus saving 117 m3 of wood, saving over 110,000 trees from felling, reducing CO2 emissions by over 135 tons and the waste generated by over 10 tons. The company has also invested in green projects and 53% of the electricity consumed comes from renewable sources.

The Culture of the Group is based on the observance of a common value system, on the creation and maintenance of an environment in which employees are encouraged and supported to reach their full potential. One of the Group's most important resources is **its employees**.

We are one of the largest employers in the country, with about 3,000 employees, of which 39% are women and with a skills-based internal promotion policy. The employees, according to regular schedules, are involved in continuous development programs and are enrolled in professional training courses appropriate to the position occupied within the Group. At the same time, the company established the key positions for which it implemented the succession plans, identifying a number of 65 employees as having the potential to enter the list of successors for top management and who will benefit from career plans.

AQUILA's corporate culture also promotes integrity, good corporate governance and higher ethical standards based on transparency and fairness. The Board of Directors consists of 5 members, of which 3 independent, non-executive (60%). The members of the Board of Directors are appointed for a term of office of 4 years, with the possibility of re-election for subsequent mandates of 4 years, except for the first members of the Board of Directors, whose term of office is of 2 years. The company has concluded professional indemnity insurance contracts for each member of the Board of Directors. AQUILA has developed and published a number of policies in the area of governance, such as remuneration and dividends.

CORPORATE GOVERNANCE

CORPORATE GOVERNANCE STATEMENT

THE PROVISIONS OF THE BUCHAREST STOCK EXCHANGE'S CORPORATE GOVERNANCE CODE [1]	ACCORDING TO	NON-COMPLIANT	OBSERVATIONS
Section A - Responsibilities			
A.1. All companies must have an internal regulation of the Board of Directors (the "Board"), which includes the terms of reference/responsibilities of the Board and the key management functions of the Company, and which apply, among other things, the General Principles in this Section.	x		AQUILA is administered in a unitary system by a Board of Directors, which has delegated the management of the Company's current activity to the CEO and executive directors. The structure and principles of corporate governance of the Company, as well as the powers and responsibilities of the AGA, the Board of Directors and the CEO, respectively, the Executive Directors are described in the Company's Articles of Incorporation, the AGA Rules and Procedures, the Internal Rules of Operation of the Board of Directors, as well as in other relevant documents.
A.2. Provisions for the management of conflicts of interest should be included in the Council Regulation. In any case, the members of the Council must notify the Council of any conflicts of interest that have arisen or may arise and refrain from participating in the discussions (including by not appearing, unless failure to appear would prevent the quorum from forming) and from voting for a decision on the matter giving rise to that conflict of interest.	x		The members of the Board have, according to the law, duties of diligence and loyalty to the Company, provided not only in the Articles of Incorporation of the Company, but also in other internal regulations of the Company. The Company has also implemented internal regulations on how to address conflict of interest situations.
A.3. The Board must consist of at least 5 (five) members.	x		After listing the Company on the BVB, AQUILA's Board of Directors was extended from 3 (three) to 5 (five) members appointed by the Ordinary General Meeting of Shareholders (OGMS) on February 23, 2022 in accordance with the provisions of the Companies Act and the Constitutive Act of the Company.
A.4. A majority of the members of the Board shall not have to hold executive functions. In the case of premium category companies, no less than two non-executive members of the Board must be independent.	x		As a result of the OGMS of 23 February 2022, at least two members of the Board met all the independence criteria provided by the Corporate Governance Code.

[1] *The statement summarizes the principles of the Corporate Governance Code; the full version of the Code can be read on the Bucharest Stock Exchange website: www.bvb.ro.*

Each independent member of the Council shall submit a statement at the time of his nomination for election or re-election and when any change in his State occurs, indicating the elements on the basis of which he is deemed to be independent in terms of his character and judgment.	x		At the time of this report, 3 (three) members of the Council are independent.
A.5. Other relatively permanent professional commitments and obligations of a member of the Board, including executive and non-executive positions on the Board of companies and non-profit institutions, must be disclosed to shareholders and potential investors before the nomination and during his or her term of office.	x		Information regarding the permanent professional commitments and obligations of board members, including executive and non-executive positions in companies and non-profit institutions, can be found in the CVs of the Board members, available at the Company's headquarters, on the Company's website and in the Prospectus, also available on the Company's website.
A.6. Any member of the Board shall submit to the Board information on any relationship with a shareholder who holds, directly or indirectly, shares representing more than 5% of all voting rights.	x		The members of the Board and the executive directors have, according to the law, duties of diligence and loyalty to the Company, provided not only in the Articles of Incorporation of the Company, but also in its other internal regulations. The Company has also implemented internal regulations on how to address situations of conflicts of interest.
A.7. The company must appoint a Secretary of the Board responsible for supporting the work of the Council.	x		The company has a Secretary-General who supports the activities of the Council.
A.8. The corporate governance statement will inform whether an assessment of the Board under the direction of the President or the Nomination Committee has taken place and, if necessary, will summarize the key measures and the resulting changes. The company must have a policy/guide on the evaluation of the Board including the purpose, criteria and frequency of the evaluation process.		x	From the perspective of the Corporate Governance Code, the Company does not fully meet the compliance conditions, placing the Company in the "non-compliance" zone as AQUILA does not have a policy/guide on the Board's evaluation including the purpose, criteria and frequency of the evaluation process.
A.9. The corporate governance statement shall contain information on the number of meetings of the Board and committees during the last year, the participation of directors (in person and in absentia) and a report by the Board and committees on their activities.	x		The Directors of the Company will meet at least once a week, and the Board will meet whenever necessary, but at least once every three months. During 2022, 20 Board meetings were held.
A.10. The corporate governance statement shall contain information on the exact number of independent members of the Board.	x		The assessment of the independence of the members of the Board of Directors on the basis of the independence criteria set out in the Code of Corporate Governance (which are essentially similar to those provided by the Companies Act) showed that, as of February 2022, three (3)) board members have met all the independence criteria set out in the Corporate Governance Code.

A.11. The Board of Premium Category Companies must set up a nomination committee consisting of non-executive members, which will lead the procedure for the nomination of new board members and will make recommendations to the Council. A majority of the members of the Nomination Committee must be independent.	x		The members of the Board are appointed by the AOA on the basis of a transparent proposal procedure and by a majority of shareholders' votes, as stipulated in the Articles of Incorporation of the Company and by the applicable laws. Prior to the OGMS, the CVs of the candidates are available for consultation by the shareholders, and shareholders can supplement the list of candidates for the position of member of the Board. As of March 2022, the Company has a Nomination Committee, composed of 2 (two) members elected by the Board from among its members, one of the members of the Nomination Committee being elected President.
Section B - Risk management and internal control system			
B.1. The Board shall set up an audit committee, in which at least one member must be independent non-executive. A majority of the members, including the chairperson, must have demonstrated that they possess an appropriate qualification relevant to the committee's functions and responsibilities. At least one member of the audit committee shall have demonstrated adequate experience in auditing or accounting. In the case of Premium Category companies, the audit committee must consist of at least three members and the majority of the members of the audit committee must be independent.		x	The AQUILA Council established an Audit Committee, composed of some of its members. Therefore, the members of the Audit Committee are all non-executive. As of March 2022, the Audit Committee is composed of two members of the Board. The Audit Committee includes members with certifications corresponding to their functions and responsibilities in the Audit Committee From the perspective of the Corporate Governance Code, the Audit Committee does not fully meet the compliance requirements for Premium Category companies, which places the Company in the area of "partial compliance" as the Audit Committee is composed of 2 (two) members.
B.2. The chair of the audit committee shall be an independent non-executive member.	x		As of March 2022, the Chair of the Audit Committee is an independent non-executive member.
B.3. Within the framework of its responsibilities, the audit committee should carry out an annual evaluation of the internal control system.	x		The Terms of Reference of the Audit Committee detail the role and tasks of the Audit Committee, which consist mainly of: (i) the examination and review of the individual and consolidated annual financial statements and the proposal for the distribution of profits; (ii) analyzing and making recommendations on the appointment, reappointment or dismissal of the independent external financial auditor for its approval by the OGMS;
B.4. The evaluation shall take into account the effectiveness and scope of the internal audit function, the adequacy of the risk management and internal control reports submitted to the Council's audit committee, the timeliness and effectiveness with which the executive management addresses the deficiencies or weaknesses identified as a	x		

result of internal control and the submission of relevant reports to the Council.			(iii) carrying out an annual assessment of the internal control system, taking into account the effectiveness and purpose of the internal audit function, the adequacy of the risk management and internal control reports submitted to the Audit Committee, the timeliness and effectiveness with which the executive decision addresses deficiencies or weaknesses identified as a result of internal control, and the submission of relevant reports to the Council; (iv) assessing conflicts of interest in relation to the transactions of the Company and its subsidiaries with related parties; (v) assessing the effectiveness of the internal control system and the risk management system; (vi) monitoring the application of generally accepted legal and internal audit standards; (vii) regularly receiving a summary of the main findings of the audit reports, as well as other information on the activities of the Department of Internal Audit and the evaluation of the internal audit team's reports; (viii) reviewing and reviewing, prior to submitting them to the Council for approval, transactions with related parties that exceed or are expected to exceed 5% of the Net Assets of the Company in the preceding financial year, in accordance with the Related Party Transaction Policy.
B.5. The audit committee should assess conflicts of interest in relation to the transactions of the Company and its subsidiaries with related parties.	x		
B6. The audit committee should assess the effectiveness of the internal control system and the risk management system.	x		
B.7. The audit committee shall monitor the application of generally accepted legal standards and internal audit standards. The audit committee should receive and evaluate the reports of the internal audit team.	x		
B.8. Whenever the Code mentions reports or analyses initiated by the Audit Committee, these should be followed by regular (at least annual) or ad hoc reports, which must be subsequently submitted to the Council.	X		As of March 2022, the Audit Committee regularly sends reports to the Council on the specific issues assigned to it.
B.9. No shareholder may be given preferential treatment over other shareholders in connection with transactions and agreements concluded by the Company with their shareholders and affiliates.	X		The company applies equal treatment to all its shareholders. Transactions with related parties are treated objectively, according to the usual industry standards, applicable corporate laws and regulations.
B.10. The Board must adopt a policy to ensure that any transaction of the Company with any of the companies with which it has close relations, the amount of which is equal to or greater than 5% of the Net Assets of the Company (according to the latest financial report), is approved by the Board following a binding opinion of the Board's audit	X		The Company has adopted the key principles of reviewing, approving and publishing related party transactions as required by applicable regulations and company corporate documents, including the fact that the Company's related party transactions that exceed or are expected to exceed, individually or aggregated, an annual amount of 5% of the

committee and is correctly disclosed to shareholders and potential investors, to the extent that these transactions fall under the category of events subject to reporting requirements.			Company's net assets in the previous financial year, must be approved by the Council, based on the opinion of the Audit Committee, and will formalize in the near future the key principles mentioned in a Related Party Transaction Policy (at the date of this report, in the light of this element, the status is "partial compliance"). AQUILA periodically submits reports on transactions with related parties to the Financial Supervisory Authority and the Bucharest Stock Exchange. These reports shall be reviewed by the independent financial auditor in accordance with the relevant legislation in force.
B.11. Internal audits should be carried out by a structurally separate division (internal audit department) of the Company or by hiring an independent third entity.	X		Internal audits are carried out by a structurally separate division (internal audit department) within the Company.
B.12. In order to ensure that the main functions of the internal audit department are performed, it shall report functionally to the Council through the audit committee. For administrative purposes and within the framework of the management's obligations to monitor and reduce risks, he must report directly to the CEO.	X		The reporting lines are respected, the Audit Department having a reporting line to the General Manager and to the Board of Directors, through the Audit Committee.
Section C – Just reward and motivation			
C.1. The company must publish on its website the remuneration policy and include in the annual report a statement on the implementation of the remuneration policy during the annual period under review. Any essential change in the remuneration policy must be published in a timely manner on the Company's website.	X		The company has a remuneration policy in place.
Section D – Adding value through investor relations			
D.1. The company must organize an Investor Relations service – by indicating to the general public the responsible person/persons or the organizational unit. In addition to the information required by law, the Company must include on its website a section dedicated to Investor Relations, in Romanian and English, with all relevant information of interest to investors, including: • The main corporate regulations: articles of incorporation, procedures regarding the general meetings of shareholders;	X		All information specified in clause D1 is provided on the issuer's website, including the contact details of the person responsible for the Investor Relationship.

• Professional CVs of the members of the Company's governing bodies, other professional commitments of the members of the Board, including executive and non-executive positions on boards of directors of companies or non-profit institutions; • Current reports and periodical reports (quarterly, half-yearly and annual); • Information regarding general meetings of shareholders; • Information on corporate events; • Name and contact details of a person who will be able to provide relevant information upon request; • Company presentations (e.g. disclosures to investors, presentations on quarterly results, etc.), financial statements (quarterly, half-yearly, annual), audit reports and annual reports.			
D.2. The Company will have a policy regarding the annual distribution of dividends or other benefits to shareholders. The principles of the annual distribution policy to shareholders will be published on the Company's website.	X		The company has a policy regarding the annual distribution of dividends or other benefits to shareholders. The principles of the annual distribution policy to shareholders are published on the Company's website.
D.3. The Company will adopt a policy in relation to the forecasts, whether they are made public or not. The forecasts refer to quantified conclusions of some studies, which aim to establish the overall impact of a number of factors for a future period (so-called assumptions): by its nature, this projection has a high level of uncertainty, with actual results likely to differ significantly from the forecasts initially presented. The forecast policy will determine the frequency, the period considered and the content of the forecasts. If published, forecasts may be included only in annual, half-yearly or quarterly reports. The forecast policy will be published on the Company's website.		x	The company does not have a Forecast Policy, which is published on its website, in the section Investor Relations, subsection Corporate Governance. AQUILA aims to develop such a policy in the near future.
D.4. The rules of general meetings of shareholders must not limit the participation of shareholders in general meetings and the exercise of their rights. The changes to the rules will take effect, at the earliest, starting with the next meeting of shareholders.	X		Information on how to organize the AGA is mentioned in the Articles of Incorporation of the Company, as well as, in short, also in the Corporate Governance Report. Also, SPHERA publishes for each AGA detailed convocations, which describe in detail the procedure to be followed within each AGA. In this

			way, the Company ensures that the AGA is properly run and organized, and the rights of the shareholders are respected.
D.5. Independent financial auditors will be present at the general meeting of shareholders when their reports are presented at these meetings.	x		Independent financial auditors do not participate in the Ordinary General Shareholders' Meeting in which the individual and consolidated annual financial statements are subject to approval.
D.6. The Board should submit to the annual general meeting of shareholders a brief assessment of the internal controls and the significant risk management system, as well as opinions on issues that can be resolved at the general meeting.	x		Information on the internal controls and the significant risk management system is provided in the Annual Report.
D.7. Any specialist, consultant, expert or financial analyst may participate in the shareholders' meeting on the basis of a prior invitation from the President of the Board. Accredited journalists may also attend the general meeting of shareholders, unless the Chairman of the Board decides otherwise.	x		The AGA rules and procedures provide for the possibility that any accredited specialist, consultant, expert, financial analyst or journalist may participate in the AGA on the basis of a prior invitation from the President of the Council.
D.8. The quarterly and half-yearly financial reports shall include information in both Romanian and English on the key factors influencing changes in sales, operating profit, net profit and other relevant financial indicators, both quarter-on-quarter and year-on-year.	x		The quarterly and half-yearly financial reports shall include information in both Romanian and English on the key factors that cause changes in sales, operating profit, net profit and other relevant financial indicators, both quarter-on-quarter and year-on-year.
D.9. A company will hold at least two meetings/teleconferences with analysts and investors each year. The information presented on these occasions will be published in the investor relations section of the Company's website at the time of the meetings/teleconferences.	x		AQUILA organizes individual meetings and teleconferences with financial analysts, investors, brokers and other market specialists, in order to present the financial elements relevant to the investment decision. The presentations for investors were made available at the time of the telephone meetings/conferences and on the Company's website, in the section on Investor Relations.
D.10. If a company supports different forms of artistic and cultural expression, sports activities, educational or scientific activities and considers that their impact on the innovative character and competitiveness of the Company are part of its mission and development strategy, it will publish the policy regarding its activity in this field.	x		AQUILA carries out various activities on social and environmental responsibility. For more details, please also refer to the section of the Annual Report on Sustainability and Social Responsibility.

MANAGEMENT STATEMENT

According to the best information available we confirm that the individual and consolidated financial financial statements prepared for the financial year 2022 offer the real and accurate situation on the company's financial position on December 31st 2022, on the financial performance and cash-flow, according to financial and accounting standards applicable to date, and that the Annual Report for the period of January 1st 2022 to December 31st 2022 transmitted to the market operator, Bucharest Stock Exchange and to the Financial Supervisory Authority, presents accurate and complete information about the company.

1. REPORTING ENTITIES AND GENERAL INFORMATION

General information about the Group

These financial statements are the consolidated financial statements of the group formed by AQUILA PART PROD COM SA ("the Company" or "Aquila" or "the Parent") and its subsidiaries PRINTEX S.A. and TRIGOR AVD S.R.L. (together "the Aquila Group").

The Group's entities headquarters and activities are the following:

Entity	Headquarters	Registration	Activity
Aquila Part Prod Com SA	105A Malu Rosu Street, Ploiesti, Prahova County, Romania	Trade Register no: J29/2790/1994 Unique registration code: 6484554	Wholesale of consumer goods, Rendering of logistic services, Internal and external transport of goods
Printex SA	5 Poligonului Street, Ploiesti, Prahova County, Romania	Trade Register no: J29/107/1991 Unique registration code: 1348950	Rental and subleases of real estate
Trigor Avd S.R.L.	17 Otovasca Street, Chisinau, Chisinau County, Republica Moldova	Trade Register no: 1002600041675	Wholesale of consumer goods

Based on General Shareholders meeting from 8 June 2021, Aquila Part Prod Com SA increased the share capital with RON 16,975,040 through issue of 1,697,504 shares with a par value of RON 10. Issue of shares was performed against incorporation in full of the statutory share premium determined by the merger with Seca Distribution SRL (entity under common control). Additionally, the Company modified the par value of the shares from RON 10 to RON 0.15 through stock split, total number of shares issued by the Company after the stock split is 133,333,600.

In November 2021, Aquila Part Prod Com SA increased the share capital with RON 10,000,020 through issue of 66,666,800 shares with a par value of RON 0.15. The issued shares were used for the initial public offer where Aquila Part Prod Com SA received RON 355,157,710 (gross amount: RON 366,667,400, broker fee: RON 11,509,689).

Based on Extraordinary General Shareholders Resolution of Aquila Part Prod Com S.A. of 23 February 2022, the share capital increase is carried out to support the current activity of the Company; the share capital will be increased by an amount of RON 150,000,300, representing issuance premiums; the number of shares issued in the share capital increase is 1,000,002,000 new shares; each shareholder of the Company registered in the shareholders' registry on the record date will receive free of consideration a number of 5 newly issued shares for each share held on the record date. Weighted average number of ordinary shares was adjusted for the effect of premium issuance in February 2022 and therefore year 2021 is restated (Note 12).

As at 31 December 2022, the shareholders of the Company, are Mr. Vasile Constantin Catalin and Mr. Dociu Alin Adrian, each holding 33.3% in each company and a series of other shareholders which hold a combined stake of 33.4%.

Shareholder	Number of shares	Par value (RON)	Statutory Share capital (RON)
Mr. Vasile Constantin Catalin	400,000,800	0.15	60,000,120
Mr. Dociu Alin Adrian	400,000,800	0.15	60,000,120
Other shareholders	400,000,800	0.15	60,000,120
Total	**1,200,002,400**		**180,000,360**

1. REPORTING ENTITIES AND GENERAL INFORMATION (CONTINUED)

As at 31 December 2021, the shareholders of the Company, are Mr. Vasile Constantin Catalin and Mr. Dociu Alin Adrian, each holding 33.3% in each company and a series of other shareholders which hold a combined stake of 33.4%.

Shareholder	**Number of shares**	**Par value (RON)**	**Statutory Share capital (RON)**
Mr. Vasile Constantin Catalin	66,666,800	0.15	10,000,020
Mr. Dociu Alin Adrian	66,666,800	0.15	10,000,020
Other shareholders	66,666,800	0.15	10,000,020
Total	**200,000,400**		**30,000,060**

General information about the Group

Aquila's subsidiaries are the following:

Entity	**% shareholding as at 31 December 2022**	**% shareholding as at 31 December 2021**
PRINTEX S.A.	95.75%	95.75%
TRIGOR AVD S.R.L.	100%	100%

2. BASIS OF PREPARATION

The consolidated financial statements of the Group are prepared in accordance with the Order of the Minister of Public finance no. 2844/2016 for approval of the accounting regulations, in compliance with the International Financial Reporting Standards applicable to the companies whose real shares are accepted for transaction on a regulated market. These stipulations are compliant with the requirements of the International Financial Reporting Standards, as adopted by EUs.

Minister of Finance no. 2844/2016 with subsequent amendments, is in accordance with the International Financial Reporting Standards (IFRS) adopted by the European Union, with the exception of IAS 21 The effects of the variation of exchange rates regarding the functional currency, the provisions of IAS 20 Accounting for government subsidies regarding recognition of revenues from green certificates, with the exception of IFRS 15 Revenues from contracts with customers regarding revenues from connection fees of the distribution network. These exceptions do not affect the compliance of the financial statements of the Group and the Company with IFRS adopted by the EU.

The consolidated financial statements have been approved and authorized for issue by the Board of Directors on 28h of March 2023. The financial statements will be submitted for shareholders' approval in the meeting scheduled on 28th April 2023.

Details of the Group's accounting policies are included in Note 6.

Going concern basis of accounting

The consolidated financial statements have been prepared on a going concern basis, which assumes that the Group will be able to continue its operations in the foreseeable future.

As at 31 December 2022 the Group's financial position shows net current assets of RON 340 million, mainly as a result of short term deposits of RON 160 million related to IPO, the Group not having any utilised short-term borrowings at this date. Net current position as of 31 December 2021 was RON 328 million. The Group continues to trade profitably and generate positive cash flows and management has assessed that the Group is able to meet its obligations as they fall due.

As at 31 December 2022 and 31 December 2021, the Group's net assets amount to RON 484 million and RON 483 million, respectively.

2. BASIS OF PREPARATION (CONTINUED)

Going concern basis of accounting (continued)

For the years ending 31 December 2022 and 31 December 2021 the Group reported profits of RON 85 million and RON 71 million, with 6% above the budgeted level.

The group has distributed dividends in 2022 in amount of RON 84 million, while management believes that the current resources availability is sufficient to enable the Group to continue its operations and settle its obligations in the ordinary course of business without substantial disposal of assets, reversing its operations or similar actions.

Although the last year was characterized by a significant volatility and low margins for one of the segments, considering the massive investment trend of digitalization, combined with improved market conditions and portfolio increase, the Group has achieved and is aiming for future higher earnings and net profits.

The ongoing war in Ukraine and the related sanctions targeted against the Russian Federation have a continuous impact on the European economies and globally. The Group does not have any significant direct exposure to Ukraine, Russia or Belarus. However, the impact on the general economic situation may require timely revisions of certain assumptions and estimates.

Based on the facts described above and the plans for 2023, management has assessed that the going concern assumption adopted in the preparation of the consolidated financial statements to be appropriate.

3. FUNCTIONAL AND PRESENTATION CURRENCY

These consolidated financial statements are presented in Romanian Lei (RON), which is also the parent company's functional currency.

The functional currency of the subsidiary Printex S.A. is also Romanian Lei (RON) while the functional currency of the subsidiary Trigor Avd S.R.L. is Moldavian Lei (MDL).

All financial information is presented in RON, except when otherwise indicated.

4. USE OF JUDGEMENTS AND ESTIMATES

In preparing these consolidated financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities in the next financial year is included in the following notes:

- Note 6 (h) (iii) and 6 (i) (iii) – useful lives of property, plant and equipment and intangible assets;
- Notes 6 (m) (i), 16, 22, 28 (b) – measurement of ECL (expected credit losses) allowance for trade receivables, loans to related parties and long-term receivables from related parties;
- Notes 6 (q), 27 and 31 – recognition and measurement provisions and contingent liabilities: key assumptions about the likelihood and magnitude of an outflow of resources; and
- Notes 16, 24 – judgement in relation to off setting the accruals for the discounts granted with trade receivables and accruals of the discounts received with the trade payables.

4. USE OF JUDGEMENTS AND ESTIMATES (CONTINUED)

Measurement of fair values

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Assumptions and estimation uncertainties

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note 28 (a) – financial instruments;

5. BASIS OF MEASUREMENT

The consolidated financial statements are prepared on the cost basis – historical cost conversion.

6. SIGNIFICANT ACCOUNTING POLICIES

The Group has consistently applied the following accounting policies to all periods presented in these consolidated financial statements.

(a) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries as at 31 December 2022. AQUILA PART PROD COM SA and its subsidiaries PRINTEX SA and Trigor AVD SRL are accounted based on consolidation requirements under IFRS, as endorsed by the EU.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(i) Business combinations

Acquisitions on or after 1 January 2017

For business acquisitions on or after 1 January 2017, the Group accounts for business combinations using the acquisition method when control is transferred to the Group (see accounting policy 6 (a) (ii)). The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment (see accounting policy 6 (m) (ii)). Any gain on a bargain purchase is recognised in profit or loss immediately. The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in profit or loss.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured and settlement is accounted for within equity. Otherwise, other contingent consideration is remeasured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognised in profit or loss.

Acquisitions prior to 1 January 2017

As part of its transition to IFRS-EU accounting policies, the Group elected not to restate the business combinations that occurred prior to 1 January 2017. In respect of acquisitions prior to 1 January 2017, the Group did not recognise any goodwill under Aquila Group's previous accounting framework, Order of the Minister of Public Finance no. 1802/2014 in Romania.

(ii) Non-controlling interests (NCI)

The Group measures any non-controlling interests in a company at their proportionate share of the acquiree's identifiable net assets at the date of acquisition.

Changes in the shareholders' interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. Adjustments to non-controlling interests are based on a proportionate amount of the net assets of the respective company.

(iii) Loss of control

When the group loses control over a subsidiary included in the combination, the Group derecognises the assets and liabilities of the company, and any related NCI and other components of equity. Any resulting gain or loss is recognised in profit or loss, except for the amounts in relation to that company previously recognised in other comprehensive income, which are recognised on the same basis as would have been required if the Parent had directly disposed of the related assets or liabilities. Any interest retained in the company is measured at fair value when control is lost.

(iv) Transactions eliminated in the consolidation

Intra-group balances and transactions between all consolidated entities, and any unrealized income and expenses arising from intra-group transactions, are eliminated.

(b) Revenue from contracts with customers

Under this standard, revenue is recognized when or as the customer acquires control over the goods or services rendered, at the amount which reflects the price at which the Group is expected to be entitled to receive in exchange of those goods or services. Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties (such as VAT, excise or other taxes related to sale).

The following table provides information about the nature and timing of the satisfaction of performance obligations in contracts with customers and the related revenue recognition policies.

	Nature and satisfaction of contractual obligations	Revenue recognition policies
Sale of goods	The performance obligations are agreed based on purchase orders from the customers under framework contracts. Consequently, each additional good to be delivered based on purchase orders represent a distinct performance obligation. Customers obtain control of goods when the goods are delivered to and have been accepted at their premises. The performance obligation is satisfied at that point in time. Invoices are issued when the goods are dispatched from Group's warehouses. Considering that the deliveries are made within the same country and using the Group's distribution network, there is no significant time passed between the dispatch time and delivery. Payment terms vary from 15 to 90 days. Discounts are offered by the Group, which are included on the invoice issued. Additionally volume-based discounts are offered by the Group for certain brands of goods, the volumes based on which the discounts are determined and the percentages applied are established in the contracts with customers. As a result, for the performance obligations performed, the Group is remunerated with a variable considerations which includes accruals for discounts to be granted. The Group estimates the discounts to be granted based on the actual volume of sales and contractual provisions. Contracts with customers are concluded on one year basis. There are no significant advances or retained payments.	Revenue is recognized when the goods are delivered and have been accepted by customers at their premises (at a point in time). The Group recognizes revenues when the performance obligation is satisfied, which is the point at which control of the promised goods are transferred to its customers, in an amount that reflects the consideration the Group expects to be entitled to receive in exchange for those goods. For the majority of Aquila Group's customer arrangements, control transfers to customers at a point-in-time when goods have been delivered, as that is generally when legal title, physical possession and risks and rewards of goods transfers to the customer. The timing of satisfaction of the performance obligation is not subject to significant judgment. Aquila Group generates revenue primarily from the distribution and sale of products to its customers. Substantially all revenue is recognized at the point in time in which the product is delivered to the customer. The Group grants certain customers sales incentives, such as rebates or discounts, which are accounted for as variable consideration. The variable consideration is based on amounts known at the time the performance obligation is satisfied and, therefore, requires minimal judgment. Volume based discounts not granted to customers before year end are accrued for. Such volume discounts are measured as variable consideration and an estimate is included in the transaction price. Considering the legal basis for net settlement exists in the contracts, actual amounts are settled upon credit memo issuance, including accruals for the discounts granted. After completion of Aquila Group's performance obligations, the Group has an unconditional right to consideration as outlined in its contracts with customers. Aquila Group's customer receivables will generally be collected in less than 90 days in accordance with the underlying payment terms. Customer receivables, which are included in accounts receivable, less allowances in the consolidated balance sheet, are presented in the balance sheet line trade receivables. Aquila Group has no significant commissions paid that are directly attributable to obtaining a particular contract.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) Revenue from contracts with customers (continued)

	Nature and satisfaction of contractual obligations	Revenue recognition policies
Logistic services: warehouse services, handling, packaging	The performance obligation is the performance of services related to goods of customers for which the Group ensures distribution. The performance obligation is satisfied as the Group performs the logistic services on a continuous basis / over time. Invoices are issued monthly based on documents that attest the services performed by the Group during the respective month. Payment terms vary from 15 to 90 days. Contracts with customers are concluded on one year basis. There are no significant advances or retained payments.	Revenue is recognized over time, because the customer simultaneously receives and consumes the benefits provided by the performance of the Group as the services are performed. The services are recognized monthly once the service is performed.
Transport services	The performance obligation is the transportation of the goods of customers from warehouses to retailers. Each shipment of goods ordered by the customer represents a performance obligation. The performance obligation is satisfied when the transportation is complete. Invoices are issued monthly based on the supporting documents or transports completed during the month. Payment terms vary from 15 to 90 days. Contracts with customers are concluded on one year basis. There are no significant advances or retained payments	Revenue is recognized at a point in time when the transportation is complete.

(c) Finance income and finance costs

The Group's finance income and finance costs mainly include:

- interest income;
- interest expense; and
- foreign currency gain or loss on financial assets and financial liabilities.

Interest income and expense are recognised using the effective interest method. Please refer to the note 6(k) for the financial instruments policy.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(d) Foreign currency

(i) Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the exchange rate at the reporting date, as communicated by the National Bank of Romania and National Bank of Moldova. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated to the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are recognised in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are not translated.

(ii) Foreign operations

The assets and liabilities of foreign operation, including goodwill and fair value adjustments arising on acquisition, are translated into RON at the exchange rates at the reporting date.

The income and expenses of foreign operations are translated into RON at the exchange rates at the dates of the transactions.

Foreign currency differences are recognized in OCI (other comprehensive income) and accumulated in the translation reserve. When a foreign corporation is disposed of in its entirety or partially, such that control, significantly influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal.

(e) Employee benefits

(i) Short-term employee benefits

Short-term employee benefits are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(ii) Defined contribution plans

The Group, in the normal course of business, makes payments to the state-management pension schemes on behalf of its employees. All employees of the Group are members of the state pension plans.

The Group does not operate any other pension scheme or postretirement benefit plan and, consequently, has no obligation in respect of pensions. In addition, the Group has no obligation to provide further benefits to current and former employees. The Group does not have any defined benefit plans.

(f) Income tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or in other comprehensive income.

(i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to tax payable or receivable in respect of previous years.

It is measured using tax rates enacted or substantively enacted at the reporting date.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(f) Income tax (continued)

(ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;

- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and

- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met. Unrecognized deferred tax assets are reassessed recognized and disclosed (if any) at each reporting date and recognized to the extent that it has become probable that the future taxable profits will be available against which they can be used.

(g) Inventories

Inventories consist mainly of goods for resale and consumables.

The cost of inventories is calculated using the first-in, first-out cost formula. The cost of inventories includes all costs of purchase and other costs incurred in bringing the inventories to their present location and condition.

Inventories are measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale and no other significant non-incremental costs are estimated to be incurred. Inventory is transferred to the Cost of sales upon the fulfilment of the performance obligation and the revenue recognition.

(h) Property, plant and equipment

(i) Recognition and measurement

Property, plant and equipment are stated initially at cost, which includes purchase price and other costs directly attributable to acquisition and bringing the asset to the location and condition necessary for their intended use.

After initial recognition, all items of property, plant and equipment are measured at cost less any accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(h) Property, plant and equipment (continued)

(ii) Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

(iii) Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives and is recognised in profit or loss. Land is not depreciated.

The estimated useful lives of property, plant and equipment are as follows:

Category	Useful lives (years)
Buildings	20-40
Equipment	5-7
Office equipment	10-14

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(iv) Reclassification to investment property

When the use of a property changes from owner-occupied to investment property, the property is reclassified accordingly.

(i) Intangible assets and goodwill

(i) Recognition and measurement

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed).

Goodwill arising on the acquisition of subsidiaries is measured at cost less accumulated impairment losses.

Brands are recognised on business combinations or acquisitions.

Brands and other intangible assets that are acquired by the Group and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

(ii) Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(iii) Amortization

Amortization is calculated to write off the cost of intangible assets using the straight-line method over their estimated useful lives, and is recognised in profit or loss.

Brands are amortized over 5-6 years, according the management assessment of the period over which they are expected to generate cash inflows. The estimated useful lives of software are 3-5 years.

Amortization methods, useful lives are reviewed at each reporting date and adjusted if appropriate.

(j) Investment property

Investment property is initially measured at cost and subsequently at cost less any accumulated depreciation and any accumulated impairment losses. The cost model is justified by the fact that revenues generated from rental of the investment properties are a small fraction of the total revenues, as the group mainly generates revenue from activities like distribution, logistics and transportation. The Group is using linear depreciation method, buildings within investment property are amortised over 20-40 years. Land is not depreciated.

The Group performs internal valuations to determine if the fair values of investment properties are materially different versus the cost less accumulated depreciation and any impairment losses whenever conditions could imply a significant change in values.

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss.

Rental income from investment property is recognised as other income on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

(k) Financial instruments

(i) Recognition and initial measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss. The classification of financial assets at initial recognition depends on the financial asset’s contractual cash flow characteristics and the Group’s business model for managing them. In order for a financial asset to be classified and measured at amortised cost or fair value through OCI (other comprehensive income), it needs to give rise to cash flows that are ‘solely payments of principal and interest (SPPI)’ on the principal amount outstanding.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(ii) Classification and subsequent measurement

Financial assets

On initial recognition, the Group classifies a financial asset as measured at amortised cost or FVTPL (fair value through profit or loss) or FVTOCI (fair values through other comprehensive income).Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Financial instruments (continued)

Financial assets that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL), unless the Group uses the irrevocable classification to measure investments in equity instruments as fair value through other comprehensive income. Under the latter, the fair value changes are accumulated in the OCI and are never reclassified in Profit or Loss. Dividend income and foreign exchange differences are recognized in the profit or loss. These instruments are not subject to impairment. The election is available on an instrument by instrument basis and it's only available at initial recognition.

As at 31 December 2022 and 31 December 2021 the Group does not have any financial assets classified under any of these categories, all assets are measured at amortised cost.

(ii) Classification and subsequent measurement (continued)

Financial assets measured at amortized cost.

These assets are initially recognised at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest method. The credit-adjusted EIR is the interest rate that, at initial recognition, discounts the estimated future cash flows (including credit losses) to the amortised cost of the POCI financial asset. For financial assets that were credit–impaired on purchase or origination in subsequent reporting periods the credit–adjusted effective interest rate is also used subsequently to discount the ECLs. The amortised cost is reduced by impairment losses via loss allowance account. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss. Impairment of non-derivative financial assets are presented in note (m) below.

Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL.

A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. As at 31 December 2022 and 31 December 2021 the Group does not have any financial assets classified under this category.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss, all being classified at amortized cost

Financial liabilities of the Group include bank borrowings, bank overdrafts and trade payables. Financial liabilities, similar to financial assets, and are measured at amortised cost.

(l) Derecognition

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired

Or

• The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Financial instruments (continued)

The Group enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

When the Group exchanges with the existing counterparty one debt instrument into another one with the substantially different terms, such exchange is accounted for as an extinguishment of the original financial asset and the recognition of a new financial asset. Similarly, the Group accounts for substantial modification of terms of an existing asset or part of it as an extinguishment of the original financial asset and the recognition of a new financial asset.

Factors that the Group considers in assessing whether the terms are substantially different include:

- Change of the (main) borrower
- Change of the tenor resulting to more than 50% more of the original term
- Significant change of the structure of the interest rate, e.g., from zero rate to a fixed rate
- Change in the currency in which the financial asset is denominated

If the modification is not substantial, the difference between: (1) the carrying amount of the financial asset before the modification; and (2) the present value of the cash flows after modification is recognised in profit or loss as the modification gain or loss within other gains and losses.

Financial liabilities

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss. When the Group exchanges with the existing lender one debt instrument into another one with the substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Similarly, the Group accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective rate is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. If the modification is not substantial, the difference between: (1) the carrying amount of the liability before the modification; and (2) the present value of the cash flows after modification is recognised in profit or loss as the modification gain or loss within other gains and losses.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(l) Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity. The Group recognizes changes in share capital in accordance with the applicable legislation and after approval of the General Meeting of Shareholders and registration according to the applicable legal obligations.Until 31 December 2003 the economy of Romania was considered hyperinflationary. Consequently, share capital and legal reserves setup before 31 December 2003 were adjusted for the effects of hyperinflation until that date in accordance with IAS 29.

(m) Impairment

(i) Non-derivative financial assets

The Group recognizes a loss allowance for expected credit losses ("ECLs") on financial assets measured at amortised cost. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience as allowed by the simplified approach in IFRS 9. The ECL model includes forward looking information like: GDP (gross domestic product), CPI (customer price index) from National Statistics and Forecasting Commission the National Bank of Romania.

We define buckets and include details here and in Trade Receivables, Note 16 below:

- Not due
- Past due 1-30 days
- Past due 31-60 days
- Past due 61-90 days
- Past due more than 90 days

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 31 days past due. The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

Measurement of ECLs

IFRS 9 does not prescribe a single method to measure ECLs. The method used by the company to measure ECLs is based on a provision matrix considering historical loss rates. IFRS 9 allows entities to use practical expedients when estimating ECLs for trade receivables. The Group applied the practical expedient.

The provision matrix is based on an entity's historical default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. For the ECL provisioning matrix, please refer to not 16.

For trade receivables where different risk profile has been identified an individual assessment for estimating ECL has been done.

(m) Impairment (continued)

(i) Non-derivative financial assets (continued)

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

POCI assets

Purchased or Originated Credit Impaired financial assets (POCI) are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognized based on a credit-adjusted effective interest rate (EIR). The credit-adjusted EIR is the interest rate that, at initial recognition, discounts the estimated future cash flows (including credit losses) to the amortised cost of the POCI financial asset. The ECL allowance is only recognised or released to the extent that there is a subsequent change in the expected credit losses. The Group recognises the cumulative changes in lifetime ECL since initial recognition, based on a probability-weighting of multiple scenarios, discounted by the credit-adjusted EIR.

(ii) Non-financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs (Cash Generating Unit). Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(n) Dividends

Dividends are recognized as a deduction from equity in the period in which their distribution is approved and recognised as a liability to the extent it is unpaid at the reporting date. Dividends are disclosed in the notes to the financial statements when their distribution is proposed after the reporting date and before the date of the issuance of the financial statements.

(o) Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

(p) Contingent assets and liabilities

A contingent liability is:

a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group; or

b) a present obligation that arises from past events but is not recognized because:

   i. it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or

   ii. the amount of the obligation cannot be measured with sufficient reliability.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Contingent liabilities are not recognized in the Group's financial statements, but disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group.

A contingent asset is not recognized in the Group's financial statements but disclosed when an inflow of economic benefits is probable.

(q) Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group uses the definition of a lease in IFRS 16.

(i) As a lessee

At commencement or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Group has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

– fixed payments, including in-substance fixed payments;

– variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;

– amounts expected to be payable under a residual value guarantee; and

– the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The group is using publicly available information to estimate the Incremental Borrowing Rate, the rate used for discounting the future cashflows.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The Management considers most relevant the statistics information as published on the website of National Bank of Romania (BNR) in regard to medium to long term loans granted by Commercial Banks from Romania in the currency of the lease contracts. It is remeasured when there is a change in future lease payments arising from a change in a floating interest rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

As part of the remeasurement process, the Group revises the discount rate when the remeasurement is determined by a change of the lease term or a change in the assessment of an option to purchase the underlying asset or a change of lease payments due to changes in a floating interest rate. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The Group presents right-of-use assets that do not meet the definition of investment property in 'Property, plant and equipment' in the statement of financial position.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets (below RON 25,000 equivalent of EUR 5,000) and short-term leases, including IT equipment. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(ii) As a lessor

At inception or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative standalone prices.

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset. If an arrangement contains lease and non-lease compone.nts, then the Group applies IFRS 15 to allocate the consideration in the contract.

(r) Business combinations and legal mergers

Business combinations are accounted for using the acquisition method when control is transferred to the acquirer. The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment. Any gain on a bargain purchase is recognised in profit or loss immediately.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in profit or loss.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured and settlement is accounted for within equity. Otherwise, other contingent consideration is remeasured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognised in profit or loss.

In case of a legal merger following a business combination, where the parent is the surviving entity, the separate financial statements of the parent are a continuation of the Group consolidated financial statements. Hence, the values recognised in the consolidated financial statements become the cost of these assets for the parent. The acquired assets (including investments in subsidiaries, associates, or joint ventures held by the merged subsidiary) and assumed liabilities are recognised at the carrying amounts in the consolidated financial statements as of the date of the legal merger. This includes any associated goodwill, intangible assets, or other adjustments arising from measurement at fair value upon acquisition that were recognised when the subsidiary was originally acquired, less the subsequent related amortisation, depreciation, impairment losses, as applicable.

The difference between the amounts assigned to the assets and liabilities in the parent's separate financial statements after the legal merger and the carrying amount of the investment in the merged subsidiary before the legal merger is recognised directly in equity, through retained earnings.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(s) Related parties

A related party is a person or entity that is related to the Group that is preparing its financial statements (referred to as "reporting entity"):

(a) A person or close member of that person's family is related to the reporting if that person:

- i) has control or joint control over the reporting entity;
- ii) has significant influence over the reporting entity; or
- iii) is a member of the key management personnel of the reporting entity or of a parent of the reporting entity;

(b) An entity is related to a reporting entity if any of the following conditions apply:

- i) the entity and reporting entity are members of the same group (which means that each parent, subsidiary or fellow is related to the others);
- ii) one entity is an associate or joint venture of the other entity (or associate or joint venture of a member of the group of the other entity is a member);
- iii) both entities are joint ventures of the same third party;
- iv) one entity is a joint venture of a third party and the other entity is an associate of the third party;
- v) the entity is a post-employment defined benefit plan for the benefit of the employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity;
- vi) the entity is controlled or jointly controlled by a person identified in (a);
- vii) a person identified in (a) i) has significant influence over the entity or is member of the key management personnel of the entity (or of a parent of the entity);

b) the entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

(t) Subsequent events

Events occurring after the reporting date, which provide additional information about conditions prevailing at the reporting date (adjusting events) are reflected in the financial statements. Events occurring after the reporting date that provide information on events that occurred after the reporting date (non-adjusting events), when material, are disclosed in the notes to the financial statements. When the going concern assumption is no longer appropriate at or after the reporting period, the financial statements are not prepared on a going concern basis.

(u) Operating profit

Operating profit is the result generated from the continuing principal revenue-producing activities of the Group as well as other income and expenses related to operating activities. Operating profit excludes net finance costs and income taxes.

(v) Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities (see Note 4). When one is available, the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

If there is no quoted price in an active market, then the Group uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Group determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

(w) IPO Costs

The costs of an IPO that involves both issuing new shares and a stock market listing are accounted for as follows:

– Incremental costs that are directly attributable to issuing new shares are deducted from equity (net of any income tax benefit) in line with, IAS 32.37

– Costs that relate to the stock market listing, or are otherwise not incremental and directly attributable to issuing new shares, are recorded as an expense in the statement of comprehensive income

– Costs that relate to both share issuance and listing are allocated between those functions on a rational and consistent basis in line with IAS 32.38. In the absence of a more specific basis for apportionment, an allocation of common costs based on the proportion of new shares issued to the total number of (new and existing) shares represent an acceptable approach.

The Group has performed this analysis and has booked, in Equity, incremental costs directly attributable to issuing new shares, gross of tax, of RON 13,057,088 - amount included in share premium. The current income tax associated to these costs amounts to RON 2,089,134. From a tax perspective, these costs are entirely deductible the year they are incurred.

(x) Changes in presentation

The following changes in presentation are included in the current year's financial statements due to:

a. More accurate presentation in accordance with IFRS requirements, as well as being more relevant information about the balance sheet position and allowing comparability with industry peers.

b. Re-assessment of contractual legal rights and offsetting rules under IAS 32.

Change in statement of **financial position** presentation:

			Reported as of	**Change in presentation**	**Impact**
		Note	**31-Dec-2021**	**31-Dec-2021**	**2021 changed Vs previous reported**
I.	Other receivables	**17(a)**	30,014,026	4,216,994	(25,797,032)
I.	Prepayments	**17(b)**	7,420,986	33,218,018	25,797,032
					-
II.	Trade receivables	**16**	220,942,310	197,745,855	(23,196,455)
II.	Trade payables – current	**24**	219,230,427	196,033,972	(23,196,455)

7. STANDARDS ISSUED BUT NOT YET ADOPTED

The adoption of the financial reporting standards below in force at or after 1 January 2022 did not have a material impact on the Group's financial statements.

(i) Standards and Interpretations endorsed by the EU

The accounting policies adopted are consistent with those of the previous financial year except for the following IFRS amendments which have been adopted by the Group/Company as of 1 January 2022:

• IFRS 3 Business Combinations; IAS 16 Property, Plant and Equipment; IAS 37 Provisions, Contingent Liabilities and Contingent Assets as well as Annual Improvements 2018-2020 (Amendments).

The amendments are effective for annual periods beginning on or after 1 January 2022 with earlier application permitted. The IASB has issued narrow-scope amendments to the IFRS Standards as follows:

- IFRS 3 Business Combinations (Amendments) update a reference in IFRS 3 to the previous version of the IASB's Conceptual Framework for Financial Reporting to the current version issued in 2018 without significantly changing the accounting requirements for business combinations.
- IAS 16 Property, Plant and Equipment (Amendments) prohibit a company from deducting from the cost of property, plant and equipment any proceeds from the sale of items produced while bringing the asset to the location and condition necessary for it be capable of operating in the manner intended by management. Instead, a company recognizes such sales proceeds and related cost in profit or loss.
- IAS 37 Provisions, Contingent Liabilities and Contingent Assets (Amendments) specify which costs a company includes in determining the cost of fulfilling a contract for the purpose of assessing whether a contract is onerous. The amendments clarify, the costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to the contract activities.
- Annual Improvements 2018-2020 make minor amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IAS 41 Agriculture and the Illustrative Examples accompanying IFRS 16 Leases
- IFRS 16 Leases-Covid 19 Related Rent Concessions beyond 30 June 2021 (Amendment). The Amendment applies to annual reporting periods beginning on or after 1 April 2021, with earlier application permitted, including in financial statements not yet authorized for issue at the date the amendment is issued. In March 2021, the Board amended the conditions of the practical expedient in IFRS 16 that provides relief to lessees from applying the IFRS 16 guidance on lease modifications to rent concessions arising as a direct consequence of the covid-19 pandemic. Following the amendment, the practical expedient now applies to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022, provided the other conditions for applying the practical expedient are met.

(ii) Standards issued but not yet effective and not early adopted

The following standards, changes in standards and interpretations have been issued, but are not yet effective for the annual period beginning on 1 January 2022. The Group does not intend to adopt these standards before they become effective. The Group expects that the adoption of the financial reporting standards below in the future periods will not have a material impact on the Group's financial statements.

• IFRS 17: Insurance Contracts

The standard is effective for annual periods beginning on or after 1 January 2023 with earlier application permitted, provided the entity also applies IFRS 9 Financial Instruments on or before the date it first applies IFRS 17. This is a comprehensive new accounting standard for insurance contracts, covering recognition and measurement, presentation and disclosure. IFRS 17 applies to all types of insurance contracts issued, as well as to certain guarantees and financial instruments with discretional participation contracts.

7. STANDARDS ISSUED BUT NOT YET ADOPTED (CONTINUED)

IFRS 17, with the objective to provide an accounting model for insurance contracts that is more useful and consistent for insurers, establishes principles for the recognition, measurement, presentation and disclosure of all types of insurance contracts, as well as of certain guarantees and financial instruments with discretionary participation features. The accounting model is supplemented by a specific adaptation for contracts with direct participation features (the variable fee approach) and by a simplified approach (the premium allocation approach) mainly for short-duration contracts.

The main features of the new accounting model include the measurement of the present value of future cash flows, incorporating an explicit risk adjustment, remeasured every reporting period (the fulfilment cash flows). Also, the model includes a Contractual Service Margin (CSM) that is equal and opposite to any day one gain in the fulfilment cash flows of a group of contracts, representing the unearned profit of the insurance contracts to be recognised in profit or loss based on insurance contract services provided over the coverage period. Certain changes in the expected present value of future cash flows are adjusted against the CSM and thereby recognised in profit or loss over the remaining coverage period. Amounts that are paid to a policyholder in all circumstances, regardless of whether an insured event occurs (non-distinct investment components) are not presented in the income statement but are recognised directly on the statement of financial position.

Furthermore, the presentation of insurance revenue and insurance service expenses in the statement of comprehensive income will be based on the concept of services provided during the period. Insurance services results (earned revenue less incurred claims) are presented separately from the insurance finance income or expense. In the statement of financial position, the carrying amounts of portfolios of insurance contracts issued that are assets and those that are liabilities, with the same requirement applying to portfolios of reinsurance contracts held, are presented separately. Finally, IFRS 17 requires extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts.

Regarding the transition, the Board decided on a retrospective approach for estimating the CSM on the transition date. However, if full retrospective application, as defined by IAS 8, for a group of insurance contracts, is impracticable, an entity is required to choose either the modified retrospective approach or fair value approach. Both provide transitional reliefs.

Finally, in December 2021, the IASB issued amendments to IFRS 17 to add a transition option for a “classification overlay” to address possible accounting mismatches between financial assets and insurance contract liabilities in the comparative information presented on initial application of IFRS 17. An entity applying the classification overlay to a financial asset shall present comparative information as if the classification and measurement requirements of IFRS 9 had been applied to that financial asset.

- IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2: Disclosure of Accounting policies (Amendments)

The Amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. The amendments provide guidance on the application of materiality judgements to accounting policy disclosures. In particular, the amendments to IAS 1 replace the requirement to disclose ‘significant’ accounting policies with a requirement to disclose ‘material’ accounting policies. Also, guidance and illustrative examples are added in the Practice Statement to assist in the application of the materiality concept when making judgements about accounting policy disclosures.

- IAS 8 Accounting policies, Changes in Accounting Estimates and Errors: Definition of Accounting Estimates (Amendments)

The amendments become effective for annual reporting periods beginning on or after January 1, 2023 with earlier application permitted and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. The amendments introduce a new definition of accounting estimates, defined as monetary amounts in financial statements that are subject to measurement uncertainty, if they do not result from a correction of prior period error. Also, the amendments clarify what changes in accounting estimates are and how these differ from changes in accounting policies and corrections of errors.

7. STANDARDS ISSUED BUT NOT YET ADOPTED (CONTINUED)

- IAS 12 Income taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments)

The amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. The amendments narrow the scope of and provide further clarity on the initial recognition exception under IAS 12 and specify how companies should account for deferred tax related to assets and liabilities arising from a single transaction, such as leases and decommissioning obligations. The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement, having considered the applicable tax law, whether such deductions are attributable for tax purposes to the liability or to the related asset component. Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal.

- IAS 1 Presentation of Financial Statements: Classification of Liabilities as Current or Non-current (Amendments)

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with earlier application permitted, and will need to be applied retrospectively in accordance with IAS 8. The objective of the amendments is to clarify the principles in IAS 1 for the classification of liabilities as either current or non-current. The amendments clarify the meaning of a right to defer settlement, the requirement for this right to exist at the end of the reporting period, that management intent does not affect current or non-current classification, that options by the counterparty that could result in settlement by the transfer of the entity's own equity instruments do not affect current or non-current classification. Also, the amendments specify that only covenants with which an entity must comply on or before the reporting date will affect a liability's classification. Additional disclosures are also required for non-current liabilities arising from loan arrangements that are subject to covenants to be complied with within twelve months after the reporting period. The amendments have not yet been endorsed by the EU.

- IFRS 16 Leases: Lease Liability in a Sale and Leaseback (amendments)

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with earlier application permitted. The amendments are intended to improve the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction in IFRS 16, while it does not change the accounting for leases unrelated to sale and leaseback transactions. In particular, the seller-lessee determines 'lease payments' or 'revised lease payments' in such a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use it retains. Applying these requirements does not prevent the seller-lessee from recognising, in profit or loss, any gain or loss relating to the partial or full termination of a lease. A seller-lessee applies the amendment retrospectively in accordance with IAS 8 to sale and leaseback transactions entered into after the date of initial application, being the beginning of the annual reporting period in which an entity first applied IFRS 16. The amendments have not yet been endorsed by the EU.

- Amendment in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28, in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. In December 2015 the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting. The amendments have not yet been endorsed by the EU.

8. REVENUE

	31-Dec-22	31-Dec-21
Revenue	2,206,787,393	1,926,037,317
Rental income*	3,538,080	3,676,525
Total revenue	**2,210,325,473**	**1,929,713,842**

*Rental income includes rental of investment property lease in amount of RON 1,148,010 (Note 21).

Disaggregation of revenue from contracts with customers

Sponsorships	2,433,293	2,390,183
Trainings and other staff expenses	1,000,849	790,285
Travel	5,443,070	3,652,596
Waste disposal	1,181,092	1,107,364
Other operating expenses**	11,733,329	10,229,309
Total	**101,705,650**	**82,795,047**

*Current asset disposal expenses - amount relates to inventory write down and in 2022 the amount is presented in Cost of goods sold and is RON 4,777,839.

**Other operating expenses in amount of RON 11,733 thousand include various expenses in amount of RON 5,974 thousand such as low value lease expenses, services related to archiving and digitalisation of documents for archiving purposes, logistics services, extra medical expenses, environmental fees, etc.

11. NET FINANCE COSTS

	31-Dec-22	31-Dec-21
Interest income*	7,391,895	1,364,802
Other finance income	178,218	53,561
Total finance income	**7,570,113**	**1,418,363**
Interest expense	(2,773,151)	(5,791,617)
Net foreign exchange losses	(845,224)	(2,139,553)
Other financial expenses	(217,824)	(347,797)
Total finance costs	**(3,836,199)**	**(8,278,967)**
Net finance costs	**3,733,914**	**(6,860,604)**

*Interest income includes interest related to related parties loans receivables in amount of RON 1,477,695 and interest from bank deposits in amount of RON 5,914,200.

12. EARNINGS PER SHARE

The calculation of basic and diluted earnings per share has been based on the following profit attributable to ordinary shareholders and weighted-average number of ordinary shares outstanding:

Profit attributable to ordinary shareholders

	31-Dec-22	31-Dec-21
Profit attributable to the owners of the Group	85,222,554	70,741,987
Profit attributable to ordinary shareholders	**85,222,554**	**70,741,987**

Weighted-average number of ordinary shares (in number of shares)

	31-Dec-22	31-Dec-21 (Restated)
Issued ordinary shares at 1 January	200,000,400	302,500
Issues from 2021	-	199,697,900
Total issued ordinary shares	**200,000,400**	**200,000,400**
Issued ordinary shares at 23 Feb 2022	1,000,002,000	1,000,002,000
Weighted-average number of ordinary shares at 31 December	**1,198,922,400**	**1,137,976,167***

	31-Dec-22	31-Dec-21
Basic and diluted earnings per share (RON)	0.071	0.062*

**Weighted average number of ordinary shares adjusted for the effect of premium issuance in February 2022.*

13. EMPLOYEE BENEFITS

Employee benefits payables and accruals at year-end are as follows:

	31-Dec 2022	31-Dec 2021
Wages and salaries	19,255,040	17,718,157
Social security contributions	6,077,748	5,471,730
Tax on salaries	1,225,627	1,085,737
Total payables and accruals at year-end	**26,558,415**	**24,275,624**

In Romania, all employers and employees, as well as other persons, are contributors to the state social security systems. The social security system covers pensions, allocations for children, temporary inability to work, risks of works and professional diseases and other social assistance services, unemployment benefits and incentives for employers creating new workplaces.

Employee benefit expenses are as follows:

	2022	2021
Wages and salaries	190,341,934	166,550,344
Per diem	13,196,771	12,547,002
Social contributions and charges	7,006,411	7,607,643
Meal tickets	14,692,265	9,142,583
Total employees benefits for the year	**225,237,381**	**195,847,572**

Management remuneration is disclosed in Note 29.

14. INCOME TAXES

In determining the amount of current and deferred tax, the Group takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. The Group considers that the accounting records for taxes due are adequate for all open tax years, based on assessment made by management taking into account various factors, including the interpretation of tax legislation and previous experience. New information may become available that causes the Group to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

(i) Amounts recognised in profit or loss

	31-Dec-22	31-Dec-21
Current tax expense	15,944,835	10,358,723
Deferred tax income	(613,288)	(1,587,405)
Total income tax expense	**15,331,547**	**8,771,318**

14. INCOME TAXES (CONTINUED)

(ii) Reconciliation of effective tax rate

	2022		2021	
Profit before tax		100,563,571		79,537,072
Tax using Company's domestic tax rate	16%	16,090,171	16%	12,725,932

*Starting with 2022, the fair value adjustment of Property plant and equipment at first time adoption is presented net with Property plant and equipment and the Deferred tax asset/liability is net-off accordingly.

15. INVENTORIES

	31-Dec-22	31-Dec-21
Consumables	915,978	760,503
Goods for resale	159,232,781	134,103,933
Impairment loss	(1,718,386)	(1,210,022)
Total inventories	**158,430,373**	**133,654,414**

Cost of inventories recognized as an expense in the statement of profit or loss in 2022 is RON 1,623,973,263 (2021: RON 1,443,194,521). The inventory impairment allowance recognized during the year is presented below:

	31-Dec-22	31-Dec-21
Balance as at 1 January	**1,210,022**	**383,422**
Impairment allowance charge	2,808,586	826,600
Reclassification	290,866	
Release/consumption of allowance	(2,591,088)	-
Balance as at 31 December	**1,718,386**	**1,210,022**

16. TRADE RECEIVABLES

	Note	31-Dec-22	31-Dec-21
Trade receivables from third parties, gross		271,243,625	226,117,301
Trade receivables from related parties, gross	29	10,793,659	5,842,129
Discounts accrued granted to customers		(18,945,097)	*(23,196,455)
Loss allowance		(15,275,500)	(11,017,120)
Total trade receivables, net		**247,816,687**	**197,745,855**

The comparative figures as of 31 December 2021 were reclassified in accordance with the re-assessment of legal rights. The amount of (RON 18,945 thousand) as of 31 December 2022 is deducted from Trade receivables, while RON 23,196 thousand for Group, representing refund liabilities were reported as of 31 December 2021 under the category Trade payables and now, the amount of (RON 23,196 thousand) is included under Trade receivables, as reduction of Trade receivables. Please refer to Note 6 (x) Changes in presentation.

Short term trade receivables from related parties are presented in Note 29.

The Group's exposure to credit risk is influenced by the individual characteristics of each customer.

The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position

The following table details the risk profile of trade receivables based on the Group's provision matrix. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Group's different customer segments.

The ECL (expected credit loss) model includes forward looking impact. For the period ended 31 December 2022, after incorporating the results of the forward-looking factors, no further impairment was necessary to be added to the ECL model.

	31 December 2021			
	Weighted average ECL rate	**Gross value**	**Bad debt loss allowance**	**Net trade receivables**
Neither past due nor impaired	1.02%	156,672,693	(1,593,732)	155,078,961
Past due 1-30 days	4.34%	38,367,921	(1,666,847)	36,701,074
Past due 31-60 days	26.96%	5,638,199	(1,519,879)	4,118,319
Past due 61-90 days	53.99%	2,330,306	(1,258,029)	1,072,277
Past due more than 90 days	86.53%	5,753,855	(4,978,632)	775,223
Total		**208,762,974**	**(11,017,119)**	**197,745,855**

16. TRADE RECEIVABLES (CONTINUED)

	31 December 2022			
	Weighted average rate of losses	Gross value	Bad debt loss allowance	Net trade receivables
Neither past due nor impaired	0.97%	198,876,632	(1,934,289)	196,942,343
Past due 1-30 days	4.41%	44,670,974	(1,967,923)	42,703,050
Past due 31-60 days	23.56%	4,530,418	(1,067,296)	3,463,122
Past due 61-90 days	31.40%	3,791,048	(1,190,272)	2,600,777
Past due more than 90 days	81.22%	11,223,115	(9,115,720)	2,107,395
Total		**263,092,187**	**(15,275,500)**	**247,816,687**

The movement in the loss allowance for trade receivables is as follows:

	31-Dec-22	31-Dec-21
Balance as at 1 January	**11,017,120**	**11,603,821**
Acquisition impact (Note 30.2)*	-	2,818,069
Impairment recognized (reversed)**	4,974,192	(2,687,347)
Amounts written off	(715,812)	(717,423)
Balance as at 31 December	**15,275,500**	**11,017,120**

*Allowance recognized in relation to net recoverable value of Trigor AVD SRL receivables within the Group's acquisition from 2021.

**Expected credit losses as reported in SOCI in amount of RON 19,782,564 includes trade receivables impairment RON 4,974,192 and loans to related parties impairment in amount of RON 14,808,372 (Note 22).

Out of the total RON 4,974,192 impairment recognized during the year, RON 4,016,174 refers to Nordexim SRL (Note 29).

17. OTHER RECEIVABLES AND PREPAYMENTS

17(a) Other receivables

	31-Dec-22	31-Dec-21
Receivable from medical leaves	391,025	2,292,143
Advances to employees	-	272,924
Other receivables	1,007,793	1,651,927
Total	**1,398,818**	**4,216,994**

17(b) Prepayments

As at 31 December 2022, prepayments in amount of RON 28,902 646 include advances to suppliers for inventory acquisitions in amount of RON 21,352,509. As at 31 December 2021, advances to suppliers for inventory acquisitions in amount of RON 25,797,032 have been presented under line ''Other receivable'' and have been reclassified during 2022 under the Prepayments line.

18. CASH AND CASH EQUIVALENTS AND SHORT-TERM DEPOSITS

18(a) Cash and cash equivalents

	31-Dec-22	31-Dec-21
Bank current accounts	18,786,514	42,541,957
Cash in hand	76,528	70,689
Promissory notes and cheques in bank	-	720,475
Total cash and cash equivalents	**18,863,042**	**43,333,121**

18(b) Short term deposits

Balance presented at 31 December 2022 of RON 160,000,000 relates to part of the amounts received from the IPO which were placed in short term deposits (6 months term – 150,000,000) and (3 months term 10,000,000). The short-term deposits have maturities between 3 to 6 months and the interest received is between 8.2% and 9%.

Balance presented at 31 December 2021 of RON 195,000,000 relates to part of the amounts received from the IPO which were placed in short term deposits (6 months term – 190,000,000) and (3 months term 5,000,000). The short-term deposits have maturities between 3 to 6 months and the interest received is between 2.5% and 2.9%.

19. PROPERTY, PLANT AND EQUIPMENT

The movements in property, plant and equipment in 2021 and 2022 were as follows:

	Land and buildings	Plant and equipment	Fixtures and fittings	Construction in progress	Total
Gross carrying amount					
Balance at 1 January 2021	**183,466,116**	**193,093,904**	**14,182,292**	**589,267**	**391,331,579**

At 31 December 2021	**5,011,706**	**1,542,243**	**17,086**	**6,571,035**
At 31 December 2022	**5,011,706**	**1,156,682**	**47,911**	**6,216,299**

Following the acquisition of AGRIROM SRL by AQUILA PART PROD COM SA, the Group mainly recognised goodwill of RON 5,011,706 and brands of RON 2,698,926 (Agrirom's brands for food products: Gradena, Yachtis, LaMasa and Frisco).

As at 31 December 2022 and as at 31 December 2021, the Group performed an impairment analysis for the goodwill, which allocated to the CGU formed by the distribution and trade with food, beverages and tobacco performed by AGRIROM SRL.

Based on the analysis, the goodwill is not impaired as at 31 December 2022 and as at 31 December 2021.

The recoverable amount of the goodwill is determined based on a value in use calculation for uses cash flow projections based on financial budgets covering a three-year period and a pre-tax WACC of 12.6% per cent per annum, growth rate of 2.5%.

The key assumptions used by management in setting the financial budgets for the initial three-year period were as follows:

- Forecast sales growth rates
- Operating profits

Operating profits are forecast based on historical experience of operating margins, adjusted for the impact of current trends of reduction followed by a slower increase trend in coming years.

- Cash conversion

Cash conversion is the ratio of operating cash flow to operating profit. Management forecasts cash conversion rates based on historical experience.

Cash flows beyond that three-year period have been extrapolated using a steady 2.5% per cent per annum growth rate. Changes by 1% of the assumptions used such as WACC, growth in perpetuity does not lead to impairment.

Brands have been recognised at fair value at the acquisition date.

21. INVESTMENT PROPERTY

(a) Reconciliation of carrying amounts

	2022	2021
Gross book value		
Balance at 1 January	**16,069,631**	**14,336,071**

Balance at 1 January	**13,855,243**	**13,227,423**
Balance at 31 December	**13,717,978**	**13,855,243**

Investment property comprises of land and buildings of AQUILA PART PROD COM SA and PRINTEX SA that are leased to third parties.

The Group performs internal valuations to determine if the fair values of investment properties are materially different versus the cost less accumulated depreciation and any impairment losses whenever conditions could imply a significant change in values.

The Group performed internal valuation and determined that the fair value was not significantly changed in 2021 and 2022 and is not significantly different compared to carrying amount.

(b) Amounts recognised in profit or loss

	2022	2021
Income-generating property	1,148,010	3,676,525
Directly operating expenses	227,279	233,921

22. LOANS TO RELATED PARTIES AND LONG-TERM RECEIVABLES FROM RELATED PARTIES

The Group has loans to related parties and long-term receivables from receivables which are considered purchased or originated credit-impairment financial assets ("POCI").

(a) Loans to related parties

	31-Dec-22	31-Dec-21
Novadex	12,645,536	15,121,550
Aquila Agricola	6,660,195	7,157,250
Best Coffee Solutions	2,937,655	3,503,183
Nordexim	14,981,816	32,774,621
Aquila Trade Solutions	-	239,481
Total	**37,225,202**	**58,796,085**
Short-term portion	**3,591,648**	**6,672,011**
Long-term portion	**33,633,554**	**52,124,074**

(i) Novadex – contract with Novadex was concluded in 2007 for an original amount of RON 2,500,000 and an original maturity of 2 years. Subsequently the contract's maturity was extended annually with another 12 months. Also the loan limit amount was increased multiple times up to the current limit of RON 25,000,000. The loan purpose was financing of operating and investing activities (acquisition of property, plant and equipment).

On 31 December 2020, an addendum was signed to the contract for extension of maturity to 31 December 2028. As per addendum the loan has been converted in EUR and is payable in quarterly tranches, with an interest of 1.8 pa and it is not secured. In 2022 the loan was collected according to the repayment schedule. For the year ended 2022, no additional ECL have been booked after a review of the loan.

(ii) Nordexim - On 31 December 2020, the Group converted the trade receivables into a loan with a maturity of 10 years, until 31 December 2030, repayable in quarterly tranches, with an interest of 1.8 p.a.. The loan is not secured and is denominated in EUR.

In 2022 the loan was collected according to the repayment schedule, however, Nordexim's financial evolution and related results was assessed as not in line with prior expectations. Considering the significant decrease in equity value, which was computed considering a WACC of 12.65% and a growth rate of 2.6% for the terminal value, a loan review was performed. The Expected Credit Loss calculation indicated additional cash shortfalls discounted at the original credit adjusted effective interest rate of RON 14,808,372.

(iii) Aquila Agricola - contract with Aquila Agricola was concluded in 2007 for an original amount of RON 150,000 and original maturity of 31 December 2008. Subsequently the contract's maturity was extended annually with another 12 months. Moreover, the loan limit amount was increased multiple times up to the current limit of RON 15,000,000.

The loan purpose was financing of operating and investing activities (acquisition of property, plant and equipment).

On 31 December 2020, an addendum was signed to the contract for extension of maturity to 31 December 2030. As per addendum the loan has been converted in EUR is payable in quarterly tranches, with an interest of 1.8 pa and it is not secured. In 2022 the loan was collected according to the repayment schedule. For the year ended 2022, no additional ECL have been booked after a review of the loan.

(iv) Aquila Trade solution: loan granted in 2012 for working capital and in 2022 the entire amount was impaired.

22. LOANS TO RELATED PARTIES AND LONG-TERM RECEIVABLES FROM RELATED PARTIES (CONTINUED)

(a) Loans to related parties (continued)

(v) Best Coffee Solutions - contract was concluded in 2016 for an original amount of RON 1,000,000 and original maturity of 30 June 2013. Subsequently the contract's maturity was extended annually with another 12 months. Also the loan limit amount was increased multiple times up to the current limit of RON 7,000,000.

The loan purpose was financing of operating and investing activities (acquisition of property, plant and equipment).

On 31 December 2020, an addendum was signed to the contract for extension of maturity to 31 December 2030. As per addendum the loan has been converted in EUR is payable in quarterly tranches, with an interest of 1.8 pa and it is not secured. In 2022 the loan was collected according to the repayment schedule. For the year ended 2022, no additional ECL have been booked after a review of the loan.

The loans to related parties are classified as POCI financial assets, as a result the Group measures the loss allowance for loans receivables at an amount equal to lifetime ECL. The expected credit losses on loans to related parties are determined based on the expected cash inflow to be obtained from each debtor until the end of 2030, based on the projected future cash flows of the debtors. The future cashflow projections have incorporated judgement and estimates considering historical performances of the related parties as well as expected reasonable future changes based on the information available as at the date of the preparation of these financial statements.

On initial recognition, POCI assets do not carry an impairment allowance. Instead, lifetime ECLs are incorporated into the calculation of the effective interest rate.

If a financial asset is purchased or originated credit-impaired then at the reporting date only the cumulative changes in lifetime expected credit losses since initial recognition are recognised as a loss allowance. The expected future credit losses are assessed using the effective interest rate.

Additional impairment loss recognised in 2022 on Nordexim loan:

	31-Dec-22	31-Dec-21
Opening balance	**32,774,621**	**33,923,738**
Repayment	(2,955,525)	(1,973,800)
Additional loss recognized	(14,808,372)	-
Impact of re-evaluation (foreign exchange)	(28,908)	824,683
Closing balance	**14,981,816**	**32,774,621**

23. CAPITAL AND RESERVES

(a) Share capital

As at 31 December 2022, the share capital is of RON 180,590,088 (31 December 2021: RON 30,589,788) and includes the effect of restatement required by the application of IAS 29 Financial Reporting in Hyperinflationary Economies until 31 December 2003. The reconciliation of share capital is as follows:

Share capital (nominal value)	30,000,060
Restatement adjustment in accordance with IAS 29	589,728
Restated share capital balance as at 31 December 2021	**30,589,788**
Share capital (nominal value)	180,000,360
Restatement adjustment in accordance with IAS 29	589,728
Restated share capital balance as at 31 December 2022	**180,590,088**

23. CAPITAL AND RESERVES (CONTINUED)

The number of shares of the Group was as follows:

		RON		Ordinary shares	
Number of shares	**Note**	**2022**	**2021**	**2022**	**2021**
In issue at 1 January		**30,589,788**	**3,614,728**	**200,000,400**	**302,500**
Share issuance at RON 10		-	16,975,040	-	1,697,504
Share split RON 10 to RON 0.15		-	-	-	131,333,596
Share issuance at RON 0.15		-	10,000,020	-	66,666,800
Share increase from incorporation of share premium	12	150,000,300	-	1,000,002,000	-
In issue at 31 December – fully paid	**12**	**180,590,088**	**30,589,788**	**1,200,002,400**	**200,000,400**

The par value of the shares is RON 0.15 as at 31 December 2022 and 31 December 2021. New shares issued in 2022 were presented in Note 1. All ordinary shares rank equally with regard to the above companies' residual assets.

Holders of ordinary shares are entitled to dividends as declared from time to time, distributed from the statutory profits and are entitled to one vote per share at general meetings of the above companies. The above companies recognize changes in share capital only after their approval in the General Shareholders Meeting and their registration by the Trade Register.

(b) Legal reserves

Legal reserves are set up as 5% of the profit before tax for the year as per statutory individual financial statements of the Group companies, until the total legal reserves reach 20% of the paid-up nominal share capital of each company, according to the legislation. These reserves are deductible for income tax purposes and are not distributable. As of 31 December 2022, in line with net profits achieved, the company increased legal reserve with 5% representing RON 4,645,400 .

Legal reserves were restated according to IAS 29 Financial Reporting in Hyperinflationary Economies until 31 December 2003 (the adjustment for the effect of hyperinflation amounts to RON 110,225 as at 31 December 2022 and 31 December 2021).

(c) Own Shares

The balance of RON 991,972 relates to 180,000 own purchased shares.

(d) Dividends

The Group companies may distribute dividends from statutory earnings only, as per separate financial statements prepared in accordance with statutory accounting regulations. The dividends declared by the Companies were as follows:

	31-Dec-22	**31-Dec-21**
To the owners of the Parent	84,547,999	21,395,289
Total	**84,547,999**	**21,395,289**
Weighted-average number of ordinary shares at 31 December	1,198,922,400	1,137,976,167*
Dividend per share	**0.071**	**0.062***

*Weighted average number of ordinary shares adjusted for the effect of premium issuance in February 2022.

Out of the dividends declared by the Parent, the dividends paid were RON 84,546,731 in 2022 and RON 21,395,289 in 2021. In the period January to August 2021, the shareholders of the Company approved the distribution of dividends of RON 21,395,289 as follows: January (RON 3,076,738), March (RON 3,252,632) and August (RON 15,065,919) before the IPO.

In 2021 the shareholders of the Parent approved the distribution of dividends of RON 21,395,289. In 2022 the shareholders of the Parent approved the distribution of dividends of RON 84,547,999.

23. CAPITAL AND RESERVES (CONTINUED)

(e) Capital management

The Group manages its capital such as to make sure that the Group entities will be able to continue as a going concern and to maximize the profits for the shareholders, by optimization of the balances of liabilities and equity.

The structure of the Group's capital comprises liabilities, which include borrowings, cash and cash equivalents, and equity attributable to the owners of the Company. Equity comprises share capital, reserves and retained earnings.

The Group's capital risk management includes a regular review of the equity structure. As part of this review, management considers the cost of equity and the risk associated to each class of equity. The Group balances its general structure of capital by the payment of dividends, by issuance of new shares, as well as by contracting new liabilities or extinguishing the existent ones.

The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total equity. Net debt is calculated as total borrowings less cash and cash equivalents.

	Note	31-Dec-22	31-Dec-21
In RON			
Borrowings and lease liabilities	26	125,131,800	74,440,290
Less: Cash and bank equivalents	18	(18,863,042)	(43,333,121)

Total	17,940,422	23,586,774

*Other payables include the liability for dividends to be paid by the subsidiary Trigor to the founding shareholders in amount of RON 5,999,456 (31 December 2021: RON 12,846,392).

Other payables to related parties are presented in Note 29.

26. LOANS AND BORROWINGS

(a) Long-term bank borrowings

	31-Dec-22	31-Dec-21
Balance at 1 January	**4,512,666**	**6,863,198**
Repayments	(2,453,463)	(2,461,455)
Foreign exchange impact	(8,282)	110,923
Balance at 31 December	**2,050,922**	**4,512,666**
Current portion	2,050,922	2,461,455
Long term portion	-	2,051,211

In February 2019, AQUILA PART PROD COM SA contracted a long-term loan of EUR 2,280,000 with Raiffeisen Bank to finance the acquisition of AGRIROM SRL. The loan is re-payable in 55 equal monthly instalments until 31 October 2023. The interest rate is 1M EURIBOR + 2.75%. The balance of the loan as at 31 December 2022 is EUR 414,545; 31 December 2021 is EUR 911,999.

The loan is guaranteed with AQUILA PART PROD COM SA's bank accounts with Raiffeisen Bank

In December 2021 AQUILA PART PROD COM SA contracted a long-term loan of EUR 5,000,000 with BERD to finance various projects (Software – 28%, Equipment – 36%, Marketing Spending – 13% and working Capital - 23%). As at 31 December 2022 no amount was drawn from this loan. In December 2022 the period the loan can be used was extended to 22 December 2023.

The loan is guaranteed with 5% from the value of shares of the founding members.

All covenants are complied with as at 31 December 2022.

(b) Short-term bank borrowings

The balance of short-term credit facilities as at 31 December 2022 and 31 December 2021 is nil.

The Group has the following short-term credit facilities:

26. LOANS AND BORROWINGS (CONTINUED)

AQUILA PART PROD COM SRL

i. Unicredit Bank: multicurrency (RON, EUR) credit line contracted in 2015 together with SECA DISTRIBUTION SRL, with a limit of EUR 24,200,000. The credit includes 2 facilities:

Interest paid	(87,413)	(164,988)	(2,520,744)
Modifications to the leasing contract	-	-	79,436,598
Balance at 31 December 2022	**2,050,922***	**-**	**123,080,878**

*Balance of long term borrowing as at 31 December 2022 is: RON 2,050,922, current portion.

27. LEASES

(a) Leases as lessee

On assessing the application of IFRS 16 Leases, the Group considered the following criteria to determine whether the arrangements contain any leases:

a) The lessee has the right to obtain substantially all of the economic benefits from using the asset throughout the period of use; and

b) The lessee has the right to direct the use of the identified asset throughout the period of use.

The Group leases warehouse and office space. The leases typically run for a period of 5 to 10 years. Additionally, the Group leases transport vehicles. The leases typically run for a period of 5 years. Majority of these leases transfer the ownership of the underlying asset at the end of the lease term.

In case of leases without transfer of ownership of underlying asset at the end of the lease term, only part of these leases include renewal options, which may be applied if the Group announces the lessor with at more than 12 months in advance of the original lease term. The renewal and the extension of the term has to be agreed by both parties through signing an addendum to the contract. Considering that both the renewal and the additional lease term has to be approved also by the lessor, the Group did not consider any renewal option when determining the lease term.

The Group determined the incremental borrowing rate based on the interest rate applied by the financial institution to similar entities for loans with the same characteristics as the lease contracts (in terms of currency and term).

The Group does not include in the lease payments costs incurred in connection with the lease that are not part of the cost of the right-of-use asset (such as maintenance or insurance).

Information about leases for which the Group is a lessee is presented below.

(i) Right-of-use assets

Right-of-use assets related to leased properties that do not meet the definition of investment property are presented as property, plant and equipment.

2021	**Land and buildings**	**Equipment (Transport vehicles)**	**Total**
Balance at 1 January	**65,681,080**	**37,105,367**	**102,786,447**
Addition as business combination	1,595,531	3,140,730	4,736,261
Depreciation charge for the year	(24,155,946)	(15,909,366)	(40,065,312)
Additions to right-of-use assets	2,984,093	8,761,484	11,745,577
Change of right-of-use assets	(3,327,853)	870,516	(2,457,337)
Balance at 31 December	**42,776,905**	**33,968,731**	**76,745,636**

27. LEASES (CONTINUED)

In 2022 the term several rent contracts classified as leasing under IFRS was extend (and/or rented surface change) with a new term period, this resulted in recognition of additional right of use assets as presented below:

2022	Land and buildings	Equipment (Transport vehicles)	Total
Balance at 1 January	**42,776,905**	**33,968,731**	**76,745,636**
Depreciation charge for the year	(23,319,261)	(16,672,537)	(39,991,798)
Additions to right-of-use assets	79,345,360	16,137,691	95,483,051
Decrease	(44,073)	(1,726,869)	(1,770,942)
Balance at 31 December	**98,758,932**	**31,707,016**	**130,465,948**

(ii) Amounts recognised in profit or loss

	Note	31-Dec-22	31-Dec-21
Interest on lease liabilities	11	2,156,463	2,481,892
Expenses related to short term lease and low value lease	10	2,159,809	5,370,614

(iii) Amounts recognised in statement of cash flows

	31-Dec-22	31-Dec-21
Total cash outflows for leases	(42,550,927)	(43,050,370)
Total interest paid	(2,520,744)	(2,276,604)

(b) Leases as lessor

The Group leases out its investment property consisting of its owned properties. All leases are classified as operating leases from a lessor perspective, because they do not transfer substantially all of the risks and rewards incidental to the ownership of the assets. The Group ensures via contractual clauses that property rights are retained by the lessor and lessees are required to returned the assets leased in the same condition as when taken under lease.

The following table sets out a maturity analysis of lease payments, showing the undiscounted lease payments to be received after the reporting date.

	31-Dec 2022	31-Dec 2021
Less than one year	1,148,010	477,214
One to two years	900,889	452,756
Two to three years	863,766	343,076
Three to four years	803,890	247,452
Four to five years	783,815	247,452
More than five years	1,414,494	247,452
Total	**5,914,864**	**2,015,402**

28. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT

(a) Accounting classifications and fair values

For the purchased or originated credit-impaired financial assets, loans to related parties and long term trade receivables from related parties, the net carrying amount of the financial assets represents an approximation of fair value. For the bank borrowings, the incremental costs are not material, interest is based on variable interest rates and carrying amount approximates fair value.

(b) Financial risk management

The Group has exposure to the following risks arising from financial instruments:

- credit risk;
- liquidity risk; and
- market risk.

(i) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers, long term trade receivables from related parties and loans granted to related parties.

The carrying amounts of financial assets represent the maximum credit exposure.

The Group's current credit risk grading framework comprises the following categories, under the IFRS 9 requirements:

Category	Description	Basis for recognising expected credit losses
Performing	The counterparty has a low risk of default and does not have an overdue of more than 30 days past due.	Lifetime ECL (simplified model)– provision matrix
Doubtful	Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL (simplified model)– provision matrix
In default	Amount is > 90 days past due or there is evidence indicating the asset is credit-impaired	Lifetime ECL (simplified model)– provision matrix
POCI	Purchased or originated credit impaired financial assets	Lifetime ECL
Write off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery.	Amount is written off

There are no significant movements between stages as of end of reporting dates.

28.FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(b) Financial risk management (continued)

(i) Credit risk (continued)

The tables below detail the credit quality of Group's financial assets, as well as the Group's maximum exposure to credit risk:

31 December 2021	**Note**	**12-month or lifetime ECL**	**Gross carrying amount**	**Loss allowance**	**Net carrying amount**
Loans to related parties	22	Lifetime ECL (credit impaired)	58,796,085	-	58,796,085
Trade receivables	16	Lifetime ECL (simplified model)	208,762,974	(11,017,120)	197,745,855
			267,559,059	**(11,017,120)**	**256,541,940**

31 December 2022	**Note**	**12-month or lifetime ECL**	**Gross carrying amount**	**Loss allowance**	**Net carrying amount**
Loans to related parties	22	Lifetime ECL (credit impaired)	52,033,574	(14,808,372)	37,225,202
Trade receivables	16	Lifetime ECL (simplified model)	263,092,187	(15,275,500)	247,816,687
			315,125,761	**(30,083,872)**	**285,041,889**

For loans to related parties and long-term trade receivables from related parties, which are classified as POCI financial assets, the Group has determined the loss allowance based on the expected cash inflow to be obtained from each debtor until the end of 2030, based on the projected future cash flows of the debtors. Note 22 includes further details on the loss allowance for these assets.

The loans contracts were concluded during 2007 – 2013, initially with a maturity of 12 months. Subsequently, the loans were prolonged annually for another 12 months. On 31 December 2020, the Group concluded an addendum with each debtor for restructuring of the loans – modifying the maturity to 31 December 2030 and changing the currency of the loans from RON to EUR.

28. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(b) Financial risk management (continued)

(ii) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group aims to maintain the level of its cash and cash equivalents at an amount in excess of expected cash outflows on financial liabilities. The Group also monitors the level of expected cash inflows on trade receivables together with expected cash outflows on trade and other payables. In addition, the Group maintains credit facilities for financing of the operating expenses (please see Note 25).

Exposure to liquidity risk

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments and exclude the impact of netting agreements.

			Contractual cash flows				
Financial liabilities	**Note**	**Carrying amount**	**Total**	**Less than 1 year**	**1 - 2 years**	**2 - 5 years**	**More than 5 years**
31-Dec-22							
Bank borrowings	**26**	2,050,922	2,050,922	2,050,922	-	-	-

Current ratio		**2.22**	**2.15**
Cash and cash equivalents	**18**	18,863,042	43,333,121
Trade receivables	**16**	247,816,687	197,745,855
Current liabilities		278,585,417	285,612,566
Quick ratio		**0.96**	**0.84**

(iii) Market risk

Market risk is the risk that changes in market prices, foreign exchange rates and interest rates – will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Currency risk

The Group is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated and the functional currency of the Group companies. The functional currency of all Group entities is the Romanian Leu (RON).

The currency in which these transactions are primarily denominated is the functional currency. Certain liabilities are denominated in foreign currency (EUR). The Group also has deposits and bank accounts denominated in foreign currency (EUR and USD). The Group's policy is to use the local currency in its transactions as far as practically possible. The Group does not use derivative or hedging instruments.

28. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(b) Financial risk management (continued)

(iii) Market risk (continued)

Exposure to currency risk

The summary quantitative data about the Group's exposure to currency risk is as follows:

Sum in RON	Note	RON	EUR	USD	GBP	CHF	PLN	MDL	HUF	Total
31-Dec-22										
Cash and cash equivalents	18	13,922,063	4,392,915	206,226	12,737	-	9,826	319,275	-	18,863,042

28.FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(iii) Market risk (continued)

Currency risk (continued)

The following significant exchange rates have been applied:

	Average rate		Year-end spot rate	
RON	**2022**	**2021**	**2022**	**2021**
EUR 1	4.9315	4.9204	4.9474	4.9481
USD 1	4.6885	4.1604	4.6346	4.3707
GBP 1	5.7867	5.7233	5.5878	5.8994
CHF 1	4.9096	4.5515	5.0289	4.7884
PLN 1	1.0528	1.078	1.0557	1.0768
HUF 1	1.2648	1.3733	1.2354	1.3391
MDL 1	0.248	0.2353	0.2428	0.2463

Sensitivity analysis

A reasonably possible strengthening (weakening) of RON against EUR, MDL, USD, GBP and CHF as at 31 December would have affected the measurement of financial instruments denominated in a foreign currency and affected profit of loss before tax by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant.

Effect in RON	**Profit or loss before tax**	
	Strengthening	**Weakening**
31-Dec-22		
EUR (3% movement)	4,031,461	(4,031,461)
USD (6% movement)	73,972	(73,972)
GBP (5% movement)	(637)	637
CHF (8% movement)	1,810	(1,810)
PLN (3% movement)	8,345	(8,345)
HUF (7% movement)	134,909	(134,909)
MDL (5% movement)	(315,520)	315,520
31-Dec-21		
EUR (3% movement)	1,556,397	(1,556,397)
USD (5% movement)	61,659	(61,659)
GBP (5% movement)	(984)	984
CHF (7% movement)	1,508	(1,508)
PLN (3% movement)	24,888	(24,888)
MDL (5% movement)	(548,456)	548,456

28. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(iii) Market risk (continued)

Currency risk (continued)

Interest rate risk

The Group is exposed to interest rate risk mainly in relation to loans and borrowings bearing variable interest rate.

Exposure to interest rate risk

The interest rate profile of the Group's interest-bearing financial instruments is as follows:

In RON	**Note**	**31-Dec 2022**	**31-Dec 2021**
Fixed-rate instruments			
Financial liabilities (borrowings and leases)	**26**	(123,080,878)	(69,927,624)
Variable-rate instruments			
Financial liabilities (borrowings)	**26**	(2,050,922)	(4,512,666)

Fair value sensitivity analysis for fixed-rate instruments

The Group does not account for any fixed-rate financial assets or financial liabilities at FVTPL and the Group does not use derivatives. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) profit or loss before tax by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

Effect in RON	**Profit or loss before tax**	
	100 bp increase	**100 pp decrease**
31-Dec-22		
Variable-rate instruments	(20,509)	20,509
Cash flow sensitivity	**(20,509)**	**20,509**
31-Dec-21		
Variable-rate instruments	(45,127)	45,127
Cash flow sensitivity	**(45,127)**	**45,127**

28. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(iv) Non-financial risks

Cyber-security risk

In 2022, the Group was subject to an attempt to gain unauthorized access to the computer network and systems, which did not result in major operational disruptions and have not had a material adverse effect, however this kind of events may occur in the future.

The Group continuously improves cyber security capabilities and supervise the cyber security activity, ensuring the protection of the confidentiality, integrity and availability of data. Also, the Group continuously educates their employees and partners about cyber security risk and supports them to act in a responsible way.

Climate change risk

The Group constantly monitors the latest government legislation in relation to climate related matters, as well as the developments in the sector with respect to green energy.
The Consolidated Financial Statements take into account the main climate-related developments and risks associated with the transformation, which also include the climate targets for 2026 agreed at IPO – 10% reduction in carbon footprint

The main measure taken by the Group to reduce the impact on the environment:

- Photovoltaic plants: investments of RON 1,090,000 in the expansion of photovoltaic plants inaugurated in the spring of 2022 and
- in a new unit aimed at the Aquila Part Prod Com SA headquarters, both with a total capacity of 262 kW.

Other measures to reduce the impact on the environment in 2023: new cars with lower polluting emissions (LPG, hybrid, gasoline) - 48 units and vans euro 6 - 12 units. The Group considers within its investments plans for the next 3 years the installation of photovoltaic panels and at the Aquila administrative headquarters.
Given the complexity of climate modelling, the investment scenarios are reviewed periodically to reflect new information, with developments in the periods between updates being reflected in updated internal long-term price outlooks.

In this context, estimates and management judgements relate in particular to assumptions regarding future legal regulations and developments in the market green energy utilisation.

29. RELATED PARTIES

(a) Main shareholders

As at 31 December 2022 and 31 December 2021 the shareholders of AQUILA PART PROD SA are Mr. Vasile Constantin Catalin and Mr. Dociu Alin Adrian with 33.3% each. The balances with shareholders are related to dividends payable, as follows:

	31-Dec-22	31-Dec-21
Shareholders	1,276	-
Minority shareholders	8,042	8,042
Total	**9,318**	**8,042**

(b) Management remuneration

	2022	2021
Executive management compensation	13,436,779	9,172,447

29. RELATED PARTIES (CONTINUED)

(c) Balances with related parties

Parties are considered to be related If one party has the ability to control the other party of to exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of relationship, not merely the legal form.

The table below presents the nature of the related parties relationship and transactions for those related parties with whom the Group entered into significant transactions or had significant balances outstanding:

Related Party	Relationship	Nature of transactions
Aquila Construct	Common shareholder	Rent, receiving of services
Best Coffee Solutions	Common shareholder	Loan granting, sales of goods
Best Distibution	Common shareholder	Purchases or sales of goods
Aquila Agricola	Common shareholder	Loan granting, rendering of services
Novadex	Common shareholder	Loan granting, rent
Nordexim	Common shareholder	Loan granting, purchases or sales of goods
Aquila Asig	Common shareholder	Rendering of services
Total Green Energy	Common shareholder	No transactions in current period
Potential Construct	Common shareholder	No transactions in current period
Aquila Trade Solution	Common shareholder	No transactions in current period
Aquila Ag	Common shareholder	Rent
Epernon Limited	Common shareholder	No transactions in current period
Aquila Property Management	Common shareholder	No transactions in current period
Lorac Impex SRL	Member of key management personnel	Consulting Services, sales of goods
Sobain Management SRL	Member of key management personnel	Consulting Services, sales of goods

Balances: trade payables	31-Dec-22	31-Dec-21
Aquila Construct	4,733	-
Best Distribution	238,880	-
Aquila Asig	-	127,757
Lorac Impex	9,217	-

(e) Loans to related parties

The Group has significant loans granted to related parties. Related balances, finance income and losses are disclosed in Note 22.

30. MERGERS AND ACQUISITIONS WITH ENTITIES UNDER COMMON CONTROL

Acquisition of Trigor AVD SRL by Aquila Part Prod Com SA

As of 19th May 2021 Aquila Part Prod Com SA acquired 100% of shares in Trigor AVD SRL.

The primary reason of the acquisition of TRIGOR AVD SRL by AQUILA PART PROD COM SA (Aquila) was the expansion of the Group in Republic of Moldova and increase of overall operations' profitability as both companies had similar business interests in terms of product and customer portfolios as well as delivering the same types of revenues.

(a) Consideration transferred

The consideration transferred consists of cash of RON 22,400,000.

(b) Identifiable assets acquired and liabilities assumed

The following table summarises the estimated amounts of assets acquired, and liabilities assumed at the date of acquisition.

	RON
Property, plant and equipment	6,148,624
Intangible assets	22,649
Deferred tax asset	146,726
Inventories	7,708,416
Trade receivables	7,634,039
Other receivables	844,688
Cash and cash equivalents	2,916,455
Lease liabilities	(4,688,307)
Trade payables	(3,505,107)
Employee benefits	(839,137)
Provisions	(180,982)
Other payables	(14,394,762)
Total identifiable net assets acquired	**1,813,302**

(c) Change in Aquila Group retained earnings due to acquisition of entity under common control

Under IFRS framework, the transfer of assets and liabilities from Trigor AVD S.R.L. to Aquila Part Prod S.A. was treated as a transaction under common control using the pooling of interest method, with the assets and liabilities of transferred company being recognized at their carrying values at the transaction date. No goodwill was recognized at transfer date and the difference between the consideration transferred and carrying value of the net assets and net liabilities transferred of the subsidiary was recognized as a change in retained earnings.

Change in retained earnings arising from the acquisition has been recognised as follows - reduction in retained earnings as a result of acquisition of entity under common control. Transaction price was set as market value based on external valuer report.

	Note	**RON**
Consideration transferred	**a**	22,400,000
Carrying value of net assets acquired	**b**	(1,813,302)
Reduction of Group retained earnings From acquisition of entity under common control		**20,586,698**

31. CONTINGENCIES

Fiscal environment

Tax audits are frequent in Romania, consisting of detailed verifications of the accounting records of tax payers. Such audits sometimes take place after months, even years, from the date liabilities are established. Consequently, companies may be found liable for significant taxes and fines. Moreover, tax legislation is subject to frequent changes and the authorities demonstrate inconsistency in interpretation of the law.

Income tax returns may be subject to revision and corrections by tax authorities, generally for a five year period after they are completed. Romanian tax authorities carried out controls on the Group entities related to income tax by the end of 2015 for AQUILA PART PROD COM SA, end of 2010 for SECA DISTRIBUTION SRL (absorbed entity).

The management of the Group believes that all the tax obligations included in the Group's consolidated financial statements are adequate. Currently, the company is under fiscal audit of the authorities, as regular periodic audit.

Transfer pricing

In accordance with relevant tax law in Romania, the tax treatment of a transaction carried out with related parties is based on the concept of the market price of that transaction. Based on this concept, transfer prices should be adjusted to reflect market prices that would be established between parties which are not affiliates or related parties and which act independently on the basis of "arm’s length” principle.

Transfer pricing audits are likely to be performed in the future by the tax authorities to determine whether these prices follow the "arm’s length" principle and that the taxpayer's taxable base is not distorted. The management of the Group is not able to quantify the result of such audits and believes that the Group's transactions with related parties are conducted at arm’s length.

32. COMMITMENTS

Guarantees and pledges

As at 31 December 2022 the Group entities have bank letters of guarantee issued in favour of third parties with a total amount of EUR 21,866,079 (31 December 2021: EUR 21,117,758). The letters of guarantee issued in favour of the subsidiary TRIGOR AVD SRL is EUR 600,000 and in favour of Nordexim is EUR 120,000.

As at 31 December 2022 the Group entities have bank letters of guarantee received with a total amount of RON 1,200,000.

As at 31 December 2022 the Group has no significant contractual commitments.

33. SEGMENT REPORTING

The Group has analysed the segments of operations such as distribution of goods, transportation and logistics services and determined the segments based on management organization by types of revenues obtained. The Group has determined as reportable segments distribution of goods, logistic services and external transport services considering the nature of similarities of the activities. Distribution of goods refers to sales of consumer goods products (FMCG).

Goods and services revenues are mostly related to internal market sales in Romania, as presented in Note 8.

33. SEGMENT REPORTING (CONTINUED)

Income statement for the year ended 31 December 2022:

	Distribution	Logistics	Transport	Unallocated	Total

The Group does not allocate assets and liabilities per segments, as the management doesn't use such information for decision making process.

During 2022, the Group had no distribution clients that exceeded 10% of goods sales, while in 2021 the Group had only one such client with 10.3% (RON 185 million).

34. SUBSEQUENT EVENTS

At present, we are monitoring very closely the current situation and developments of economic conditions and regularly conduct a risk assessment on this basis.

The war in the Ukraine is still creates increased geopolitical risks and further challenges for global supply chains are to be expected which will impact the global economy. We anticipate that the global challenging conditions will persist for the following months, however, at this stage, Management doesn't expect that future possible economic evolution will have a significant negative impact on the Group operations and on the recoverable value of the Group long term assets. No other significant subsequent events occurred until date of the financial statements which require disclosures.

1. REPORTING COMPANY AND GENERAL INFORMATION

General information about the Company

These financial statements are the individual financial statements of AQUILA PART PROD COM S.A. („the Company" or „Aquila").

The Company headquarter and activities are the following:

Entity	Headquarters	Registration	Activity
Aquila Part Prod Com S.A.	105A Malu Rosu Stret, Ploiesti, Prahova County, Romania	Trade Register no: J29/2790/1994 Unique registration code: 6484554	Wholesale of consumer goods, Rendering of logistic services, Internal and external transport of goods

Based on General Shareholders meeting from 8 June 2021, Aquila Part Prod Com SA increased the share capital with RON 16,975,040 through issue of 1,697,504 shares with a par value of RON 10. Issue of shares was performed against incorporation in full of the statutory share premium determined by the merger with Seca Distribution SRL. Additionally, the Company modified the par value of the shares from RON 10 to RON 0.15 through stock split, total number of shares issued by the Company after the stock split is 133,333,600.

In November 2021, Aquila Part Prod Com SA increased the share capital with RON 10,000,020 through issue of 66,666,800 shares with a par value of RON 0.15. The issued shares were used for the initial public offer where Aquila Part Prod Com SA received RON 355,157,710 (gross amount: RON 366,667,400, broker fee: RON 11,509,689).

Based on Extraordinary General Shareholders Resolution of Aquila Part Prod Com S.A. of 23 February 2022, the share capital increase is carried out to support the current activity of the Company; the share capital will be increased by an amount of 150,000,300 RON, representing issuance premiums; the number of shares issued in the share capital increase is 1,000,002,000 new shares; each shareholder of the Company registered in the shareholders' registry on the record date will receive free of consideration a number of 5 newly issued shares for each share held on the record date. Weighted average number of ordinary shares was adjusted for the effect of premium issuance in February 2022 and therefore year 2021 is restated (Note 12).

As at 31 December 2022, the shareholders of the Company, are Mr. Vasile Constantin Catalin and Mr. Dociu Alin Adrian, each holding 33.3% in each company and a series of other shareholders which hold a combined stake of 33.4%.

Shareholder	Number of shares	Par value (RON)	Statutory Share capital (RON)
Mr. Vasile Constantin Catalin	400,000,800	0.15	60,000,120
Mr. Dociu Alin Adrian	400,000,800	0.15	60,000,120
Other shareholders	400,000,800	0.15	60,000,120
Total	**1,200,002,400**		**180,000,360**

As at 31 December 2021 the shareholders of the Company are Mr. Vasile Constantin Catalin and Mr. Dociu Alin Adrian, each holding 33.33 % in each company and a series other shareholders which hold a combined stake of 33.34%. The number of shares of the Company is as follows:

Shareholder	Number of shares	Par value (RON)	Statutory Share capital (RON)
Mr. Vasile Constantin Catalin	66,666,800	0.15	10,000,020
Mr. Dociu Alin Adrian	66,666,800	0.15	10,000,020
Other shareholders	66,666,800	0.15	10,000,020
Total	**200,000,400**		**30,000,060**

1. REPORTING COMPANY AND GENERAL INFORMATION (CONTINUED)

Aquila's subsidiaries are the following:

Entity	% shareholding as at 31 December 2022	% shareholding as at 31 December 2021
PRINTEX S.A.	95.75%	95.75%
TRIGOR AVD S.R.L.	100%	100%

2. BASIS OF PREPARATION

The separate financial statements are prepared in accordance with the requirements of the Minister of Public Finance Order no. 2844/2016, with subsequent amendments for the approval of accounting regulations conforming with International Financial Reporting Standards as adopted by EUs.

Minister of Finance no. 2844/2016 with subsequent amendments, is in accordance with the International Financial Reporting Standards (IFRS) adopted by the European Union, with the exception of IAS 21 The effects of the variation of exchange rates regarding the functional currency, the provisions of IAS 20 Accounting for government subsidies regarding recognition of revenues from green certificates, with the exception of IFRS 15 Revenues from contracts with customers regarding revenues from connection fees of the distribution network. These exceptions do not affect the compliance of the financial statements of the Group and the Company with IFRS adopted by the EU.

The accounting principles of these separate financial statements are presented in Note 2.

The separate financial statements have been approved and authorized for issue by the Board of Directors on 28th March 2023. The separate financial statements will be submitted for shareholders' approval in the meeting scheduled on 28th April 2023.

Details of the Company's accounting policies are included in Note 6.

Going concern basis of accounting

The separate financial statements have been prepared on a going concern basis, which assumes that the Company will be able to continue its operations in the foreseeable future.

As at 31 December 2022, the Company's financial position shows net current assets of RON 325 million, mainly as a result of short term deposits of RON 160 million related to IPO (Initial Public Offering), the Company not having any utilised short-term borrowings at this date. Net current position as of 31 December 2021 was RON 320 million. The Company continues to trade profitably and generate positive cash flows and management has assessed that the Company's is able to meet its obligations as they fall due.

As at 31 December 2022 and 31 December 2021, the Company's net assets amount to RON 486 million and RON 492 million, respectively. For the years ending 31 December 2022 and 31 December 2021 the Company reported profits of RON 78 million and RON 64 million, above the budgeted level.

The Company has distributed dividends in 2022 in amount of RON 84 million, while management believes that the current resources availability is sufficient to enable the Company to continue its operations and settle its obligations in the ordinary course of business without substantial disposal of assets, reversing its operations or similar actions.

Although the last year was characterized by a significant volatility and low margins for one of the segments, considering the massive investment trend of digitalization, combined with improved market conditions and portfolio increase, the Company has achieved and is aiming for future higher earnings and net profits.

2. BASIS OF PREPARATION (CONTINUED)

Going concern basis of accounting (continued)

The ongoing war in Ukraine and the related sanctions targeted against the Russian Federation have a continuous impact on the European economies and globally. The entity does not have any significant direct exposure to Ukraine, Russia or Belarus. However, the impact on the general economic situation may require timely revisions of certain assumptions and estimates.

Based on the facts described above and the plans for 2023, management has assessed that the going concern assumption adopted in the preparation of the separate financial statements to be appropriate.

3. FUNCTIONAL AND PRESENTATION CURRENCY

These separate financial statements are presented in Romanian Lei (RON), which is the functional currency of the Company.

All financial information is presented in RON, except when otherwise indicated.

4. USE OF JUDGEMENTS AND ESTIMATES

In preparing these individual financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed periodically. Revisions to estimates are recognised prospectively.

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities in the next financial year is included in the following notes:

- Note 6 (g) (iii) and 6 (h) (iii) – useful lives of property, plant and equipment and intangible assets;
- Notes 6 (m) (i), 22, 29 (b) – measurement of ECL (expected credit losses) allowance for trade receivables, loans to related parties and long-term receivables from related parties;
- Notes 6 (p), 27 and 32 – recognition and measurement of provisions and contingent liabilities: key assumptions about the likelihood and magnitude of an outflow of resources; and
- Notes 16, 24 – judgement in relation to off setting the accruals for the discounts granted with trade receivables and accruals of the discounts received with the trade payables.

Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

4. USE OF JUDGEMENTS AND ESTIMATES (CONTINUED)

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);

- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Assumptions and estimation uncertainties

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note 29 (a) – financial instruments.

5. BASIS OF MEASUREMENT

The individual financial statements have been prepared on the cost basis.

6. SIGNIFICANT ACCOUNTING POLICIES

(a) Revenue from contracts with customers

Under this standard, revenue is recognized when or as the customer acquires control over the goods or services rendered, at the amount which reflects the price at which the Company is expected to be entitled to receive in exchange of those goods or services.

Revenue is measured based on the consideration to which the Company expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties (such as VAT, excise or other taxes related to sale).

The following table provides information about the nature and timing of the satisfaction of performance obligations in contracts with customers and the related revenue recognition policies.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(a) Revenue from contracts with customers

	Nature and satisfaction of contractual obligations	Revenue recognition policies
Sale of goods	The performance obligations are agreed based on purchase orders from the customers under framework contracts. Consequently, each additional good to be delivered based on purchase orders represent a distinct performance obligation. Customers obtain control of goods when the goods are delivered to and have been accepted at their premises. The performance obligation is satisfied at that point in time. Invoices are issued when the goods are dispatched from Company's warehouses. Considering that the deliveries are made within the same country and using the Company's distribution network, there is no significant time passed between the dispatch time and delivery. Discounts are offered by the Company, which are included on the invoice issued. Payment terms vary from 15 to 90 days. Additionally, volume-based discounts are offered by the Company for certain brands of goods, the volumes based on which the discounts are determined and the percentages applied are established in the contracts with customers. As a result, for the performance obligations performed, the Company is remunerated with a variable considerations, which includes accruals for discounts to be granted. The Company estimates the discounts to be granted based on the actual volume of sales and contractual provisions. Contracts with customers are concluded on one year basis. There are no significant advances or retained payments..	Revenue is recognized when the goods are delivered and have been accepted by customers at their premises (at a point in time). The company recognizes revenues when the performance obligation is satisfied, which is the point at which control of the promised goods are transferred to its customers, in an amount that reflects the consideration the Company expects to be entitled to receive in exchange for those goods. For the majority of the Company's customer arrangements, control transfers to customers at a point-in-time when goods have been delivered, as that is generally when legal title, physical possession and risks and rewards of goods transfers to the customer. The timing of satisfaction of the performance obligation is not subject to significant judgment. Aquila generates revenue primarily from the distribution and sale of products to its customers. Substantially all revenue is recognized at the point in time in which the product is delivered to the customer. The company grants certain customers sales incentives, such as rebates or discounts, which are accounted for as variable consideration. The variable consideration is based on amounts known at the time the performance obligation is satisfied and, therefore, requires minimal judgment. Volume based discounts not granted to customers before year end are accrued for. Such volume discounts are measured as variable consideration and an estimate is included in the transaction price. Considering the legal basis for net settlement exists in the contracts, actual amounts are settled upon credit memo issuance, including accruals for the discounts granted. After completion of Company's performance obligations, the Company has an unconditional right to consideration as outlined in its contracts with customers. Aquila's customer receivables will generally be collected in less than 90 days in accordance with the underlying payment terms. Customer receivables, which are included in accounts receivable, less allowances in the separate balance sheet, are presented in the balance sheet line trade receivables. Aquila has no significant commissions paid that are directly attributable to obtaining a particular contract.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(a) Revenue from contracts with customers (continued)

	Nature and satisfaction of contractual obligations	**Revenue recognition policies**
Logistic services: warehouse services, handling, packaging	The performance obligation is the performance of services related to goods of customers for which the Company ensures distribution. The performance obligation is satisfied as the Company performs the logistic services on a continuous basis / over time. Invoices are issued monthly based on documents that attest the services performed by the Company during the respective month. Payment terms vary from 15 to 90 days. Contracts with customers are concluded on one year basis. There are no significant advances or retained payments.	Revenue is recognized over time, because the customer simultaneously receives and consumes the benefits provided by the performance of the Company as the services are performed. The services are recognized monthly once the service is performed
Transport services	The performance obligation is the transportation of the goods of customers from warehouses to retailers. Each shipment of goods ordered by the customer represents a performance obligation. The performance obligation is satisfied when the transportation is complete. Invoices are issued monthly based on the supporting documents or transports completed during the month. Payment terms vary from 15 to 90 days. Contracts with customers are concluded on one year basis. There are no significant advances or retained payments.	Revenue is recognized at a point in time when the transportation is complete.

(b) Finance income and finance costs

The Company's finance income and finance costs mainly include:

- interest income;
- interest expense; and
- foreign currency gain or loss on financial assets and financial liabilities.

Interest income and expense are recognised using the effective interest method. Please refer to the note 6(k) for the financial instruments policy.

(c) Foreign currency

(i) Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated to the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are recognised in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are not translated.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(d) Employee benefits

(i) Short-term employee benefits

Short-term employee benefits are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(ii) Defined contribution plans

The Company, in the normal course of business, makes payments to the state-management pension schemes on behalf of its employees. All employees of the Company are members of the state pension plans.

The Company does not operate any other pension scheme or postretirement benefit plan and, consequently, has no obligation in respect of pensions. In addition, the Company has no obligation to provide further benefits to current and former employees. The Company does not have any defined benefit plans.

(e) Income tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or in other comprehensive income.

(i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to tax payable or receivable in respect of previous years.

It is measured using tax rates enacted or substantively enacted at the reporting date.

(ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met. Unrecognized deferred tax assets are reassessed recognized and disclosed (if any) at each reporting date and recognized to the extent that it has become probable that the future taxable profits will be available against which they can be used.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(f) Inventories

Inventories consist mainly of goods for resale and consumables.

The cost of inventories is calculated using the first-in, first-out cost formula. The cost of inventories includes all costs of purchase and other costs incurred in bringing the inventories to their present location and condition.

Inventories are measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale and no other significant non-incremental costs are estimated to be incurred. Inventory is transferred to the Cost of sales upon the fulfilment of the performance obligation and the revenue recognition.

(g) Property, plant and equipment

(i) Recognition and measurement

Property, plant and equipment are stated initially at cost, which includes purchase price and other costs directly attributable to acquisition and bringing the asset to the location and condition necessary for their intended use.

After initial recognition, all items of property, plant and equipment are measured at cost less any accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

(ii) Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

(iii) Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives and is recognised in profit or loss. Land is not depreciated.

The estimated useful lives of property, plant and equipment are as follows:

Category	**Useful lives (years)**
Buildings	20-40
Equipment	5-7
Office equipment	10-14

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(iv) Reclassification to investment property

When the use of a property changes from owner-occupied to investment property, the property is reclassified accordingly.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(h) Intangible assets and goodwill

(i) *Recognition and measurement*

Following the merger with AGRIROM SRL from 2021, the Company recognised goodwill and brands (Agrirom's brands for food products: Gradena, Yachtis, LaMasa and Frisco). For the details, please refer to Note 20 and Note 31.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). Goodwill arising on the acquisition of subsidiaries is measured at cost less accumulated impairment losses.

For the separate financial statements, brands are recognised only on mergers or acquisitions. Brands and other intangible assets that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired from the merger date is allocated to each of the Company's cash-generating units that are expected to benefit from the merger, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

For more detailes, please refer to ***6 (r) - Legal mergers***.

(ii) Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

(iii) Amortization

Amortization is calculated to write off the cost of intangible assets using the straight-line method over their estimated useful lives and is recognised in profit or loss.

Brands are amortized over 5-6 years, according to the management assessment of the period over which they are expected to generate cash inflows. The estimated useful lives of software are 3-5 years.

Amortization methods, useful lives are reviewed at each reporting date and adjusted if appropriate.

(i) Investments in subsidiary companies

Investments in subsidiary companies represent long-term strategic investments and are stated at historical cost, less any adjustments impairment caused by a diminished value, which is recognised as an expense in the period in which the impairment is identified. The main indicators considered for the identification of impairment are current and anticipated results of the subsidiary, in the context of the industry in which it operates.

Investments held as of 31 December 2022 represent fully controlled subsidiaries.

(j) Investment property

Investment property is initially measured at cost and subsequently at cost less any accumulated depreciation and any accumulated impairment losses. The revenues generated from renting the investment properties are a small fraction of the total revenues and the Company's main revenue generating activities are Distribution, Logistics and Transport.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Financial instruments

The Company is using linear depreciation method, buildings within investment property are amortised over 20-40 years. Land is not depreciated.

The Company performs internal valuations to determine if the fair values of investment properties are materially different versus the cost less accumulated depreciation and any impairment losses whenever conditions could imply a significant change in values.

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss.

Rental income from investment property is recognised as other income on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

(i) Recognistion and initial measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. In order for a financial asset to be classified and measured at amortised cost or fair value through OCI (other comprehensive income), it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(ii) Classification and subsequent measurement

Financial assets

On initial recognition, the Company classifies a financial asset as measured at amortised cost, at fair value through other comprehensive income ("FVTOCI") or at fair value through profit or loss ("FVTPL"). Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and

- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL), unless the Company uses the irrevocable classification to measure investments in equity instruments as fair value through other comprehensive income. Under the latter, the fair value changes are accumulated in the OCI and are never reclassified in Profit or Loss. Dividend income and foreign exchange differences are recognized in the profit or loss. These instruments are not subject to impairment. The election is available on an instrument by instrument basis and it's only available at initial recognition.

As at 31 December 2022 and 31 December 2021 the Company does not have any financial assets classified under any of these categories, all assets are measured at amortised cost.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Financial instruments (continued)

Financial assets measured at amortized cost

These assets are initially recognised at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest method. The credit-adjusted EIR is the interest rate that, at initial recognition, discounts the estimated future cash flows (including credit losses) to the amortised cost of the POCI financial asset. For financial assets that were credit–impaired on purchase or origination in subsequent reporting periods the credit–adjusted effective interest rate is also used subsequently to discount the ECLs. The amortised cost is reduced by impairment losses via loss allowance account. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss. Impairment of non-derivative financial assets are presented in note (m) below.

Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL.

A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss, all being classified at amortized cost.

Financial liabilities of the Company include bank borrowings, bank overdrafts and trade payables. Financial liabilities, similar to financial assets, and are measured at amortised cost.

(iii) Derecognition

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Company's individual statement of financial position) when:

- The rights to receive cash flows from the asset have expired

Or

- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company exchanges with the existing counterparty one debt instrument into another one with the substantially different terms, such exchange is accounted for as an extinguishment of the original financial asset and the recognition of a new financial asset. Similarly, the Company accounts for substantial modification of terms of an existing asset or part of it as an extinguishment of the original financial asset and the recognition of a new financial asset.

Factors that the company considers in assessing whether the terms are substantially different include:

- Change of the (main) borrower
- Change of the tenor resulting to more than 50% more of the original term
- Significant change of the structure of the interest rate, e.g., from zero rate to a fixed rate
- Change in the currency in which the financial asset is denominated

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(iii) Derecognition (continued)

If the modification is not substantial, the difference between: (1) the carrying amount of the financial asset before the modification; and (2) the present value of the cash flows after modification is recognised in profit or loss as the modification gain or loss within other gains and losses.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss. When the Company exchanges with the existing lender one debt instrument into another one with the substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Similarly, the Company accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective rate is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. If the modification is not substantial, the difference between: (1) the carrying amount of the liability before the modification; and (2) the present value of the cash flows after modification is recognised in profit or loss as the modification gain or loss within other gains and losses.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

A financial asset and a financial liability shall be offset and the net amount presented in the statement of financial position when, and only when, an entity:

(a) currently has a legally enforceable right to set off the recognised amounts; and

(b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(l) Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity. The Company recognizes changes in share capital in accordance with the applicable legislation and after approval of the General Meeting of Shareholders and registration according to the applicable legal obligations.

Until 31 December 2003 the economy of Romania was considered hyperinflationary. Consequently, share capital and legal reserves setup before 31 December 2003 were adjusted for the effects of hyperinflation until that date in accordance with IAS 29.

(m) Impairment

(i) Non-derivative financial assets

The Company recognizes a loss allowance for expected credit losses (“ECLs”) on financial assets measured at amortised cost. The expected credit losses on these financial assets are estimated using a provision matrix based on the Company’s historical credit loss experience as allowed by the simplified approach in IFRS 9. The ECL model includes forward looking information like: GDP (gross domestic product), CPI (customer price index) from National Statistics and Forecasting Commission the National Bank of Romania. We define buckets and include details here and in Trade Receivables, Note 16 below:

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(m) Impairment (continued)

- Not due
- Past due 1-30 days
- Past due 31-60 days
- Past due 61-90 days
- Past due more than 90 days

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 31 days past due. The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or

- the financial asset is more than 90 days past due.

However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company.

Measurement of ECLs

IFRS 9 does not prescribe a single method to measure ECLs. The method used by the Company to measure ECLs is based on a provision matrix considering historical loss rates. IFRS 9 allows entities to use practical expedients when estimating ECLs for trade receivables. The Company applied the practical expedient.

The provision matrix is based on an entity's historical default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. For the ECL provisioning matrix, please refer to not 16.

For trade receivables where different risk profile has been identified an individual assessment for estimating the ECL has been done.

(i) Non-derivative financial assets (continued)

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

POCI assets

Purchased or Originated Credit Impaired financial assets (POCI) are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognized based on a credit-adjusted effective interest rate (EIR). The credit-adjusted EIR is the interest rate that, at initial recognition, discounts the estimated future cash flows (including credit losses) to the amortised cost of the POCI financial asset. The ECL allowance is only recognised or released to the extent that there is a subsequent change in the expected credit losses. The Company recognises the cumulative changes in lifetime ECL since initial recognition, based on a probability-weighting of multiple scenarios, discounted by the credit-adjusted EIR.

(ii) Non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs (Cash Generating Unit). Goodwill arising from a legal merger is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the merger, Note 6(h).

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(m) Impairment (continued)

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(n) Dividends

Dividends are recognized as a deduction from equity in the period in which their distribution is approved and recognised as a liability to the extent it is unpaid at the reporting date. Dividends are disclosed in the notes to the financial statements when their distribution is proposed after the reporting date and before the date of the issuance of the financial statements.

(o) Provisions

A provision is recognised if, as a result of a past event, the Comapny has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

(p) Contingent assets and liabilities

A contingent liability is:

a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company; or

b) a present obligation that arises from past events but is not recognized because:

   i. it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or

   ii. the amount of the obligation cannot be measured with sufficient reliability.

Contingent liabilities are not recognized in the Company's financial statements, but disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

A contingent asset is not recognized in the Company's financial statements but disclosed when an inflow of economic benefits is probable.

(q) Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in IFRS 16.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(q) Leases (continued)

(i) As a lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the

Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. The Company is using publicly available information to estimate the Incremental Borrowing Rate, the rate used for discounting the future cashflows. The Management considers most relevant the statistics information as published on the website of National Bank of Romania (BNR) in regard to medium to long term loans granted by Commercial Banks from Romania in the currency of the lease contracts. It is remeasured when there is a change in future lease payments arising from a change in a floating interest rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment. As part of the remeasurement process, the Company revises the discount rate when the remeasurement is determined by a change of the lease term or a change in the assessment of an option to purchase the underlying asset or a change of lease payments due to changes in a floating interest rate. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use assets that do not meet the definition of investment property in 'Property, plant and equipment' in the statement of financial position.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(q) Leases (continued)

Short-term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets (below RON 25,000 equivalent of EUR 5,000) and short-term leases, including IT equipment. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(ii) As a lessor

At inception or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative standalone prices.

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

If an arrangement contains lease and non-lease components, then the Company applies IFRS 15 to allocate the consideration in the contract.

7. Legal mergers

In case of a legal merger, where the parent is the surviving entity, the separate financial statements of the parent are a continuation of the Group consolidated financial statements. Hence, the values recognised in the financial statements become the cost of these assets for the parent. The acquired assets (including investments in subsidiaries, associates, or joint ventures held by the merged subsidiary) and assumed liabilities are recognised at the carrying amounts in the financial statements as of the date of the legal merger. This includes any associated goodwill, intangible assets, or other adjustments arising from measurement at fair value upon acquisition that were recognised when the subsidiary was originally acquired, less the subsequent related amortisation, depreciation, impairment losses, as applicable.

The difference between the amounts assigned to the assets and liabilities in the parent's separate financial statements after the legal merger and the carrying amount of the investment in the merged subsidiary before the legal merger is recognised directly in equity, through retained earnings.

8. Related parties

A related party is a person or entity that is related to the Company that is preparing its financial statements (referred to as "reporting entity"):

(a) A person or close member of that person's family is related to the reporting if that person:

- i) has control or joint control over the reporting entity;
- ii) has significant influence over the reporting entity; or
- iii) is a member of the key management personnel of the reporting entity or of a parent of the reporting entity;

(b) An entity is related to a reporting entity if any of the following conditions apply:

- i) the entity and reporting entity are members of the same group (which means that each parent, subsidiary or fellow is related to the others);
- ii) one entity is an associate or joint venture of the other entity (or associate or joint venture of a member of the group of the other entity is a member);
- iii) both entities are joint ventures of the same third party;

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

iv) one entity is a joint venture of a third party and the other entity is an associate of the third party;

v) the entity is a post-employment defined benefit plan for the benefit of the employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity;

vi) the entity is controlled or jointly controlled by a person identified in (a);

vii) a person identified in (a) i) has significant influence over the entity or is member of the key management personnel of the entity (or of a parent of the entity);

viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

9. Subsequent events

Events occurring after the reporting date, which provide additional information about conditions prevailing at the reporting date (adjusting events) are reflected in the financial statements. Events occurring after the reporting date that provide information on events that occurred after the reporting date (non-adjusting events), when material, are disclosed in the notes to the financial statements. When the going concern assumption is no longer appropriate at or after the reporting period, the financial statements are not prepared on a going concern basis.

10. Operating profit

Operating profit is the result generated from the continuing principal revenue-producing activities of the Company as well as other income and expenses related to operating activities. Operating profit excludes net finance costs and income taxes

11. Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities (see Note 4).

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

12. IPO Costs

The costs of an IPO that involves both issuing new shares and a stock market listing are accounted for as follows:

- Incremental costs that are directly attributable to issuing new shares are deducted from equity (net of any income tax benefit) in line with, IAS 32.37

- Costs that relate to the stock market listing, or are otherwise not incremental and directly attributable to issuing new shares, are recorded as an expense in the statement of comprehensive income
- Costs that relate to both share issuance and listing are allocated between those functions on a rational and consistent basis in line with IAS 32.38. In the absence of a more specific basis for apportionment, an allocation of common costs based on the proportion of new shares issued to the total number of (new and existing) shares represent an acceptable approach.

The Company has performed this analysis and has booked, in Equity, incremental costs directly attributable to issuing new shares, gross of tax, of RON 13,057,088 - amount included in share premium. The current income tax associated to these costs amounts to RON 2,089,134. From a tax perspective, these costs are entirely deductible the year they are incurred.

13. Change in presentation

The following changes in presentation are included in the current year's financial statements due to:

I. More accurate presentation in accordance with IFRS requirements, as well as being more relevant information about the balance sheet position and allowing comparability with industry peers.

II. Re-assessment of contractual legal rights and offsetting rules under IAS 32.

Change in statement of financial position presentation:

			Reported as of	Change in presentation	Impact
		Note	**31-Dec-2021**	**31-Dec-2021**	**2021 changed Vs previous reported**
I.	Other receivables	**17(a)**	29,334,843	3,932,642	(25,402,201)
I.	Prepayments	**17(b)**	7,421,211	32,823,412	25,402,201
					-
II.	Trade receivables	**16**	209,177,489	185,981,034	(23,196,455)
II.	Trade payables – current	**24**	219,181,346	195,984,891	(23,196,455)

7. STANDARDS ISSUED BUT NOT YET ADOPTED

The adoption of the financial reporting standards below in force at or after 1 January 2022 did not have a material impact on the Company's financial statements.

(i) Standards and Interpretations endorsed by the EU

The accounting policies adopted are consistent with those of the previous financial year except for the following IFRS amendments which have been adopted by the Company as of 1 January 2022:

• IFRS 3 Business Combinations; IAS 16 Property, Plant and Equipment; IAS 37 Provisions, Contingent Liabilities and Contingent Assets as well as Annual Improvements 2018-2020 (Amendments).

The amendments are effective for annual periods beginning on or after 1 January 2022 with earlier application permitted. The IASB has issued narrow-scope amendments to the IFRS Standards as follows:

- IFRS 3 Business Combinations (Amendments) update a reference in IFRS 3 to the previous version of the IASB's Conceptual Framework for Financial Reporting to the current version issued in 2018 without significantly changing the accounting requirements for business combinations.
- IAS 16 Property, Plant and Equipment (Amendments) prohibit a company from deducting from the cost of property, plant and equipment any proceeds from the sale of items produced while bringing the asset to the location and condition necessary for it be capable of operating in the manner intended by management. Instead, a company recognizes such sales proceeds and related cost in profit or loss.
- IAS 37 Provisions, Contingent Liabilities and Contingent Assets (Amendments) specify which costs a company includes in determining the cost of fulfilling a contract for the purpose of assessing whether a contract is onerous. The amendments clarify, the costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to the contract activities.
- Annual Improvements 2018-2020 make minor amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IAS 41 Agriculture and the Illustrative Examples accompanying IFRS 16 Leases

• IFRS 16 Leases-Covid 19 Related Rent Concessions beyond 30 June 2021 (Amendment). The Amendment applies to annual reporting periods beginning on or after 1 April 2021, with earlier application permitted, including in financial statements not yet authorized for issue at the date the amendment is issued. In March 2021, the Board amended the conditions of the practical expedient in IFRS 16 that provides relief to lessees from applying the IFRS 16 guidance on lease modifications to rent concessions arising as a direct consequence of the covid-19 pandemic. Following the amendment, the practical expedient now applies to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022, provided the other conditions for applying the practical expedient are met.

(ii) Standards issued but not yet effective and not early adopted

The following standards, changes in standards and interpretations have been issued, but are not yet effective for the annual period beginning on 1 January 2022. The Company does not intend to adopt these standards before they become effective. The Company expects that the adoption of the financial reporting standards below in the future periods will not have a material impact on the Company's financial statements.

• IFRS 17: Insurance Contracts

The standard is effective, for annual periods beginning on or after 1 January 2023, with earlier application permitted, provided the entity also applies IFRS 9 Financial Instruments on or before the date it first applies IFRS 17.

IFRS 17, with the objective to provide an accounting model for insurance contracts that is more useful and consistent for insurers, establishes principles for the recognition, measurement, presentation and disclosure of all types of insurance contracts, as well as of certain guarantees and financial instruments with discretionary participation features. The accounting model is supplemented by a specific adaptation for contracts with direct participation features (the variable fee approach) and by a simplified approach (the premium allocation approach) mainly for short-duration contracts.

7. STANDARDS ISSUED BUT NOT YET ADOPTED (CONTINUED)

(ii) Standards issued but not yet effective and not early adopted

The main features of the new accounting model include the measurement of the present value of future cash flows, incorporating an explicit risk adjustment, remeasured every reporting period (the fulfilment cash flows). Also, the model includes a Contractual Service Margin (CSM) that is equal and opposite to any day one gain in the fulfilment cash flows of a group of contracts, representing the unearned profit of the insurance contracts to be recognised in profit or loss based on insurance contract services provided over the coverage period. Certain changes in the expected present value of future cash flows are adjusted against the CSM and thereby recognised in profit or loss over the remaining coverage period. Amounts that are paid to a policyholder in all circumstances, regardless of whether an insured event occurs (non-distinct investment components) are not presented in the income statement but are recognised directly on the statement of financial position.

Furthermore, the presentation of insurance revenue and insurance service expenses in the statement of comprehensive income will be based on the concept of services provided during the period. Insurance services results (earned revenue less incurred claims) are presented separately from the insurance finance income or expense. In the statement of financial position, the carrying amounts of portfolios of insurance contracts issued that are assets and those that are liabilities, with the same requirement applying to portfolios of reinsurance contracts held, are presented separately. Finally, IFRS 17 requires extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts.

Regarding the transition, the Board decided on a retrospective approach for estimating the CSM on the transition date. However, if full retrospective application, as defined by IAS 8, for a group of insurance contracts, is impracticable, an entity is required to choose either the modified retrospective approach or fair value approach. Both provide transitional reliefs.

Finally, in December 2021, the IASB issued amendments to IFRS 17 to add a transition option for a "classification overlay" to address possible accounting mismatches between financial assets and insurance contract liabilities in the comparative information presented on initial application of IFRS 17. An entity applying the classification overlay to a financial asset shall present comparative information as if the classification and measurement requirements of IFRS 9 had been applied to that financial asset.

- IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2: Disclosure of Accounting policies (Amendments)

The Amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. The amendments provide guidance on the application of materiality judgements to accounting policy disclosures. In particular, the amendments to IAS 1 replace the requirement to disclose 'significant' accounting policies with a requirement to disclose 'material' accounting policies. Also, guidance and illustrative examples are added in the Practice Statement to assist in the application of the materiality concept when making judgements about accounting policy disclosures.

- IAS 8 Accounting policies, Changes in Accounting Estimates and Errors: Definition of Accounting Estimates (Amendments)

The amendments become effective for annual reporting periods beginning on or after January 1, 2023 with earlier application permitted and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. The amendments introduce a new definition of accounting estimates, defined as monetary amounts in financial statements that are subject to measurement uncertainty, if they do not result from a correction of prior period error. Also, the amendments clarify what changes in accounting estimates are and how these differ from changes in accounting policies and corrections of errors.

- IAS 12 Income taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments)

The amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. The amendments narrow the scope of and provide further clarity on the initial recognition exception under IAS 12 and specify how companies should account for deferred tax related to assets and liabilities arising from a single transaction, such as leases and decommissioning obligations. The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement, having considered the applicable tax law, whether such deductions are attributable for tax purposes to the liability or to the related asset component. Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal.

7. STANDARDS ISSUED BUT NOT YET ADOPTED (CONTINUED)

(ii) Standards issued but not yet effective and not early adopted

- IAS 1 Presentation of Financial Statements: Classification of Liabilities as Current or Non-current (Amendments)

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with earlier application permitted, and will need to be applied retrospectively in accordance with IAS 8. The objective of the amendments is to clarify the principles in IAS 1 for the classification of liabilities as either current or non-current. The amendments clarify the meaning of a right to defer settlement, the requirement for this right to exist at the end of the reporting period, that management intent does not affect current or non-current classification, that options by the counterparty that could result in settlement by the transfer of the entity's own equity instruments do not affect current or non-current classification. Also, the amendments specify that only covenants with which an entity must comply on or before the reporting date will affect a liability's classification. Additional disclosures are also required for non-current liabilities arising from loan arrangements that are subject to covenants to be complied with within twelve months after the reporting period. The amendments have not yet been endorsed by the EU.

- IFRS 16 Leases: Lease Liability in a Sale and Leaseback (amendments)

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with earlier application permitted. The amendments are intended to improve the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction in IFRS 16, while it does not change the accounting for leases unrelated to sale and leaseback transactions. In particular, the seller-lessee determines 'lease payments' or 'revised lease payments' in such a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use it retains. Applying these requirements does not prevent the seller-lessee from recognising, in profit or loss, any gain or loss relating to the partial or full termination of a lease. A seller-lessee applies the amendment retrospectively in accordance with IAS 8 to sale and leaseback transactions entered into after the date of initial application, being the beginning of the annual reporting period in which an entity first applied IFRS 16. The amendments have not yet been endorsed by the EU.

- Amendment in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28, in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. In December 2015 the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting. The amendments have not yet been endorsed by the EU.

8. REVENUE

	31-Dec-22	31-Dec-21
Revenue	2,108,067,217	1,857,278,622
Rental income	3,730,610	3,260,618
Total revenue	**2,111,797,827**	**1,860,539,240**

*Rental income includes rental of investment property lease in amount of RON 984,575 (Note 21).

Disaggregation of revenue from contracts with customers

	31-Dec-22	31-Dec-21
Distribution of goods	1,960,946,481	1,723,950,511
Logistics services	78,868,663	73,900,083
Transport services	68,252,073	59,428,028
Total	**2,108,067,217**	**1,857,278,622**

Disaggregation of revenue per country

	31-Dec-22	31-Dec-21
Romania	1,985,899,449	1,721,333,234
Germany	30,565,247	44,877,983
Netherlands	40,950,237	38,333,443
Other	50,652,284	52,733,962
Total	**2,108,067,217**	**1,857,278,622**

Timing of revenue recognition

	31-Dec-22	31-Dec-21
Products and services transferred at a point in time	2,010,050,684	1,760,797,563
Services transferred over time	98,016,533	96,481,059
Total	**2,108,067,217**	**1,857,278,622**

The Company has applied the practical expedient from IFRS 15:121 since the contracts are concluded on one year basis.

There are no customers with over 10% of total Revenues in year 2022.

9. OTHER INCOME

	2022	2021
Contractual penalties	290,448	215,227
Insurance compensations	3,235,591	2,478,246
Income from subsidies	125,664	232,229
Net gain on disposal of property, plant and equipment	1,381,206	722,147
Others	2,333,980	1,010,427
Total	**7,366,889**	**4,658,276**

10. OTHER OPERATING EXPENSES

	2022	2021
General consulting	10,591,022	7,501,871
Road taxes	10,265,160	10,361,446
Utilities	12,192,617	8,378,697
Audit and consulting	1,233,008	1,384,463
Bank commissions and similar charges	2,400,240	2,698,948
Commissions and fees	5,585,903	2,594,119
Compensations, fines and penalties	489,310	337,485
Current asset disposal expenses *	-	5,382,047
Handling and storage services	5,213,513	776,264
Insurance premiums	7,746,557	6,320,962
IT services	5,731,957	1,354,061
Marketing and publicity	2,057,748	1,096,359
Merchandising	5,593,073	4,862,915
Postage and telecommunications	651,340	567,746
Rental	2,090,876	5,922,686
Sanitation services	334,333	276,118
Security	1,745,669	1,522,569
Services charges (warehousing rent contracts)	3,327,019	1,823,576
Sponsorships	2,433,293	2,391,152
Trainings and other staff expenses	1,134,955	789,129
Travel	4,786,605	3,279,936
Waste disposal	1,181,092	1,107,364
Other operating expenses**	8,214,284	8,626,069
Total	**94,999,574**	**79,355,982**

*Current asset disposal expenses amount relates to inventory write down and in 2022 the amount is presented in Cost of goods sold and is RON 4,777,839.

**Other operating expenses in amount of RON 8,214 thousand include various expenses in amount of RON 5,974 thousand such as low value lease expenses, services related to archiving and digitalisation of documents for archiving purposes, logistics services, extra medical expenses, environmental fees, etc.

11. NET FINANCE COSTS

	31-Dec-22	31-Dec-21
Interest income *	7,391,897	1,364,802
Other finance income	178,219	44,761
Total finance income	**7,570,116**	**1,409,563**
Interest expense	(2,617,125)	(5,640,249)
Net foreign exchange losses	(585,655)	(347,799)
Other financial expenses	(217,823)	(3,483,648)
Total finance costs	**(3,420,603)**	**(9,471,696)**
Net finance costs	**4,149,513**	**(8,062,133)**

*Interest income includes interest related to related parties loans receivables in amount of RON 1,477,695 and interest from bank deposits in amount of RON 5,914,200.

12. EARNINGS PER SHARE

The calculation of basic and diluted earnings per share has been based on the following profit attributable to ordinary shareholders and weighted-average number of ordinary shares outstanding:

Profit attributable to ordinary shareholders

	31-Dec-22	31-Dec-21
Profit attributable to the owners of the Companies	78,003,363	63,551,608
Profit attributable to ordinary shareholders	**78,003,363**	**63,551,608**

Weighted-average number of ordinary shares (in number of shares)

	31-Dec-22	31-Dec-21 (Restated)
Issued ordinary shares at 1 January	**200,000,400**	**302,500**
Issues from 2021	-	199,697,900
Total issued ordinary shares	**200,000,400**	**200,000,400**
Issued ordinary shares at 23 Feb 2022	1,000,002,000	1,000,002,000
Weighted-average number of ordinary shares at 31 December	**1,198,922,400**	***1,137,976,167**

Earnings per share

Earnings per share	**31-Dec-22**	**31-Dec-21 (restated)**
Basic and diluted earnings per share (RON)	0.065	0.056

**Weighted average number of ordinary shares adjusted for the effect of premium issuance in February 2022.*

13. EMPLOYEE BENEFITS

Employee benefits payables and accruals at year-end are as follows:

	31-Dec-22	31-Dec-21
Wages and salaries	18,538,908	17,044,158
Social security contributions	5,654,326	5,060,193
Tax on salaries	1,090,796	951,095
Total payables and accruals at year-end	**25,284,030**	**23,055,446**

In Romania, all employers and employees, as well as other persons, are contributors to the state social security systems. The social security system covers pensions, allocations for children, temporary inability to work, risks of works and professional diseases and other social assistance services, unemployment benefits and incentives for employers creating new workplaces.

Employee benefit expenses are as follows:

	2022	2021
Wages and salaries	174,079,090	157,617,607
Per diem	13,196,771	12,547,002
Social contributions and charges	7,002,118	7,515,690
Meal tickets	14,668,644	9,127,998
Total employees benefits for the year	**208,946,623**	**186,808,297**

Management remuneration is disclosed in Note 29.

14. INCOME TAXES

In determining the amount of current and deferred tax, the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. The Company considers that the accounting records for taxes due are adequate for all open tax years, based on assessment made by management taking into account various factors, including the interpretation of tax legislation and previous experience. New information may become available that causes the Company to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

(i) Amounts recognised in profit or loss

	31-Dec-22	31-Dec-21
Current tax expense	14,892,937	9,708,997
Deferred tax income	(629,488)	(874,956)
Total income tax expense	**14,263,449**	**8,834,041**

14. INCOME TAXES (CONTINUED)

(ii) Reconciliation of effective tax rate

	2022		2021	
Profit before tax		92,266,812		72,385,649
Tax using Company's domestic tax rate	16%	14,762,690	16%	11,581,704
Legal reserve	-1%	(743,170)	-1%	(586,312)
Tax effect of non-deductible expenses	4%	3,610,155	1%	1,064,936
Tax credit – sponsorship and other fiscal benefits	-4%	(3,470,692)	-2%	(1,201,064)
Tax - exempt income	0%	104,466	-2%	(1,317,390)
Other fiscal adjustments*	0%	-	-1%	(707,833)
Income tax	**15%**	**14,263,449**	**12%**	**8,834,041**

*Other fiscal adjustments (2021): relates to the fiscal impact of IFRS transition (unfavorable), recognition in equity of IPO costs (favorable)

(iii) Movement in deferred tax balances

			Balance at 31 December 2022		
2022	**Net balance at 1 January 2021**	**Recognized in profit or loss**	**Net**	**Deferred tax assets**	**Deferred tax liabilities**
Property, plant and equipment*	(239,726)	(142,900)	(382,626)	-	(382,626)

Employee benefits	1,204,247	120,597	1,324,844	1,324,844	-
Tax assets / (liabilities) before set-off	**2,711,302**	**629,488**	**3,340,790**	**3,723,415**	**(382,626)**
Set off of tax	-	-	-	-	-
Net tax assets / (liabilities)	**2,711,302**	**629,488**	**3,340,790**	**3,723,415**	**(382,626)**

				Balance at 31 December 2021		
2021	**Net balance at 1 January 2021**	**Recognised in profit or loss**	**Merger impact (Note 31)**	**Balance at 31 December 2021**	**Deferred tax assets**	**Deferred tax liabilities**
Property, plant and equipment*	1,363,730	1,288,700	(1,317,885)	1,334,545	1,334,545	
Fair value adjustment of PPE at first time adoption*	(1,339,244)	56,768	(291,795)	(1,574,271)		(1,574,271)
Intangible assets	-	330,295	(330,295)	-		
Leases	-	(1,160,829)	1,160,829	-		
Impairment of trade receivables	1,212,023	83,866	450,891	1,746,781	1,746,781	
Employee benefits	850,439	276,156	77,652	1,204,247	1,204,247	
Net tax assets / (liabilities)	**2,086,948**	**874,956**	**(250,603)**	**2,711,303**	**4,285,573**	**(1,574,271)**

*Starting with 2022, the fair value adjustment of Property plant and equipment at first time adoption is presented net with Property plant and equipment and the Deferred tax asset/liability is net-off accordingly.

15. INVENTORIES

	31-Dec-22	31-Dec-21
Consumables	871,914	730,636
Goods for resale	152,591,710	128,842,085
Impairment loss	(981,879)	(1,210,022)
Total inventories	**152,481,745**	**128,362,699**

Cost of inventories recognized as an expense in the statement of profit or loss in 2022 is RON 1,561,314,618 (2021: RON 1,394,748,837). The inventory impairment allowance recognized during the year is presented below:

	31-Dec-22	31-Dec-21
Balance as at 1 January	**1,210,022**	**383,422**
Allowance charge	2,368,793	826,600
Release/consumption of allowance	(2,596,936)	-
Balance as at 31 December	**981,880**	**1,210,022**

16. TRADE RECEIVABLES

	Note	31-Dec-22	31-Dec-21
Trade receivables from third parties, gross		257,732,346	214,252,740
Trade receivables from related parties, gross	30	10,824,531	5,842,129
Discounts accrued granted to customers		(18,945,097)	*(23,196,455)
Loss allowance		(14,991,076)	(10,917,380)
Total trade receivables, net		**234,620,704**	**185,981,034**

*The comparative figures as of 31 December 2021 were reclassified in accordance with the re-assessment of legal rights. The amount of (RON 18,945 thousand) as of 31 December 2022 is deducted from Trade receivables, while RON 23,196 thousand for Company, representing refund liabilities were reported as of 31 December 2021 under the category Trade payables and now, the amount of (RON 23,196 thousand) is included under Trade receivables, as reduction of Trade receivables. Please refer to Note 6 (x) Changes in presentation.

Short term trade receivables from related parties are presented in Note 29. The Company's exposure to credit risk is influenced by the individual characteristics of each customer. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position.

The following table details the risk profile of trade receivables based on the Company's provision matrix. As the Company's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Company's different customer segments:

	31 December 2022			
	Weighted average rate of losses	Gross value	Bad debt loss allowance	Net trade receivables
Neither past due nor impaired	1.03%	186,985,197	(1,934,289)	185,050,908
Past due 1-30 days	4.55%	43,282,430	(1,967,923)	41,314,507
Past due 31-60 days	24.42%	4,370,556	(1,067,296)	3,303,260
Past due 61-90 days	49.91%	3,787,269	(1,890,272)	1,896,997
Past due more than 90 days	72.69%	11,186,328	(8,131,294)	3,055,034
Total		**249,611,780**	**(14,991,076)**	**234,620,704**

16. TRADE RECEIVABLES (CONTINUED)

	Weighted average ECL rate	Gross value	Bad debt allowance	Net trade receivables
Neither past due nor impaired	1.16%	150,314,131	(1,742,916)	148,571,215
Past due 1-30 days	4.93%	33,426,499	(1,647,563)	31,778,936
Past due 31-60 days	27.99%	5,382,749	(1,506,669)	3,876,080
Past due 61-90 days	54.92%	2,256,037	(1,238,921)	1,017,116
Past due more than 90 days	86.63%	5,518,998	(4,781,312)	737,686
Total		**196,898,414**	**(10,917,380)**	**185,981,034**

The movement in the loss allowance for trade receivables is as follows:

	31-Dec-22	31-Dec-21
Balance as at 1 January	**10,917,380**	**8,831,252**
Merger impact	-	5,123,166
Amounts written off	(925,497)	(867,073)
Impairment recognized (reversed)*	4,999,193	(2,169,965)
Balance as at 31 December	**14,991,076**	**10,917,380**

*Expected credit losses as reported in SOCI in amount of RON 19,807,565 includes trade receivables impairment RON 4,999,193 and loans to related parties impairment in amount of RON 14,808,372 (Note 22).

Out of the total RON 4,999,193 impairment recognized during the year, RON 4,016,174 refers to Nordexim SRL (Note 30).

17. OTHER RECEIVABLES AND PREPAYMENTS

17(a) Other receivables

	31-Dec-22	31-Dec-21
Receivable from medical leaves	390,150	2,290,181
Advances to employees	-	272,924
Other receivables	847,227	1,369,537
Total	**1,237,377**	**3,932,642**

17(b) Prepayments

As at 31 December 2022, prepayments in amount of RON 28,507,578 include advances to suppliers for inventory acquisitions in amount of RON 20,911,150. As at 31 December 2021, advances to suppliers for inventory acquisitions in amount of RON 25,402,201 have been presented under line ''Other receivable'' and have been reclassified during 2022 under the Prepayments line.

18. CASH AND CASH EQUIVALENTS AND SHORT TERM DEPOSITS

18(a) Cash and cash equivalents

	31-Dec-22	31-Dec-21
Bank current accounts	15,611,084	36,254,161
Cash in hand	72,587	56,191
Promissory notes and cheques in bank	-	720,475
Total cash and cash equivalents	**15,683,671**	**37,030,827**

18(b) Short term deposits

Balance presented of RON 160,000,000 relates to part of the amounts received from the IPO which were placed in short term deposits (6 month term – 150,000,000) and (3 month term 10,000,000). The short term deposits have maturities between 3 to 6 months and the interest received is between 8.2% and 9%.

Balance presented at 31 December 2021 of RON 195,000,000 relates to part of the amounts received from the IPO which were placed in short term deposits (6 months term – 190,000,000) and (3 months term 5,000,000). The short-term deposits have maturities between 3 to 6 months and the interest received is between 2.5% and 2.9%.

19. PROPERTY, PLANT AND EQUIPMENT

The movements in property, plant and equipment in 2022 and 2021 were as follows:

	Land and buildings	Plant and equipment	Fixtures and fittings	Construction in progress	Total
Gross carrying amount					
Balance at 1 January 2021	**157,343,603**	**187,215,624**	**14,271,856**	**362,132**	**359,193,215**
Merger impact (Note 31)	22,600,559	15,137,894	418,320	-	38,156,773
Additions	5,756,586	14,689,597	232,068	1,905,974	22,584,225

20. INTANGIBLE ASSETS AND GOODWILL (CONTINUED)

Following the acquisition of AGRIROM SRL by AQUILA PART PROD COM SA, the Company mainly recognised goodwill of RON 5,011,706 and brands of RON 2,698,926 (Agrirom's brands for food products: Gradena, Yachtis, LaMasa and Frisco).

As at 31 December 2022 and as at 31 December 2021, the Company performed an impairment analysis for the goodwill, which allocated to the CGU formed by the distribution and trade with food, beverages and tobacco performed by AGRIROM SRL.

Based on the analysis, the goodwill is not impaired as at 31 December 2022 and as at 31 December 2021.

The recoverable amount of the goodwill is determined based on a value in use calculation for uses cash flow projections based on financial budgets covering a three-year period and a pre-tax WACC of 12.6% per cent per annum, growth rate of 2.5%.

The key assumptions used by management in setting the financial budgets for the initial three-year period were as follows:

- Forecast sales growth rates
- Operating profits

Operating profits are forecast based on historical experience of operating margins, adjusted for the impact of current trends of reduction followed by a slower increase trend in coming years.

- Cash conversion

Cash conversion is the ratio of operating cash flow to operating profit. Management forecasts cash conversion rates based on historical experience.

Cash flows beyond that five-year period have been extrapolated using a steady 2.5% per cent per annum growth rate. Changes by 1% of the assumptions used such as WACC, growth in perpetuity does not lead to impairment. Brands have been recognised at fair value at the acquisition date.

Investment property comprises of land and buildings of AQUILA PART PROD COM SA which are rented to third parties. The company performs internal valuations to determine if the fair values of investment properties are materially different versus the cost less accumulated depreciation and any impairment losses whenever conditions could imply a significant change in values.

21. INVESTMENT PROPERTY (CONTINUED)

The company performed internal valuation and determined that value were not significantly chaged in 2022 and 2021 and is not significantly different compared to carrying amount.

(b) Amounts recognised in profit or loss

	2022	2021
Income-generating property	984,575	3,260,618

22. LOANS TO RELATED PARTIES AND LONG-TERM RECEIVABLES FROM RELATED PARTIES

The Company has loans to related parties and long term receivables from receivables which are considered purchased or originated credit-impairment financial assets ("POCI").

(a) Loans to related parties

	31-Dec-22	31-Dec-21
Novadex	12,645,536	15,121,550
Aquila Agricola	6,660,195	7,157,250
Best Coffee Solutions	2,937,655	3,503,183
Nordexim	14,981,815	32,774,621
Aquila Trade Solutions	-	239,481
Total	**37,225,201**	**58,796,085**
Short-term portion	**3,591,648**	**6,672,010**
Long-term portion	**33,633,553**	**52,124,075**

(i) Novadex – contract with Novadex was concluded in 2007 for an original amount of RON 2,500,000 and an original maturity of 2 years. Subsequently the contract's maturity was extended annually with another 12 months. Also the loan limit amount was increased multiple times up to the current limit of RON 25,000,000. The loan purpose was financing of operating and investing activities (acquisition of property, plant and equipment).

On 31 December 2020, an addendum was signed to the contract for extension of maturity to 31 December 2028. As per addendum the loan has been converted in EUR and is payable in quarterly tranches, with an interest of 1.8 pa and it is not secured. In 2022 the loan was collected according to the repayment schedule. For the year ended 2022, no additional ECL have been booked after a review of the loan.

(ii) Nordexim - On 31 December 2020, the Company converted the trade receivables into a loan with a maturity of 10 years, until 31 December 2030, repayable in quarterly tranches, with an interest of 1.8 p.a. The loan is not secured and is denominated in EUR.
In 2022 the loan was collected according to the repayment schedule, Nordexim's financial evolution and related results was assessed as not in line with prior expectations.
Considering the significant decrease in equity value, which was computed considering a WACC of 12.65% and a growth rate of 2.6% for the terminal value, a loan review was performed. The Expected Credit Loss calculation indicated additional cash shortfalls discounted at the original credit adjusted effective interest rate of RON 14,808,372.

22. LOANS TO RELATED PARTIES AND LONG-TERM RECEIVABLES FROM RELATED PARTIES (CONTINUED)

(iii) Aquila Agricola - contract with Aquila Agricola was concluded in 2007 for an original amount of RON 150,000 and original maturity of 31 December 2008. Subsequently the contract's maturity was extended annually with another 12 months. Also the loan limit amount was increased multiple times up to the current limit of RON 15,000,000.

The loan purpose was financing of operating and investing activities (acquisition of property, plant and equipment).

On 31 December 2020, an addendum was signed to the contract for extension of maturity to 31 December 2030. As per addendum the loan has been converted in EUR is payable in quarterly tranches, with an interest of 1.8 pa and it is not secured. In 2022 the loan was collected according to the repayment schedule. For the year ended 2022, no additional ECL have been booked after a review of the loan.

(iv) Aquila Trade solution - loan granted in 2012 for working capital and in 2022 the entire amount was impaired.

(v) Best Coffee Solutions - the contract with Best Coffee Solutions was concluded in 2016 for an original amount of RON 1,000,000 and original maturity of 30 June 2013. Subsequently the contract's maturity was extended annually with another 12 months. Also the loan limit amount was increased multiple times up to the current limit of RON 7,000,000.

The loan purpose was financing of operating and investing activities (acquisition of property, plant and equipment).

On 31 December 2020, an addendum was signed to the contract for extension of maturity to 31 December 2030. As per addendum the loan has been converted in EUR is payable in quarterly tranches, with an interest of 1.8 pa and it is not secured. In 2022 the loan was collected according to the repayment schedule. For the year ended 2022, no additional ECL have been booked after a review of the loan.

The loans to related parties are classified as POCI financial assets, as a result the Company measures the loss allowance for loans receivables at an amount equal to lifetime ECL. The expected credit losses on loans to related parties are determined based on the expected cash inflow to be obtained from each debtor until the end of 2030, based on the projected future cash flows of the debtors. The future cashflow projections have incorporated judgement and estimates considering historical performances of the related parties as well as expected reasonable future changes based on the information available as at the date of the preparation of these financial statements.

On initial recognition, POCI assets do not carry an impairment allowance. Instead, lifetime ECLs are incorporated into the calculation of the effective interest rate.

If a financial asset is purchased or originated credit-impaired then at the reporting date only the cumulative changes in lifetime expected credit losses since initial recognition are recognised as a loss allowance. The expected future credit losses are assessed using the effective interest rate.

Additional impairment loss recognised in 2022 on Nordexim loan:

	31-Dec-22	31-Dec-21
Opening balance	**32,774,621**	**33,923,738**
Repayment	(2,955,525)	(1,973,800)
Additional loss recognized	(14,808,372)	-
Impact of re-evaluation (foreign exchange)	(28,908)	824,683
Closing balance	**14,981,816**	**32,774,621**

23. CAPITAL AND RESERVES

(a) Share capital

As at 31 December 2022, the share capital is of RON 180,590,088 (31 December 2021: 30,589,788) and includes the effect of restatement required by the application of IAS 29 Financial Reporting in Hyperinflationary Economies until 31 December 2003. The reconciliation of share capital is as follows:

Share capital (nominal value)	30,000,060
Restatement adjustment in accordance with IAS 29	589,728
Restated share capital balance as at 31 December 2021	**30,589,788**

Share capital (nominal value)	180,000,360
Restatement adjustment in accordance with IAS 29	589,728
Restated share capital balance as at 31 December 2022	**180,590,088**

The number of shares of the Company was as follows:

		RON		**Ordinary shares**	
Number of shares	**Note**	**2022**	**2021**	**2022**	**2021**
In issue at 1 January		**30,589,788**	**3,614,728**	**200,000,400**	**302,500**
Share issuance at RON 10		-	16,975,040	-	1,697,504
Share split RON 10 to RON 0.15		-	-	-	131,333,596
Share issuance at RON 0.15		-	10,000,020	-	66,666,800
Share increase from incorporation of share premium	**12**	150,000,300	-	1,000,002,000	-
In issue at 31 December – fully paid	**12**	**180,590,088**	**30,589,788**	**1,200,002,400**	**200,000,400**

The par value of the shares is RON 0.15 as at 31 December 2022 and 31 December 2021. New shares issued in 2022 were presented in Note 1. All ordinary shares rank equally with regard to the above companies' residual assets.

Holders of ordinary shares are entitled to dividends as declared from time to time, distributed from the statutory profits and are entitled to one vote per share at general meetings of the above companies. The above companies recognize changes in share capital only after their approval in the General Shareholders Meeting and their registration by the Trade Register.

(b) Legal reserves

Legal reserves are set up as 5% of the gross profit for the year as per statutory individual financial statements of the Romanian companies, until the total legal reserves reach 20% of the paid-up nominal share capital of each company, according to the legislation. These reserves are deductible for income tax purposes and are not distributable. As of 31 December 2022, in line with net profits achieved, the company increased legal reserve with 5% representing RON 4,644,815.

Legal reserves were restated according to IAS 29 Financial Reporting in Hyperinflationary Economies until 31 December 2003 (the adjustment for the effect of hyperinflation amounts to RON 110,255 RON as at 31 December 2022, 31 December 2021).

(c) Own Shares

The balance of RON 991,972 relates to 180,000 own purchased shares.

23. CAPITAL AND RESERVES (CONTINUED)

(d) Dividends

The Company may distribute dividends from statutory earnings only, as per separate financial statements prepared in accordance with statutory accounting regulations. The dividends declared by the Company were as follows:

	31-Dec-22	31-Dec-21
To the owners of the Company	84,548,003	21,395,289
Total	**84,548,003**	**21,395,289**
Weighted-average number of ordinary shares at 31 December (Note 8)	1,198,922,400	1,137,976,167
Dividend per share	**0.065**	**0.056***

*Weighted average number of ordinary shares adjusted for the effect of premium issuance in February 2022.

Out of the dividends declared by the Company, the dividends paid were RON 84,548,003 in 2022 and RON 21,395,289 in 2021. In the period January to August 2021, the shareholders of the Company approved the distribution of dividends of RON 21,395,289 as follows: January (RON 3,076,738), March (RON 3,252,632) and August (RON 15,065,919) before the IPO.

In 2022 the shareholders of the Parent approved the distribution of dividends of RON 84,548,003.

(e) Capital management

The Company manages its capital such as to make sure that the Company will be able to continue as a going concern and to maximize the profits for the shareholders, by optimization of the balances of liabilities and equity.

The structure of the Company's capital comprises liabilities, which include borrowings, cash and cash equivalents, and equity attributable to the owners of the Company. Equity comprises share capital, reserves and retained earnings.

The Company's capital risk management includes a regular review of the equity structure. As part of this review, management considers the cost of equity and the risk associated to each class of equity. The Company balances its general structure of capital by the payment of dividends, by issuance of new shares, as well as by contracting new liabilities or extinguishing the existent ones.

The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total equity. Net debt is calculated as total borrowings less cash and cash equivalents.

In RON	Note	31-Dec-22	31-Dec-21
Borrowings and lease liabilities	**26**	125,241,512	71,304,160
Less: Cash and bank equivalents	**18**	(15,683,671)	(37,030,827)

Balance at 31 December 2022	**2,050,921***	**-**	**123,190,591**

*Balance of long term borrowing as at 31 December 2022 is RON 2,050,921, current portion.

27. LEASES

(a) Leases as lessee

On assessing the application of IFRS 16 Leases, the Company considered the following criteria to determine whether the arrangements contain any leases:

a) The lessee has the right to obtain substantially all of the economic benefits from using the asset throughout the period of use; and

b) The lessee has the right to direct the use of the identified asset throughout the period of use.

The Company leases warehouse and office space. The leases typically run for a period of 5 to 10 years. Additionally, the Company leases transport vehicles. The leases typically run for a period of 5 years. Majority of these leases transfer the ownership of the underlying asset at the end of the lease term.

In case of leases without transfer of ownership of underlying asset at the end of the lease term, only part of these leases include renewal options, which may be applied if the Company announces the lessor with at more than 12 months in advance of the original lease term. The renewal and the extension of the term has to be agreed by both parties through signing an addendum to the contract. Considering that both the renewal and the additional lease term has to be approved also by the lessor, the Company did not consider any renewal option when determining the lease term.

The Company determined the incremental borrowing rate based on the interest rate applied by the financial institution to similar entities for loans with the same characteristics as the lease contracts (in terms of currency and term).

The Company does not include in the lease payments costs incurred in connection with the lease that are not part of the cost of the right-of-use asset (such as maintenance or insurance). Information about leases for which the Company is a lessee is presented below.

27. LEASES (CONTINUED)

(i) ***Right-of-use assets***

Right-of-use assets related to leased properties that do not meet the definition of investment property are presented as property, plant and equipment.

2021	**Land and buildings**	**Equipment (Transport vehicles)**	**Total**
Balance at 1 January	**52,338,005**	**34,779,020**	**87,117,025**
Depreciation charge for the year	(23,608,988)	(15,185,207)	(38,794,196)
Merger impact (Note 31)	6,997,633	2,026,482	9,024,115
Additions to right-of-use assets	2,984,093	9,389,577	12,373,670
Change of right-of-use assets	2,772,003	543,024	3,315,027
Balance at 31 December	**41,482,745**	**31,552,896**	**73,035,641**

In 2022 the term several rent contracts classified as leasing under IFRS was extend (and/or rented surface change) with a new term period, this resulted in recognition of additional right of use assets as presented below:

2022	**Land and buildings**	**Equipment (Transport vehicles)**	**Total**
Balance at 1 January	**41,482,745**	**31,552,896**	**73,035,641**
Depreciation charge for the year	(25,369,728)	(14,981,330)	(40,351,058)
Additions to right-of-use assets	85,143,266	13,534,579	98,677,845
Decrease	-	(1,726,869)	(1,726,869)
Balance at 31 December	**101,256,283**	**28,379,276**	**129,635,559**

(ii) ***Amounts recognised in profit or loss***

	Note	**31-Dec-22**	**31-Dec-21**
Interest on lease liabilities	**11**	2,617,125	2,207,226
Expenses related to short term lease and low value lease	**10**	2,090,875	5,922,686

(iii) ***Amounts recognised in statement of cash flows***

	31-Dec-22	**31-Dec-21**
Total cash outflows for leases	(41,751,176)	(41,943,772)
Total interest paid	(1,984,358)	(2,207,226)

(b) Leases as lessor

The Company leases out its investment property consisting of its owned properties. All leases are classified as operating leases from a lessor perspective, because they do not transfer substantially all of the risks and rewards incidental to the ownership of the assets. The Company ensures via contractual clauses that property rights are retained by the lessor and lessees are required to returned the assets leased in the same condition as when taken under lease.

The following table sets out a maturity analysis of lease payments, showing the undiscounted lease payments to be received after the reporting date:

27. LEASES (CONTINUED)

	31-Dec 2022	31-Dec 2021
Less than one year	984,575	410,956
One to two years	787,321	392,830
Two to three years	783,464	331,912
Three to four years	723,589	247,452
Four to five years	723,589	247,452
More than five years	1,414,494	247,452
Total	**5,417,031**	**1,878,054**

For the previous reporting periods the Company did not have investment property leased as a lessor.

28. INVESTMENTS IN SUBSIDIARIES

	31-Dec 2022	31-Dec 2021
Investment in Printex	3,523,057	3,523,057
Investment in Trigor	22,400,000	22,400,000
Investments in subsidiaries	**25,923,057**	**25,923,057**

The investments in subsidiares are represented by the Company's investments in Printex S.R.L and Trigor AVD S.R.L. In 2021 Agrirom merged with the Company. At 19 May 2021 the Company obtained control over Trigor AVD S.R.L. while Printex was the Company subsidiary since transition to IFRS, as adopted by EU.

At 31 December 2022, the Company's management conducted a review of the indicators of impairment of subsidiaries. Following this analysis, no impairment indicators were identified for any of the subsidiaries.

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT

(a) Accounting classifications and fair values

For the purchased or originated credit-impaired financial assets, loans to related parties and long term trade receivables from related parties, the net carrying amount of the financial assets represents an approximation of fair value. For the bank borrowings, the incremental costs are not material, interest is based on variable interest rates and carrying amount approximates fair value.

(b) Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- credit risk;
- liquidity risk; and
- market risk

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT

(i) ***Credit risk***

(b) Financial risk management (continued)

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers, long term trade receivables from related parties and loans granted to related parties.

The carrying amounts of financial assets represent the maximum credit exposure

The Company's current credit risk grading framework comprises the following categories, under the IFRS 9 requirements:

Category	Description	Basis for recognising expected credit losses (ECL)
Performing	The counterparty has a low risk of default and does not have an overdue of more than 30 days past due.	Lifetime ECL (simplified model)– provision matrix
Doubtful	Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL (simplified model)– provision matrix
In default	Amount is >90 days past due or there is evidence indicating the asset is credit-impaired	Lifetime ECL (simplified model)– provision matrix
POCI	Purchased or originated credit impaired financial assets	Lifetime ECL
Write off	There is evidence indicating that the debtor is in severe financial difficulty and the Company has no realistic prospect of recovery.	Amount is written off

There are no significant movements between stages as of end of reporting dates.

The tables below detail the credit quality of Company's financial assets, as well as the Company's maximum exposure to credit risk:

31 December 2021	Note	12-month or lifetime ECL	Gross carrying amount	Loss allowance	Net carrying amount
Loans to related parties	22	Lifetime ECL (credit impaired)	58,796,085		58,796,085
Trade receivables	16	Lifetime ECL (simplified model)	196,898,414	(10,917,380)	185,981,034
			255,694,499	**(10,917,380)**	**244,777,119**

31 December 2022	Note	12-month or lifetime ECL	Gross carrying amount	Loss allowance	Net carrying amount
Loans to related parties	22	Lifetime ECL (credit impaired)	52,033,573	(14,808,372)	37,225,201
Trade receivables	16	Lifetime ECL (simplified model)	249,611,780	(14,991,076)	234,620,704
			301,645,353	**(29,799,448)**	**271,845,905**

For loans to related parties and long-term trade receivables from related parties, which are classified as POCI financial assets, the Company has determined the loss allowance based on the expected cash inflow to be obtained from each debtor until the end of 2030, based on the projected future cash flows of the debtors. Note 22 includes further details on the loss allowance for these assets.

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT

(b) Financial risk management (continued)

The loans contracts were concluded during 2007 – 2013, initially with a maturity of 12 months. Subsequently, the loans were prolonged annually for another 12 months. On 31 December 2020, the Company concluded an addendum with each debtor for restructuring of the loans – modifying the maturity to 31 December 2030 and changing the currency of the loans from RON to EUR.

(ii) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company aims to maintain the level of its cash and cash equivalents at an amount in excess of expected cash outflows on financial liabilities. The Company also monitors the level of expected cash inflows on trade receivables together with expected cash outflows on trade and other payables. In addition, the Company maintains credit facilities for financing of the operating expenses (please see Note 26).

Exposure to liquidity risk

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments and exclude the impact of netting agreements.

		Contractual cash flows				
Financial liabilities	**Carrying amount**	**Total**	**Less than 1 year**	**1 - 2 years**	**2 - 5 years**	**More than 5 years**
31-Dec-22						
Long-term bank borrowings	2,050,921	2,050,921	2,050,921	-	-	-
Lease liabilities	123,190,591	123,190,591	32,612,024	25,138,970	49,199,686	16,239,911
Trade payables	194,814,420	194,814,420	194,754,754	59,666	-	-
Total	**320,055,932**	**320,055,932**	**229,417,699**	**25,198,636**	**49,199,686**	**16,239,911**
31-Dec-21

Total	**268,977,887**	**268,977,887**	**234,428,541**	**20,713,146**	**10,933,287**	**2,902,913**

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(b) Financial risk management (continued)

(ii) ***Liquidity risk (continued)***

Liquidity risk ratios

	Note	31-Dec 2022	31-Dec 2021
Current assets		596,122,723	589,802,625
Current liabilities		270,768,774	269,578,301
Current ratio		**2.2**	**2.19**
Cash and cash equivalents	**18**	15,683,671	37,030,827
Trade receivables	**16**	234,620,704	185,981,034
Current liabilities		270,768,774	269,578,301
Quick ratio		**0.92**	**0.83**

(iii) Market risk

Market risk is the risk that changes in market prices, foreign exchange rates and interest rates – will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Currency risk

The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated and the functional currency of the Company. The functional currency of all Company entities is the Romanian Leu (RON).

The currency in which these transactions are primarily denominated is the functional currency. Certain liabilities are denominated in foreign currency (EUR). The Company also has deposits and bank accounts denominated in foreign currency (EUR and USD). The Company 's policy is to use the local currency in its transactions as far as practically possible. The Company does not use derivative or hedging instruments.

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(b) Financial risk management (continued)

(iii) ***Market risk (continued)***

Exposure to currency risk

The summary quantitative data about the Company's exposure to currency risk is as follows:

Amounts in RON	Note	RON	EUR	USD	GBP	PLN	CHF	Total
31-Dec-2021								
Cash and cash equivalents	**18**	20,888,985	16,125,920	4,745	10,217	960		37,030,827

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(b) Financial risk management (continued)

(iii) ***Market risk (continued)***

Currency risk (continued)

The following significant exchange rates have been applied:

	Average rate		Year-end spot rate	
RON	**2022**	**2021**	**2022**	**2021**
EUR 1	4.9315	4.9204	4.9474	4.9481
USD 1	4.6885	4.1604	4.6346	4.3707
GBP 1	5.7867	5.7233	5.5878	5.8994
CHF 1	4.9096	4.5515	5.0289	4.7884
PLN 1	1.0528	1.078	1.0557	1.0768
HUF 1	1.2648	1.3733	1.2354	1.3391

Sensitivity analysis

A reasonably possible strengthening (weakening) of RON against EUR, MDL, USD, GBP and CHF as at 31 December would have affected the measurement of financial instruments denominated in a foreign currency and affected profit of loss before tax by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant.

Effect in RON	Profit or loss before tax	
	Strengthening	**Weakening**
31-Dec-22		
EUR (3% movement)	4,524,209	(4,524,209)
USD (6% movement)	87,283	(85,818)
GBP (5% movement)	(582)	637
CHF (8% movement)	1,875	(1,810)
PLN (3% movement)	8,624	(8,345)
HUF (7% movement)	134,909	(134,909)
31-Dec-21		
EUR (3% movement)	(1,561,892)	1,561,892
USD (6% movement)	(58,128)	58,128
GBP (5% movement)	965	(965)
CHF (8% movement)	(1,415)	246
PLN (3% movement)	19,559	(19,559)
HUF (7% movement)	(485,909)	485,909

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(b) Financial risk management (continued)

(iii) ***Market risk (continued)***

Interest rate risk

The Company is exposed to interest rate risk mainly in relation to loans and borrowings bearing variable interest rate.

Exposure to interest rate risk

The interest rate profile of the Company's interest-bearing financial instruments is as follows:

In RON	**31-Dec 2022**	**31-Dec 2021**
Fixed-rate instruments		
Financial liabilities (borrowings and leases)	(123,190,591)	(66,791,494)
Variable-rate instruments		
Financial liabilities (borrowings)	(2,050,921)	(4,512,666)

Fair value sensitivity analysis for fixed-rate instruments

The Company does not account for any fixed-rate financial assets or financial liabilities at FVTPL and the Company does not use derivatives. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) profit or loss before tax by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

Effect in RON	**Profit or loss before tax**	
	100 bp increase	**100 pp decrease**
31-Dec-22		
Variable-rate instruments	(20,509)	20,509
Cash flow sensitivity	**(20,509)**	**20,509**
31-Dec-21		
Variable-rate instruments	(45,127)	45,127
Cash flow sensitivity	**(45,127)**	**(45,127)**

29. FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

(iv) ***Non-financial risks***

Cyber-security risk

In 2022, the Company was subject to an attempt to gain unauthorized access to the computer network and systems, which did not result in major operational disruptions and have not had a material adverse effect, however this kind of events may occur in the future.
The Company continuously improves cyber security capabilities and supervise the cyber security activity, ensuring the protection of the confidentiality, integrity and availability of data. Also, the Company continuously educates their employees and partners about cyber security risk and supports them to act in a responsible way.

Climate change risk

The Company constantly monitors the latest government legislation in relation to climate related matters, as well as the developments in the sector with respect to green energy.
The Separate Financial Statements take into account the main climate-related developments and risks associated with the transformation, which also include the climate targets for 2026 agreed at IPO – 10% reduction in carbon footprint

The main measure taken by the Company to reduce the impact on the environment:
- Photovoltaic plants: investments of RON 1,090,000 in the expansion of photovoltaic plants inaugurated in the spring of 2022 and
- in a new unit aimed at the Aquila headquarters, both with a total capacity of 262 kW.

Other measures to reduce the impact on the environment in 2023: new cars with lower polluting emissions (LPG, hybrid, gasoline) - 48 units and vans euro 6 - 12 units. The Company considers within its investments plans for the next 3 years the installation of photovoltaic panels and at the Aquila administrative headquarters.
Given the complexity of climate modelling, the investment scenarios are reviewed periodically to reflect new information, with developments in the periods between updates being reflected in updated internal long-term price outlooks.

In this context, estimates and management judgements relate in particular to assumptions regarding future legal regulations and developments in the market green energy utilisation.

30. RELATED PARTIES

(a) Main shareholders

As of December 31, 2022, the shareholders of AQUILA PART PROD SA are Mr. Vasile Constantin Catalin and Mr. Dociu Alin Adrian, each with a shareholding of 33.3% and a number of other shareholders holding 33.4% of the shares.

(b) Management remuneration

	2022	**2021**
Executive management compensation	9,934,870	7,296,091

30. RELATED PARTIES (CONTINUED)

(c) Balances with related parties

Parties are considered to be related of one party has the ability to control the other party of to exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of relationship, not merely the legal form.

The table below presents the nature of the related parties relationship and transactions for those related parties with whom the Company entered into significant transactions or had significant balances outstanding:

Related Party	Relationship	Nature of transactions
Aquila Construct	Common shareholder	Rent, receiving of services
Best Coffee Solutions	Common shareholder	Loan granting, sales of goods
Best Distibution	Common shareholder	Purchases or sales of goods
Aquila Agricola	Common shareholder	Loan granting, rendering of services
Novadex	Common shareholder	Loan granting, rent
Nordexim	Common shareholder	Loan granting, purchases or sales of goods
Aquila Asig	Common shareholder	Rendering of services
Total Green Energy	Common shareholder	No transactions in current period
Potential Construct	Common shareholder	No transactions in current period
Aquila Trade Solution	Common shareholder	No transactions in current period
Aquila Ag	Common shareholder	Rent
Epernon Limited	Common shareholder	No transactions in current period

(e) Loans to related parties

The Company has significant loans granted to related parties. Related balances, finance income and losses are disclosed in Note 22.

31. LEGAL MERGER

On 22 February 2019 AQUILA PART PROD COM SA acquired 100% of the shares and voting interest in AGRIROM SRL, dealing in import and distribution of frozen food products in Romania, gaining control over this entity. The transfer of shares has been made operated in the Trade Register on 27 February 2019.

Agrirom SRL was subsequently legally merged into AQUILA PART PROD COM SA as at 1 January 2021.

The primary reason of the legal merger of AGRIROM SRL (Agrirom) into AQUILA PART PROD COM SA (Aquila) was the improving of overall operations' profitability as both companies had similar business interests in terms of product and customer portfolios. Specifically, prior to the transaction date both companies were active in the food-service and food-product retail segments, competing over the same market.

For the merger, Aquila applied the accounting policy 6 (r), whereas the separate financial statements of the parent are a continuation of the Group consolidated financial statements. Hence, the values recognised in the consolidated financial statements become the cost of these assets for the parent. The acquired assets (including investments in subsidiaries, associates, or joint ventures held by the merged subsidiary) and assumed liabilities are recognised at the carrying amounts in the consolidated financial statements as of the date of the legal merger. This includes any associated goodwill, intangible assets, or other adjustments arising from measurement at fair value upon acquisition that were recognised when the subsidiary was originally acquired, less the subsequent related amortisation, depreciation, impairment losses, as applicable.

The financial results of 2021 and 2022, subsequent to the integration of Agrirom food-service business line into Aquila, had proved that the business assumptions on which the merger decision was based had been correct.

Acquired assets and liabilities assumed as at legal merger date

The following table summarises the recognised amounts of assets acquired and liabilities assumed at the date of merger, based on their fair values and including restatement adjustment for transition to IFRS.

	Note	**RON**
Property, plant and equipment	**19**	14,560,700
Intangible assets	**20**	2,064,341
Goodwill	**20**	5,011,706
Investment property	**21**	8,086,604
Investments		111,273
Inventories		25,839,123
Trade receivables		29,323,858
Other receivables		1,496,178
Cash and cash equivalents		217,906
Prepayments		149,907
Lease liability	**27**	(10,741,262)
Deferred tax liabilities	**14**	(250,603)
Short-term bank borrowings		(22,206,082)
Lease liability – current		(2,545,589)
Income tax payable		(414,787)
Trade payables - current		(32,349,353)
Employee benefits - current		(1,689,561)
Other payables - current		(2,037,898)
Total net assets at merger date		**14,626,461**

The difference between the amounts assigned to the assets and liabilities in the parent's separate financial statements after the legal merger (14,626,461 RON) and the carrying amount of the investment in the merged subsidiary before the legal merger (13,554,315 RON) is recognised directly in equity, through retained earnings.

The following table summarizes the impact in the equity of Aquila as at merger date 1 January 2021:

Legal reserves	107,000
Retained earnings	965,146
Total impact	**1,072,146**

32. CONTINGENCIES

Fiscal environment

Tax audits are frequent in Romania, consisting of detailed verifications of the accounting records of tax payers. Such audits sometimes take place after months, even years, from the date liabilities are established. Consequently, Company may be found liable for significant taxes and fines. Moreover, tax legislation is subject to frequent changes and the authorities demonstrate inconsistency in interpretation of the law.

Income tax returns may be subject to revision and corrections by tax authorities, generally for a five year period after they are completed. Romanian tax authorities carried out controls on the Company entities related to income tax by the end of 2015 for AQUILA PART PROD COM SA, end of 2010 for SECA DISTRIBUTION SRL.

The management of the Company believes that all the tax obligations included in the Company 's separate financial statements are adequate. Currently, the Company is under fiscal audit of the authorities, as regular periodic audit.

Transfer pricing

In accordance with relevant tax law in Romania, the tax treatment of a transaction carried out with related parties is based on the concept of the market price of that transaction. Based on this concept, transfer prices should be adjusted to reflect market prices that would be established between parties which are not affiliates or related parties and which act independently on the basis of "arm’s length” principle.

Transfer pricing audits are likely to be performed in the future by the tax authorities to determine whether these prices follow the "arm’s length" principle and that the taxpayer's taxable base is not distorted.

The management of the Company is not able to quantify the result of such audits and believes that the Company 's transactions with related parties are conducted at arm’s length.

33. COMMITMENTS

Guarantees and pledges

As at 31 December 2022 the Company has bank letters of guarantee issued in favour of third parties with a total amount of EUR 21,866,079 (31 December 2021: EUR 21,117,758). The letters of guarantee issued in favour of the subsidiary Trigor is EUR 600,000 and in favour of Nordexim is EUR 120,000.

As at 31 December 2022 the Company has bank letters of guarantee received with a total amount of RON 1,200,000.

As at 31 December 2022 the Company has no significant contractual commitments.

34. SEGMENT REPORTING

The Company has analysed the segments of operations such as distribution of goods, transportation and logistics services and determined the segments based on management organization by types of revenues obtained. The Company has determined as reportable segments distribution of goods, logistic services and external transport services considering the nature of similarities of the activities. Distribution of goods refers to sales of consumer goods products (FMCG).

Goods and services revenues are mostly related to internal market sales in Romania, as presented in Note 8.

34. SEGMENT REPORTING (CONTINUED)

Income statement for the year ended 31 December 2022:

The Company does not allocate assets and liabilities per segments, as the management doesn't use such information for decision making process.

During 2022, the Company had no distribution clients that exceeded 10% of goods sales, while in 2021 the Company had only one such client with 10.3% (RON 185 million).

35. SUBSEQUENT EVENTS

At present, we are monitoring very closely the current situation and developments of economic conditions regularly conduct a risk assessment on this basis. We are in constant dialogue with our customers and suppliers in the region, which also enables us to identify any impact on our business and supply chains at an early stage and act accordingly.

The war in the Ukraine is still creates increased geopolitical risks and further challenges for global supply chains are to be expected which will impact the global economy. We anticipate that the global challenging conditions will persist for the following months, however, this stage Management doesn't expect that future possible economic evolution will have a significant negative impact on the Company operations and on the recoverable value of the Company long term assets. No other significant subsequent events occurred until date of the financial statements which require disclosures.

Signed and approved at 28 March 2023:

Chief Executive Officer
Vasile Constantin Catalin
